Carbon Reduction Plan FY23

Emissions intensity (M\$/tCO₂e)

Emissions intensity (Units dispatched/tCO₂e) For every thousand units of AWWA underwear dispatched from our warehouse we emit X number of tonnes of carbon.

Absolute vs Intensity reduction targets

AWWA has chosen to measure the intensity of our emissions based on the number of units dispatched, and set intensity reduction targets based on this figure. The reason for choosing this option over setting absolute reduction targets is due to forecasted growth over the next few years, which will see our overall total emissions increase (due to increased volumes of inwards and outwards freight). Setting an intensity reduction target makes our targets comparable year to year.

However we have set an absolute reduction target for overall emissions in the short term - which we achieved at the end of FY23 by prioritising sea freight over air shipments.

AWWA EMISSIONS REDUCTION PERFORMANCE

Emissions activities:	Base Year (FY21)	FY22	FY23 (current)	Current year % change against Base Year	Overall (%) of total emissions
Upstream Freight	78.26	128.60	53.93	-31.09%	66.94%
Fuel & Energy Related Emissions	14.10	18.68	10.26	-27.23%	12.74%
Mobile Combustion	9.56	8.11	9.23	-3.45%	11.46%
