Turbine Flowmeters

TM-6710 range

The TM-6710 range of flowmeters is an excellent , low cost device for monitoring water flow rates in domestic and commercial applications.

It consists of a turbine flowmeter, connected by cable to a large, easy to read, remote mounted display.

The flowmeter is screwed into the water line, and comes in 3 different sizes, 1/2", 3/4" and 1".

With a press of the display button, the display can change between a flow rate scale of L/min and total Flow rate of L (which can be reset if required).

Specifications

Flow ranges : 1/2" unit (TM6710-44) : 2 - 25 L/min
3/4" unit (TM6710-66) : 3 - 40 L/min
1" unit (TM6710-88) : 4 - 100 L/min

Accuracy : +/- 5%

Powered by : 2 x AA batteries

Max Pressure : 8 bar
