

ONE STEP BEYOND

Secure Your Design

Hardwood Decorative Stair Risers

RICHNESS — BEAUTY — ARTISTRY

*Enter Into Simple Elegance and Distinctive Value, by adding
Intricately Carved Hardwood to the Face of Your Stairs.*

Rich Hardwood

 Dramatically enhance the natural wood elements and organic design in your home by adding hardwood to the face of your stairs.

Your stairs are the first thing people see upon entering your home. The beautiful craftsmanship and unique detail of hardwood stair risers create a distinctive ambiance in this high traffic area and add authentic character to your home.

Innovative Artistry

Choose from many intricately detailed designs that will set your home apart by highlighting your personal style. Experience timeless beauty in your chosen design, whether you like simple lines, fine country, bold flowers, traditional scrolls, geometric shapes, antique vines, colonial style or rustic lines. We can even create for you a custom design! The balance and scale in each pattern will bring designer appeal to this currently unnoticed area of your home décor.

Country Daisy with sage green and pale blue

- Matching with tread
- Golden Oak stain
- 2 color "solid" highlights

Leaf with plum red

- Matching with tread
- Red Mahogany stain
- 1 color "solid" highlight

Colonial Style with white

- Matching with tread
- Red Mahogany stain
- 1 color "white" highlight

Diamond dot with white

- Coordinating with tread
- Golden Pecan stain
- 1 color "white" highlight

Sunflower with yellow

- Coordinating with tread
- Early American stain
- 1 color "solid" highlight

Rustic Line with white

- Contrast with tread
- Special Walnut stain
- 1 color "white" highlight

Diamond with white

- Contrasting with tread
- Dark Walnut stain
- 1 color "white" highlight

Simple Elegance with grass green and sky blue

- Matching with tread
 - Golden Oak stain
 - 2 color "design detail specific" highlight
- Turn screens upside down to create a whole new look!

Simple Beauty

Hardwood stair risers are a stylish and practical alternative to carpet, which becomes crushed, soiled and almost impossible to clean. You will save time and money by eliminating the need for vacuuming, professional cleaning and carpet replacement. And, you will love the dramatic appeal and rich European style of hardwood stair risers. Your guests will admire your ingenuity and simple elegance of your stairs.

For a **subtle impact**, use a dramatic design and **alternate risers** with a coordinating subtle design or use a subtle design on every riser.

Notes: Darker brown areas of design denote wood cut through partially and the white areas denote wood cut through completely.

INSTALLATION

Installation Options

1. Glue to the existing risers using 100% clear silicone.
2. Nail onto existing riser using finishing nails, such as brad nails or pin nails. Nail through the "grooved" elements of each design by using a nail punch, so to eliminate nail visibility and the potential to damage the face of the decorative risers. This installation allows for easy removal of the decorative risers for design and/or color changes or for any other reason found necessary.
3. Apply trim molding to secure within the existing riser space.

New Construction/Box Stair Options

1. Integrate the decorative risers into the initial stair build specifications and set into the stringer.
2. Apply a 1/4" X 3/8" build to the top of the existing riser and directly under the tread nose. Apply the cove molding to the custom build and tread nose. The top of the decorative risers then fit underneath the custom cove molding, flush against the build and the bottom of the riser is then simply secured with finishing nails. This creates a beautiful and professionally finished look.

Open-ended Stairs Options

1. Integrate the decorative risers into the initial stair build specifications and miter into skirt board.
2. Finish open ends with excess of self-material on a mitered edge.
3. Finish open ends with available corner trim molding on a mitered or straight edge.
4. Finish open ends with available flat trim molding on a mitered or straight edge.

Curved or Bull-nose Stairs

As with other wood building products, the decorative risers can be "kerfed" or cut on the backside, just less than halfway through the depth of each riser to implement onto curved stairs. The design placement within the riser space must be considered, as the decorative risers should only be cut into on the ends or flat/solid space of each riser, not within the grooved or cut-through elements. This might create the need for a larger size or design alterations, where the design would be placed off-center within each decorative riser.

APPLICATIONS

New Home Construction Project

Consult with general contractor to have the "professional stair builder" implement the Hardwood Decorative Stair Risers into the original specification sheet.

Remodel Project

Current Stairs

- Hardwood Stained
- Hardwood Stained with carpet runner
- Full carpet with stained treads
- Full carpet without stained treads
- Full carpet

- Full carpet

Resolve

- Add Decorative Stair Risers.
- Remove carpet runner, add Decorative Stair Risers.
- Remove carpet, add Decorative Stair Risers.
- Remove carpet, stain treads, add Decorative Stair Risers.
- Remove carpet, stain treads, add Decorative Stair Risers and partial carpet treads available in open market.
- Remove carpet on risers only, secure carpet under tread nose, add Decorative Stair Risers.

Adding Risers to Stairs That Have No Risers (basement or deck)

Apply the Decorative Stair Risers from the back and under-side of the set of stairs, fastening them to the existing stair treads from both the back edge of one tread and the under-side of the tread just above. You will use a fastener system available in the open market, such as "L" brackets.

An additional option would be to first apply an additional piece of wood behind your current set of stairs, as described above, to create the new riser space and then add the Decorative Risers to that new riser.

CUSTOM RISERS

Custom Designs

We can create a custom design for you! If you have a wallpaper, tea cup or any other design that you would like to incorporate into your stairs, you need only to submit a copy or an idea for the design. Even if you have a very specific design in mind, such as your family monogram or family crest, we can create exactly what you want!

Custom Sizes

Custom sizes are available for custom stairs:

- Larger risers than the standard 36" length.
- Open-ended (1-side) risers, where the balusters penetrate the treads only on 1 side and the visual center point becomes off-center within the entire riser space and extra length may be preferred.
- Custom risers, which include open-ended (2-sided), curved or bull nose specifications.

Design Alterations

Design alterations are available to accommodate:

- Larger risers.
- Smaller risers, where the existing riser space is less than or very close to the design dimensions = 5 1/4" X 30" and the authenticity of the design would be sacrificed upon cutting.
- Custom or off-center risers, which include open-ended (1-side), curved or bull nose specifications.

DECORATIVE RISERS HIGHLIGHT INSERTS

Decorative Risers

The decorative risers consist of Hardwood Maple MDF Core board of the highest quality available, as used in other building materials, such as trim molding and cabinetry. This species of wood eliminates the potential for bowing, expanding/contracting and splintering, as seen with solid hardwood. Each riser has been carved through both completely and partially to create the various design patterns. The cut-through design elements will be enhanced, by exposing the color on the existing riser.

Each riser is sold "unfinished," so to be stained to either match or coordinate with the current wood finishes already within the home décor; such as floors, hand rails, trim molding or even furniture. The MDF core when stained, also creates a "darker" color within the grooved and cut-through elements of each design to dramatically enhance the intricately designed shapes and 3D characteristic of the product, as well as disguising the finishing nails upon installation.

- Riser dimensions = 6 1/2" X 36".
These dimensions are larger than most existing risers which utilize cove or trim molding. This allows the decorative risers to be cut to meet the exact measurements of each existing riser.
- Riser thickness = just less than 1/4".
This dimension matches the standard cove molding edge, which is utilized by most stair builders.
- Design dimensions = 5 1/4" X 30".
These dimensions allow the space for cutting and for establishing the center point for installation.

Highlight Inserts

The highlight inserts consist of a "paintable" white mat/matt material that has been selected for paint adhesion, rigidity and durability. The highlight insert component can be utilized when the Hardwood Decorative Stair Risers are being applied to a set of stairs where carpet has been removed and the existing risers are significantly damaged. This piece is inserted behind the decorative risers to disguise the damaged riser and eliminate the need for puttying, patching, sanding, taping, priming and painting. The standard white color can be utilized as-is or can be painted to implement different accent colors without having to permanently paint on the existing risers. Both sides of the highlight insert can be used for color changes and the material receives most types of paints, including latex, enamel and acrylic paints. The highlight insert color or colors dramatically enhance the home décor color scheme, the 3D characteristic of the product and the ability for each customer to create a unique design statement on their stairs.

- Highlight Insert dimensions = 6 1/2" X 36".
These dimensions allow the highlight inserts to be cut-to-size with a scissor. Precision cutting is not a requirement because the edges will not be exposed upon installation.
- Highlight Insert thickness = .015 (similar to poster board).

"One Step Beyond definitely has a superior product with overall appearance and quality" Kim Gelsler, Design Coordinator,
Robert Lucke Homes Inc.

"The artisan carved risers provide a more elegant look." Jim Cutter
Cutter Construction

I can't stop looking at my new set of stairs! It is like having a piece of art in my foyer. It significantly increases the value of my home. Karen G.

"The craftsmanship in the Decorative Stair Riser Screen kit has great style and beauty. The installation was easier than any other upgrade project I've done...even simpler than painting a room. It was a fun and easy project with fantastic results!" Joe D.

"Wow! The Decorative Stair Riser Screens were a fast and simple way to add decorative art to my plain set of stairs. They give my stairs a very rich look! We love them!" Cindy B.

ONE STEP BEYOND™ is a company staffed with experienced and professional designers who intend to bring you very innovative and high quality products for your home that will bring dramatic "designer" appeal into currently unnoticed areas of your home décor. We plan to continue to bring you new product lines that will allow you to express your own personal design style within many areas of your home. We intend to always provide you with many ideas and options, but we want to help you build confidence in knowing that "what you like" is exactly what you should implement into your home décor. We want you to become your own interior designer. We want you be 100% satisfied with our products and that you will easily discover the tremendous value in implementing our products into your home décor. We intend to always provide you with the highest quality products available in the marketplace and we stand by our products in our return policy and warranties. We rely on you to help us in this mission. We welcome any comments, suggestions and all feedback from you our customers, so we can continue our success in bringing you innovative designer home decor products. We take pride in the fact that all of our manufacturing is **100% Made in the USA.**
