

WhisperGLIDE Wheelchair Accessible Swing: Product Features & Benefits

Excellence through Quality Design, the Finest Components and Superior Craftsmanship

Low effort swing movement

Created by applying pressure with ones feet to the swing platform or push/pull the table handrail and/or therapeutic handles with ones arms.

*Precision self-lubricating oil-lite bronze bushings insure a whisper quiet and smooth ride

Powder-coated finish on all aluminum parts

Time tested, state-of-the-art electrostatic powder-coated paint process

*Will not peel

*Extremely durable to withstand years of harsh outdoor elements

*Finish guaranteed for five years

Closed-cell, UV stable vinyl coated steel parts

Durable coating encapsulates all of the steel parts to provide total protection against rusting

*Easy to clean and maintain

*Vinyl coating and contoured shaped seats adds overall comfort

Heavy gauge extruded aluminum construction

*Rustproof and maintenance free

Solid stainless steel assembly hardware and twin lockup components

*No rusting and maximum corrosion resistance

Oversize canopy

78" wide by 90" long provides generous shade. Constructed from premier Textilene vinyl coated polyester fabric withstands fading, is mildew resistant and known world over for its durability in continuous outdoor exposure. Solid stainless steel snaps securely fasten the canopy to the frame. The canopy is sewn together using UV stable, marine-grade nylon thread.

Table Handrail and Therapeutic Handles

Safety table handrails are attached to both sides of the fiberglass table. The therapeutic handles are attached on the wheelchair side swing hangers.

*Provides multiple hand placement options

*Promotes increased range of motion exercise for arms and upper body

*Offers independent gliding opportunities for all swing occupants

Wheelchair Platform and Ramp

Will accommodate most powered and long or short wheelbase wheelchairs

*Wheelchair space front to back: 43"

*Platform and ramp width: *Wheelchair ramp incline is only 10%

Wheelchair Swing Action

Since the entire platform swings, the wheelchair remains in a level position during the arc.

*The smooth and consistent swing movement provides a therapeutic motion

*All swing occupants can enjoy the same swing motion simultaneously
