

FOR MORE THAN 25 YEARS

*We Bring Joy to Life for Thousands
throughout North America!*

NEW! *RockerGLIDE™*
by *WhisperGLIDE Swing Co., LLC*

A RockerGLIDE Swing provides:

- ❖ an ideal environment for socialization among residents, families and friends, thus helping to overcome loneliness and boredom.
- ❖ a soothing gliding motion that calms the soul and helps reduce anxiety.
- ❖ an opportunity for family involvement by doing a shared activity that is enjoyed by all.
- ❖ year-round enjoyment by easily moving it indoors and outdoors.

or check us out on our new website

www.whisperglide.com

A RockerGLIDE Swing is:

- ❖ designed to be transfer-friendly from a walker or wheelchair – very low-profile platform and well-placed handrails.
- ❖ engineered to be user-friendly in relocating it indoors or outdoors, allowing it to be enjoyed year-round.
- ❖ compact in design which expands placement options.
- ❖ engineered and constructed to provide maintenance-free enjoyment for more than 20 years.
- ❖ shipped largely pre-assembled and can be quickly enjoyed.

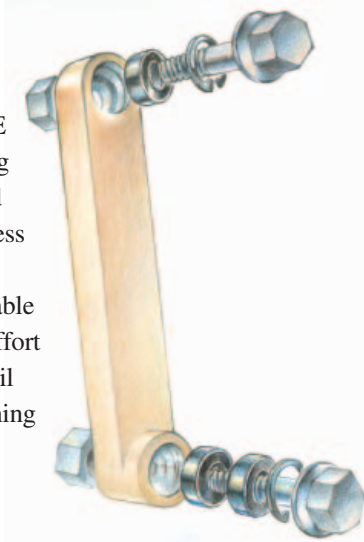

ENGINEERED TO LAST!

A Closer Look at *RockerGLIDE* Excellence!

ENGINEERED TO LAST!

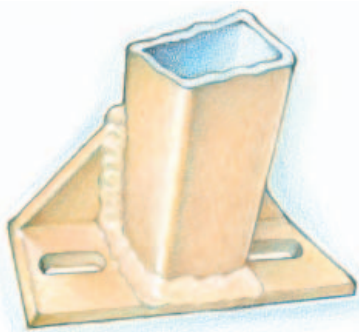

1. Whisper-Action Components

The hallmark of the RockerGLIDE swing is the incredibly easy gliding action. To ensure a super quiet and smooth ride, 24 heavy-duty, stainless steel sealed bearings are used. The maintenance free bearings enable one to easily glide with minimal effort by gently pushing the table handrail with your hands or by simply pushing on the platform with your feet.

2. Commercial Grade Aluminum Construction

Safety, strength and durability are the top priorities in our design. Our specified heavy gauge aluminum alloy provides outstanding strength and its non-rusting attribute is ideal

for use in extreme environments. The welds are completely circumferential, running along the entire union joint of the welded pieces. The aluminum tubing and welds are backed by a 10 year warranty.

3. Stainless Steel

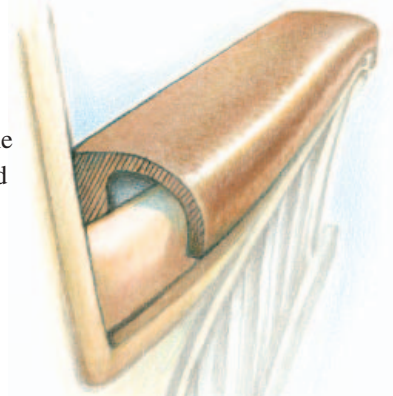

Our exclusive use of stainless steel fasteners gives confidence for maximum corrosion resistance, even in the most extreme environments.

4. Finishes

A state-of-the-art powder coat paint process is utilized to provide a highly durable and long lasting finish. The multi-step process applies the powder paint electrostatically and it is then baked at over 400 degrees to secure the bond to the aluminum, which creates a hard, scratch resistant surface. The finish is warranted for 5 years against peeling, cracking or blistering under normal conditions.

5. Vinyl Coating

The seats, armrests and table handrails are covered in a durable vinyl coating that provides added comfort and protection. The closed-cell vinyl is easy to clean and is enhanced with ultraviolet stabilizers to protect against outdoor elements.

6. Cushions

Constructed from premier Textilene vinyl coated polyester fabric, which withstands fading, cracking and tearing, is well known for its durability in continuous outdoor exposure. The fabric is also engineered to be mildew resistant. Solid stainless steel snaps securely fasten the cushion to the glider. Marine-grade, UV stable nylon thread is used in the construction of the cushion.

Vinyl Coated Safety HandRail provides assistance transferring

Heavy-duty Fiberglass Table with recessed cup/glass holders

Optional weather resistant cushion

24 heavy-duty Stainless Steel Sealed Ball Bearings

All aluminum components are powdercoat painted

Stainless Steel Fasteners

***Brings Joy to All
& Makes Great Memories!***

“We LOVE our *RockerGLIDE!*”

It's About Improving Quality of Life

“The *RockerGLIDE* is a **very cost-effective way** to reduce agitation, which is common in dementia. Residents gravitate to this **great gathering spot**. It is just plain fun!”

--Sharon Claffin, Nurse Manager, Wealshire of Bloomington, Bloomington, Minnesota

“The *RockerGLIDE* is a **big hit here!** We placed it outside for the summer.

The glider is a great asset by giving residents a comfortable place to socialize.

The rocking action is **soothing and relaxing**. “I love to meet my friends by the swing!”

They line up every day. Due to its demand, we sometimes have to put up a **sign-up sheet**, just to make sure all get a turn!

They absolutely love it and are proud to show it off to their visiting families.”

--Michael Lorenz, Housing Director
The Alton Memory Care, St. Paul, Minnesota

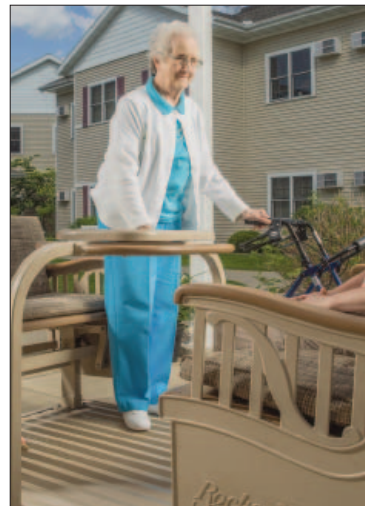

“I Love the new *RockerGLIDE!*”

The **constant motion stimulates** the cerebral cortex, thereby increasing a person’s ability to focus and concentrate, and assists them to relax.

Gliding can help **decrease agitation**. Constant gliding motion helps those with pain, dementia of any kind, and a number of other conditions. We are all looking for ways to decrease psychoactive drugs, and relieve pain. **Gliding is an answer!!”**

--Sherrie Dornberger, RN,
GDCN, CADDCT, CDP, CDONA, FACDONA
NADONA*/ LTC Executive Director, Cincinnati, Ohio

(* National Assn of Directors
of Nursing Administration/Long Term Care)

“We transfer many of our **wheelchair users** onto the *RockerGLIDE*. All who use it love the experience. **Their smiles** tell the whole story!”

--Michelle Zieger Program Supervisor,
Midwest Special Services, A Training and
Day Care Center, St Paul, Minnesota

RockerGLIDE brings joy to life one glider at a time!

**EASE OF MOVING
FROM INDOORS TO OUTDOORS!**

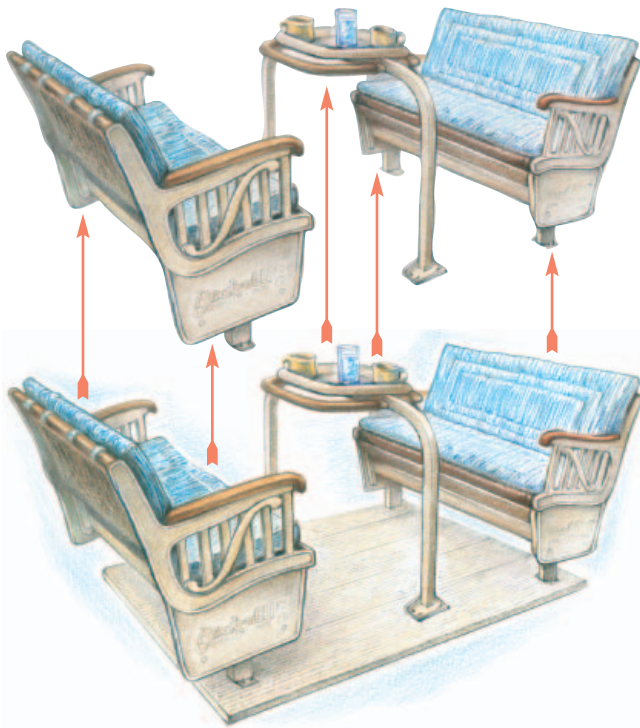

Easy to disassemble the seats and table / floor handrail, and move the glider from outdoors / indoors, then re-assemble quickly.

Just four-bolts to remove the table, and eight-bolts per bench, makes this easy to move inside or outside.
