

K-30 10% CO2 Sensor User Configuration

CO2 Meter

Phone: 386-872-7665

Email: sales@co2meter.com

Your K-30 10% Sensor comes with 2 configurable out-puts, shown on the left. CO2Meter can custom configure the outputs per your request before the product is shipped to you.

This is helpful for applications operating within a specific range of CO2 levels and for interfacing with custom controllers. Just click and type in the fields below to fill out the form.

ABC: Enabled Disabled

NOTE: MAX CO2 READING IS 100,000 ppm or 10% CO2 concentration.

*****CUSTOMER: Please record all CO2 values in PPM only*****

<p>Output 1 Description: 0-10V Analog Linear CO2 Output Minimal Value CO2: _____ Voltage: <u>0.00</u> Maximal Value CO2: _____ Voltage: <u>10.00</u></p>	<p>Output 2 Description: 0-5V Analog Linear CO2 Output Minimal Value CO2: _____ Voltage: <u>0.00</u> Maximal Value CO2: _____ Voltage: <u>5.00</u></p>
<p> </p>	<p> </p>

Please fill out this form and click the send button below, or, alternatively, save changes, and e-mail it back to sales@co2meter.com. Your sensor will be programmed with the information you specify here upon arrival.
