

WHEATGRASS JUICE

WHAT IS WHEATGRASS JUICE

WHEATGRASS

Wheatgrass is the early stage of the common wheat plant. Wheatgrass is the preferred type of grass because it provides the best balance of nutrition, taste, yield and grow-ability.

To get the best benefits, wheatgrass must be grown outdoors with full sun, soil, air and natural rain. It must be grown from untreated **NON-GMO** seed and it must be chemical, herbicide and pesticide free.

Harvesting takes place when the plant is at its nutritional peak around 7 - 11 inches tall and has accumulated growth energy which the plant will use to power rapid growth, jointing and flowering into grain.

WHEATGRASS

Juicing allows us to capture this growth energy. We apply pressure to the plant to separate the nutrition from the indigestible fiber. Juice is easy to digest, readily absorbed and therefore biologically available to humans. We need it juiced because our digestive system cannot break down grass fiber on its own.

Our job is to grow, harvest, juice, capture and protect this growth energy. We keep it intact by cutting without bruising, washing without chemicals, juicing without atmosphere, vacuum packing and flash freezing with nitrogen. Each step is designed to prevent biological aging and oxidation.

GROW-CUT-WASH-JUICE-FREEZE

WHEATGRASS

Ultimately, this gives you access to high quality wheatgrass juice throughout the year. You can be confident that the juice you are drinking has come from the best **SOURCE** possible. 

You can now reap the benefits of a broad range of antioxidants, amino acids, vitamins, colloidal minerals, essential fatty acids and enzymes.

We are delighted to bring you this incredible food and hope you love it!

CHEERS!

WHY OUR JUICE

FIELD GROWN

Wheatgrass needs to grow outdoors in open fields. This environment sends natural cues that signal the plant to build a strong root system and produce phytonutrients. Greenhouse plants have far fewer nutrients and often significant mold issues.

OUTDOOR ADVANTAGE

- 6 x deeper root system
- 10 x longer growing cycle
- 10% - 300% higher nutrient levels
- 50% higher chlorophyll alone
- Zero simple sugars
- Absolutely no wheatgrass mold problems
- Great taste

JUICE QUALITY

100% WHEATGRASS JUICE

OVER 90 MINERALS

UNPASTEURIZED, FLASH FROZEN, VACUUM PACKED

GLUTEN & SUGAR FREE

10 FL OZ PACKAGES, 0.5 FL OZ PORTIONS

LAB TESTED

MINIMUM 1 YEAR FREEZER LIFE

BEYOND ORGANIC, NON-GMO, HERBICIDE/PESTICIDE FREE

SERVINGS

SUGGESTIONS

(CHILDREN

1 CUBE DAILY

TEENS/COLLEGE

1-2 CUBES DAILY

ADULTS

3-6 CUBES DAILY

HOW-TO

STEP 1

Remove a juice bag from the freezer and lay it on the counter or 1 minute

STEP 2

Pick it up and twist firmly 5-10 times

STEP 3

Pull sharply end-to-end

STEP 4

Pull sharply side-to-side

STEP 5

Cut the top of the bag and pull the sides of the package apart

STEP 6

Empty the bag into a freezer safe resealable container

STEP 7

Put the cubes into a glass.
Add 3 parts room temperature water and stir.
Drink it as it thaws.

FYI

DELIVERY CONDITION

- The wheatgrass juice bags should arrive firm to the touch.
- The ice bags will have significant melt.

RECYCLING THE CONTAINER

- The container is 100% recyclable type 6.
- Check your municipal website to find out how to recycle type 6 in your city.

REMOVING THE JUICE CUBES

- Follow the instructions
- Do not cut the cubes out individually with scissors as it will make a messy counter
- The first time removing the cubes may be challenging, by the 3rd bag you will be an expert!

DETOXIFICATION

- We consider Wheatgrass a Superfood
- Detox is possible, but not the main purpose
- Recognize detoxing as a positive
it means your body is eliminating toxins

VARIABILITY

- Each batch of juice will be different
- Variability is part of truly natural food
- It is not possible to achieve perfect consistency
without destroying the beneficial living
qualities of your wheatgrass juice!
