## RING SIZE GUIDE

Before using our guide to find your ring size make sure you have printed this PDF in US Letter size at 100% scale. To make sure the guide is accurate you can place a credit card on the line below- if it matches up you are good to go!

To use our guide take a ring you already own that fits you well.  
Place your ring on the circles above until you only see the white circle.  
If your ring falls between two sizes go with the larger size to be safe!

If you do not have a ring that you can use- take a string and wrap it around your finger until each end meets! Cut the string & measure it on a ruler, this measurement is the circumference of the ring. See the chart below to determine your size.

If you are in between sizes we recommend choosing the larger size.
