

FITTING GUIDE

FLOW DESIGNS WINDOW VENT

INSTALLATION AND FITTING SERVICES

If you are having any difficulties please seek professional advise from the listed International and Domestic Authorised Dealers on our website.

www.flowdesignsaustralia.com

WINDOW REMOVAL NOT REQUIRED

STEP 1

Trim supplied rubber according to notches found on window vents

STEP 2

- Fit rubber trim around the bottom of the window vent, aligning ends to previously referenced notches
- Ensure the rubber trim is fitted securely around both sides of the window vent

HANDY HINT

Ensure the rubber trim is fitted around both sides of the window vent for a secure and safe seal

HANDY HINT

For easier rubber trim fitment, use soapy water to seal the trim onto the window vent

STEP 3

Slot top section of window vent into the top of door window seal ensuring a tight fit

STEP 4

- Roll up car window (**WARNING** if your car has a safety lock feature, do not roll window up all the way, ensure window is only just secured in bottom of rubber trim to avoid window automatically going down).
- Ensure both window and window vent are within rubber trim channels
- If running into difficulty getting window into rubber trim channels, use supplied wooden craft sticks to help spread channel of rubber trim over window. **Only use wooden craft sticks on outter side of window to avoid window damage**

HANDY HINT

Ensure the rubber trim is fitted around both sides of the window for a secure and safe seal

STEP 5

- If available, ensure window lock is on when window vents are in use to avoid accidental window operation
