Battery Back-up for CO2 Monitors

Universal Power Supply

- Plug your monitor into a Universal Power Supply (UPS) like this one from **Amazon**.
- Mount the UPS to the wall next to the monitor.
- The UPS will store power to ensure the monitor remains operational during brief power outages.

Hard Wire from Fire Panel

- Hard wire the monitors power FROM the fire panel.
- Panel supplies back-up power to ensure the monitor remains operational during brief power outages.
- Panel should supply 24V DC to the monitor.
- Connection should be made by electrician or fire alarm company.
