A Close Look at *WhisperGLIDE* Excellence!

ENGINEERED TO LAST!

1. Whisper-Action Components

The hallmark of the *WhisperGLIDE* Swing is the easy swinging action. To assure a quiet, smooth ride, we use only self lubricating full-length bronze bushings, and half-inch stainless steel bolts. Thus, you can easily swing by gently moving the table handrail with your hands, or by simply pushing on the swing platform with your feet.

2. Aluminum Frame Construction

The swing frames are made of aluminum – a non-rusting metal which is ideal for use in extreme environments. Strength is a top priority in our designs. We use heavy gauge aluminum and channels where necessary. Our specified alloy is extruded, tempered, and then precision-cut

prior to welding. Most welds are “complete circumference”, running along the entire joint of the welded pieces.

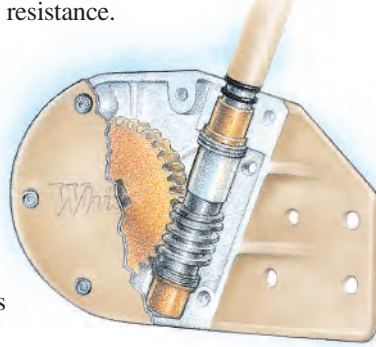

3. Stainless Steel

From the assembly bolts and nuts to the lock-up shafts and swing pivot shafts, our extensive use of stainless steel gives confidence even in the most extreme environments. These components are primarily high grade alloys, for maximum corrosion resistance.

4. The Custom Gearbox

The wheelchair-accessible swing allows for easy entry and exit, simply because the ramp can be gracefully lowered and raised with the gearbox. Materials used include stainless steel, bronze and aluminum. The result is a smooth-action of grease-enclosed components that allows you to use the wheelchair ramp with ease.

5. Cushion & Canopy

Constructed from premier Textilene vinyl coated polyester fabric which withstands fading, is mildew resistant, and known world over for its durability in continuous outdoor exposure. Solid stainless steel snaps securely fasten the cushions and canopy to the swing. Marine-grade UV stable nylon thread is used in the construction of the canopy and cushions.

6. The Twin Lock-ups

Twin lock-ups facilitate safety during entry and exit. With simplicity in mind, the design of the lock-up receptacles provides a secure interface with the stainless steel lock-up shafts. The swing is thus adequately stable and fixed while the lock-ups are deployed. Also featured are padlock holes – which enable you to completely secure the swing in an immovable state, if desired.

7. Finishes

It's no surprise that we utilize a state-of-the-art powder paint process for finishing – the result of this technology speaks of extreme durability. This multi-step process applies powder paint using electrostatics. The paint is then baked at more than 400 degrees, which bonds it to the aluminum, and provides a hard, scratch resistant surface.

8. Vinyl

The seats, floor, wheelchair platform and ramp are made of vinyl clad steel. The closed-cell vinyl provides a surface that is easy to clean, comfortable, and attractive. In addition, we incorporate ultraviolet stabilizers directly into the vinyl, for long-lasting protection.

SAFETY CONSIDERATIONS

9. Optional Security Lap Bar

The Lap Bar is easy to place and remove. Upper Frame Clips are provided for storage.

10. Engineered for Safety

- The simple dual lockup feature prevents movement of swing during entry and exit.
- Safety Information and Warning Labels on the swing give specific directions for secure use of the swing.
- Engineered and manufactured for commercial use, the *WhisperGLIDE* Swing has an exemplary safety record for more than 25 years.

“One of the Best Products We have ever Purchased”

Veterans Homes LOVE the *WhisperGLIDE!*

Your Fellow Veterans Say It Best

“We are so pleased to be in possession of **Five WhisperGLIDES!** They are so appropriate for our population. The ease in maneuvering a wheelchair on the swing is fantastic. It’s as simple as 1-2-3. **The WhisperGLIDE** provides our facility with an alternative recreational option that benefits not only the member, but staff and visitors as well. When family and friends visit, they offer a perfect spot to sit and swing awhile.”

– Illinois Veterans’ Home – Manteno

“Your 600 series **WhisperGLIDE** swings are wonderful! The members at the Norfolk Veterans Home as well as their friends and friends are really enjoying them. We even have staff that takes their break rocking away. We are able to get any size wheelchair on from the rear entry without restriction. This has saved our staffs back from lifting injuries. We would definitely recommend your swings to anyone for a multitude of uses.”

– Norfolk Veterans’ Home – Nebraska

“After showing the video to our service organizations, they came up with **funds for three!** We absolutely love our swings. Thanks!”

– Arizona Veterans Home - Phoenix

Experience the Feeling!

WhisperGLIDE[®]
SWING CO. LLC

AMERICA’S FINEST THERAPEUTIC SWINGS

“We purchased two **WhisperGLIDE** swings. The residents and their families enjoy the relaxing motion of the swings while receiving the extra benefit of gentle exercise.

Our activities staff also takes the Alzheimer residents on regular swing outings! These swings were definitely a great purchase.”

– Oklahoma Veterans Center – Clinton

“The staff were surprised at how easy it is to use and were impressed with the built-in safety features. Our wheelchair residents feel secure when using the swing. As a result, we have seen a remarkable calming effect in our residents when the swing is in use.

The **WhisperGLIDE** offers so much enjoyment, in fact, that we have to use creative thinking to get residents to leave the swing when it’s time to go back inside. I would recommend the **WhisperGLIDE** swing to anyone looking for a relaxing way to spend the day.”

– Minnesota Veterans Home – Luverne

A proven, time tested product that delivers incredible gratification to those who use them.
