

INSTRUCTIONS

PREP Wash hands & remove contents.
Pour $\frac{1}{3}$ C water into vessel.

EXPAND Place all discs into coco pot. Rinse under running water then break apart discs with fingers. Repeat until discs are fully expanded.

PLANT Place coco pot into vessel, add seeds & push just below the surface. Set in a warm, sunny spot.

GROW Check coco every 2-3 days. If dry, add $\frac{1}{3}$ C water to vessel. Once sprouts pop, empty water & add $\frac{1}{8}$ tsp plant food & $\frac{1}{3}$ C water into vessel.

GROWING ON

Once plant outgrows vessel, coco pot can be transplanted directly into pot or ground.

Vessel is reusable. Vessel is used for planting only; not to be used as dishware.
