

# Smart Light Bulb User Manual

Read this user manual carefully before you use the appliance and save it for future reference.

## Part 1: Quick Start Guide

1. Scan the QR code or download the "PlusMinus" APP at [www.plusminus.ai/app](http://www.plusminus.ai/app)

2. Register an account with your email in and login App.
3. Add device and select the Device Type;

4. Follow the in-app instructions to complete the installation.

EZ configuration mode: Light bulb blinking 3 times.

AP(hotspot) configuration mode:  
Light bulb blinking once every 3 seconds.

**Note: LUMIMAN smart bulbs only can be set up on 2.4GHz network.**

5. User can re-name or share the device after Wi-Fi connection is finished.

## Part 2: How to connect to Alexa

### Method 1: App to App

1. Add devices in "PlusMinus" App and keep them online;
2. Login your Amazon account in "Amazon Alexa" App;

3. Open the PlusMinus app and then Click the "Smart integrations" button on the right upper corner.

Afterward, choose link to "Amazon Alexa";

4. Click " Sign in with Amazon" and then follow the instruction to link the skill.

## Method 2

1. Add devices in "PlusMinus" app;
2. Launch "Amazon Alexa" choose "Skills" from menu;

3. Search "PlusMinus" skill and click "ENABLE";
4. Enter your "PlusMinus" Account and Password, then click "Link Now";
5. Control devices by voice.  
"Alexa, turn off the light."  
"Alexa, turn on the living room lights."

## Part 3: How to connect to Google Home

1. Add devices in "PlusMinus" app;
2. Launch "Google Home" and click the "Add" and then "set up device"

3. Click "Have something already set up?" and find "PlusMinus" in the list, enter your "PlusMinus" Account and Password, then click "Link Now";

4. Control your smart devices through Google Home.

## Part 4: Customer service and FAQ

If you have any more questions contact us inside the PlusMinus App

## FAQs

### 1. How do I connect multiple devices one time?

You can put all devices in configuration mode, and connect them to the APP simultaneously. You can also connect one bulb in the APP and then use the searching mode to connect other devices.

### 2. How to divide my Wi-Fi to 2.4Ghz and 5Ghz?

LUMIMAN light bulb support most of dual-band Wi-Fi routers, if the device failed

to connect the APP, please log in to your Wi-Fi router's setting page, uncheck "Keep a common network name (SSID) and password for both 2.4 and 5.0 GHz bands." or edit the name of the 5.0 GHz band to differ it from the 2.4GHz band.

### **3.What can I do when my device(s) fail to connect to the APP by EZ and AP mode?**

Switch off the Wi-Fi router. Find another phone and set up a personal hotspot as a Wi-Fi network. The Wi-Fi SSID and password for that hotspot should be the same as the ones set for your Wi-Fi router. After the device has connected successfully, you can switch off the personal hotspot and switch on the Wi-Fi router. The light bulb should connect to the Wi-Fi router automatically.

### **4.Why my app need allow my location permission?**

IOS 13 or higher needs your permission to access location, so that the APP can scan your Wi-Fi list.

### **5. One device connected successfully but the other fails.**

It may be that your Wi-Fi router has reached the maximum number of devices allowed to connect to it therefore the other device is not allowed to connect. Most Wi-Fi routers only support 15-20 devices. You can check the Wi-Fi router settings or try using "Search mode" to connect the other device.

## **Warranty**

---

Products are with our worry-free 24-month warranty.
