

# Manual Motor Starters

Meta-MEC

**LSIS**

# LS Meta-MEC Manual Motor Starters provide completed ranges up to 100A

**32AF**

**63AF**

## 32AF

0.1~0.16... 28~40A (17 step)

**MMS-32S**

◦ Standard

**MMS-32H  
MMS-32HI**

◦ High break  
◦ Magnetic release

6~10... 47~65A (10 step)

**MMS-63S**

◦ Standard

**MMS-63H  
MMS-63HI**

◦ High break  
◦ Magnetic release

up to 100A

MMS

100AF

63AF

100AF

11~17... 80~100A (10 step)

MMS-100S

Standard

MMS-100H  
MMS-100HI

High break  
Magnetic release

# LS Meta-MEC Manual Motor Starters deliver more efficiency through various functions and compact design

## MMS 32H... 32A [ Scale 1:1 ]

### Handle Lock

### Dial cover

### Terminals

Screw

MMS-63

Lug

MMS-100

Lug

# Common use from 32 to 100AF

A wide variety of accessories enables a flexible response to changes in specifications

## Function

- Protection of group installation
- Protection of circuits
- Motor protection
- Starter protection
- Wide range of ambient temperature compensation
- Phase failure protection

## Feature

- 45mm width up to 32A, 55mm width up to 63A and 70mm width rated to 100amps
- Three position operator : ON-OFF-TRIP (Only 100AF is applied)
- Complete range of common accessories
- Handle lock in the OFF position
- Class 10 overload trip characteristics
- Trip test
- Finger safe terminal
- Din rail & Screw mounting
- Ready for IE3

## Standard

- Comply with the specifications in accordance with IEC 60947-2 & IEC 60947-4-1  
UL508 (Manual motor controller)  
UL508 (Combination motor controller type E starter)  
CSA C22.2 NO.14  
GB14048

## Certification

- KEMA CB type certificate
- EC-Declaration of conformity
- UL listed
- CSA certified
- CCC

#### ● E-Handle (Rotary-type)

MMS E-Handle is a Rotary-type Handle accessory which can be attached to the front to control and verify the ON, TRIP, OFF condition of Manual Motor Starters under the situation of closing panel.

- Application Model : MMS-32H/HI, MMS-63S/H/HI, MMS-100S/H/HI
- Operation temp. : -20~ +60°C
- CE and UL certified
- Degree of protection : IP65 or UL 50 Type 3R (Separately)
- Locking device : Lockable in on/off position
- Material of insulation : Plastic (PA66)

Type	Application MMS	Remarks
MEH-32	MMS-32H, 32HI	Length of shaft : 115 or 315mm
MEH-63	MMS-63S, 63H, 63HI	
MEH-100	MMS-100S, 100H, 100HI	

### ● Phase Bus System

It is a device for a parallel connection with power terminals in the circuit lined up by MMS, and it can provide the solution "Simple wiring" and "Compact wiring space".

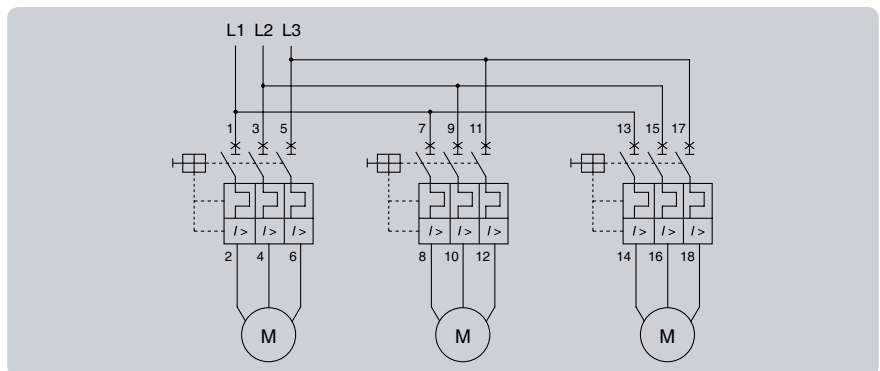

- Application Model : MMS-32, 63
- CE and UL certified
- Safety Cover built-in
- RoHS compliance

Type	Application MMS	Number of Terminals	Rated current	Safety cover attached
PB-322	MMS-32S, 32H, 32HI	2	63A	PBPC-32
PBL-322	MMS-32S, 32H, 32HI with Aux (LX or LA or LAM)	2		
PB-323	MMS-32S, 32H, 32HI	3		
PBL-323	MMS-32S, 32H, 32HI with Aux (LX or LA or LAM)	3		
PB-324	MMS-32S, 32H, 32HI	4		
PB-325	MMS-32S, 32H, 32HI	5	108A	PBPC-63
PB-632	MMS-63S, 63H, 63HI	2		
PB-633	MMS-63S, 63H, 63HI	3		

Model	LTB-32
Pole	3P
Mounting location	Upstream
IP degree of protection	IP20 according to IEC 60529
Rated insulation voltage (Ui)	690V according to IEC 60947-1
Rated operational current (Ie)	63A
Terminal torque	1.7 N.m- on screw clamp terminals

### ● Diagram

### ● Terminal Block

It is an accessory device for ensuring the insulation distance between phases. When this device is used, it meets the requirements of UL Combination Motor Controller Type E.

- Application Model : MMS-32H, HI

# Manual Motor Starters

## Product Selection Guide

### Accessories (Electrical Auxiliaries)

#### ● Enclosure

Case cover of MMS enclosure is specifically designed with dust-proof and corrosive-proof structure.

Therefore, it is the optimum product to use in dusty areas such as cement plants, cotton mills as well as in the presence of corrosive gas or liquid (excl. explosive, flammable gas) such as fertilizer, refinery, and plating plant.

- Application Model: MMS-32H/HI
- Operation temp. : -20~ +60℃
- CE and UL certified
- Degree of protection : IP65
- Material of insulation :Plastic(ABS)

Type	Application MMS	Remarks
EPH-32	MMS-32H, 32HI	Surface mount

#### ● Dial Cover

Dial cover is used to protect the set value from the operation that is not intended. It is supplied as standard for all MMS.

- Application Model : MMS-32, 63,100 (All types)

#### ● Insulation Barrier

Insulation barrier is used to enlarge the creepage distance and clearance to meet the requirement of UL.

- Application Model : MMS-100

Type	Application MMS
IB100	MMS-100S, 100H, 100HI

#### ● Screw mounting holder

32AF MMS is only for DIN rail mountable by itself. Screw mounting holder is used to mount MMS on a panel by screws.

- Application Model : MMS-32

Type	Application MMS	Remarks
MP-32	MMS-32S, 32H, 32HI	For M4 screw

● **Direct adaptor and Mounting unit**

**Direct adaptor , DA**

Direct adaptor is used to connect MMS directly with a contactor

**Mounting unit , MU**

This device is attached module to connect joined MMS with a contactor

· Application Model : MMS+ Susol, Metasol contactor(MC-9~95, MC-6a~100a), Mini contactor

#### • Power consumption

		MMS32S	MMS32H	MMS63S, 63H	MMS100S, 100H
Total power loss Pv					
Circuit breaker at rated load operating temperature	[W]	In = 0.16~1.6A : 4.4	In = 0.16~1.6A : 4.4	In = 10~22A : 10.2	In = 17~32A : 15
		In = 2.5~26A : 7.4	In = 2.5~26A : 7.4	In = 26~63A : 9.7	In = 40~63A : 21.8
		In = 32A : 4.0	In = 32A : 4.0		In = 75~100A : 17.8

#### • Mounting

- 35mm DIN rail for MMS32~63
- 35mm or 75mm DIN rail for MMS100
- use 15mm depth for 35mm DIN rail

#### • Caution for thermal adjustments

1. Keep the setting range as shown below.
2. Moving counterclockwise out of the setting range may cause the damage of the device.

Dial setting method

#### 3. Calibration by ambient air temperature

In case of using out of the standard air temperature range(-5°C~+40°C) it needs to be calibrated by one point

# Manual Motor Starters

## Technical Information

### General data

#### • Installation of auxiliaries

Be sure to turn off the main switch of MMS before any other action.

#### MMS-32S/H/Hi

- To install FX remove the cover ① first.
- 2 each of LX can be installed together.
- Only one of auxiliaries among RU, RS and RUX can be mounted on the right side of MMS.
- Do not give trip signal to RS longer than 10 sec.
- Refer to the possible combination chart for the mounting of LX, LA and LAM on left side of MMS.

- Push the trip button before installation of LAM

- Remove the indicated part in the fig. before the additional installation of LX

#### Separation of auxiliaries from MMS

- be sure to turn off the main switch of MMS before the separation.
- push softly the separation button on the side of the auxiliary and pull it.

※Please make sure to choose proper LA before use because LA for MMS-32 and MMS-63/100 is different.

### MMS-63, 100S/H/HI

- To install FX remove the cover ① first.
- 2 each of LX can be installed together.  
(only 1 each for MMS-63)
- Only one of auxiliaries among RU, RS and RUX can be mounted on the right side of MMS.
- Do not give trip signal to RS longer than 10 sec.
- Refer to the possible combination chart for the mounting of LX, LA and LAM on left side of MMS.
- Do not use with LA-... (32)  
It is only for MMS-32.

- Push the trip button before installation of LAM

- Do not install LA in the status of TRIP of MMS-100

- Remove the indicated part as shown in the above fig. before the additional installation of LX

### Separation of auxiliaries from MMS

- be sure to turn off the main switch of MMS before the separation.
- push softly the separation button on the side of the auxiliary and pull it.

※Please make sure to choose proper LA before use because LA for MMS-32 and MMS-63/100 is different.

# Manual Motor Starters

## Technical Information

### General data

#### ● Installation of auxiliaries

##### How to Install and reset RUX

###### Installing

- (1) Check if the trip button of RUX is "UP".  
If not, push the side lever ① to come it up.
- (2) Fit the both lower hooks ② into the MMS.
- (3) Rotate the handle of MMS to the 20 to 30 degree ③ to ON direction and keep it.
- (4) Fit the both upper hooks ④ into the MMS.
- (5) Input power to the RUX.
- (6) Turn ON the handle of MMS.

###### Resetting

The trip button of RUX does not come "UP" in the event of tripping due to undervoltage.

To turn ON the MMS after the tripping

- ① turn OFF the MMS and check if the trip button of RUX comes "UP".
- ② push the trip button
- ③ turn ON the MMS

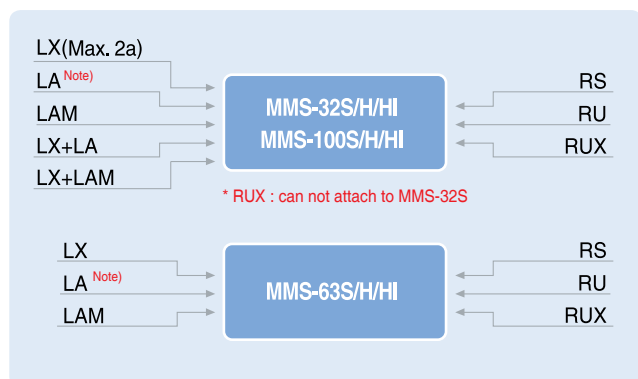

\* Only for MMS-100

\* For all MMS

### Definition type '2' coordination according to IEC 947-4-1 :

- The contactor or the starter must not endanger persons or systems in the event of a short-circuit.
- The contactor or the starter must be suitable for further use.
- No damage to the overload relay or other parts may occur with the exception of welding of the contactor or starter contacts provided that these can be easily separated without significant deformation (such as with a screwdriver).

### ● What is the IE3?

Motor is rated from IE1 through IE4 depends on its energy efficiency which means IE3 is more efficient compared to IE1 and IE2-rated motors.

### ● Why IE3?

As part of the EU Environmental policy "20/30-20-20" strategy, the EU is committed to achieve the followings by 2020.

- Reduce greenhouse gas emissions by up to 30 %
- Increase the share of renewable energy to 20 % and
- Boost energy efficiency by 20% in general.

IEC 60034-30 standard specifies IE classes for motors in accordance with the above requirements.

Therefore, consumers must comply with the standard when using MMS products.

- IEC 60034-30-1 standard
- IE1 Standard Efficiency
- IE2 High Efficiency
- **IE3 Premium Efficiency**
- IE4 Super Premium Efficiency

### ● How to select MMS?

To meet the IE3 motor starting current & Inrush current, use of de-rating table is recommended. (13 times the rated current)

#### Example)

If you select the product A or B...

A : MMS setting scale " 11 ~ 17A

B : MMS setting scale " 14 ~ 22A

Rated motor Current : 16A

The short-circuit current of MMS A is 221A ( $17 \times 13$ ), and MMS B is 286A ( $22 \times 13$ ).

When applying the motor's rated current(16A) to MMS A, the multiplier of the short-circuit current is 13.8 times. When applying the motor's rated current(16A) to MMS B, the multiplier of the short-circuit current is 17.9 times. If motor of IE3-grade or above is used here, malfunction can be caused due to higher starting current compared to that of IE1,2-graded motor. Therefore, MMS B is recommended since it has the higher multiplier of the short-circuit current.

# Manual Motor Starters

## Technical Information

### Thermal limit on short circuit for MMS

#### I ) Thermal release trip current :

The adjustable inverse bimetal trip reliability protects motors against overloads.

The curve shows the mean operating current at an ambient temperature of 20 °C starting from cold.

Careful testing and setting ensures effective motor protection even in the case of single-phasing.

#### II ) Magnetic release trip current :

The instantaneous magnetic trip has a fixed operating current setting.

This corresponds to 13 times the maximum value of setting range, at a lower setting it is correspondingly higher.

#### Current setting $I_e$ :

The overload trip corresponds to a thermal overload relay in a motor starter conforming to IEC 947-4-1.

If a different value is prescribed (e.g. reduced  $I_e$  for cooling medium having a temperature higher than 40 °C or a place of installation higher than 2000m above sea level), the setting current is equal to the reduced rated current  $I_e$  of the motor.
