

Connecting Multiple RAD-0002-ZR O2 Monitors to a Single SV-1026 Solenoid Valve in Series

Multiple RAD-0002-ZRs can be connected to a single **Solenoid Valve**:

In this configuration the solenoid valve will close when Alarm 3 is activated on any RAD-0002-ZR.

CO2Meter Notes

- Recommended maximum cable length should not exceed 300 linear feet
- Note that in this configuration, if the RAD-0002-ZR loses power, the valve may not fail closed
- Testing was completed with five (5) RAD-0002-ZR monitors and (1) SV-1026 Solenoid Valve
- Utilizing other components may nullify the accuracy of this diagram
- No assurances can be made on systems that include more devices or valves
