2. Lock nut
3. Pivot bolts
4. Mounting holes
5. Hex Key
6. Wall plugs
7. Mounting screws

Installation

Tools required (not included)

1. Drill
2. 6 mm drill bit
3. Phillips head screwdriver

Please Note:

1. The supplied wall plugs the supplied wall plugs are only suitable for mounting on concrete and stone.
2. The camera can be tighten with the “Lock nut” .
3. The camera positioning can be adjusted by loosening and tightening the “Pivot bolts”.

4. The assembly material used must be suitable for the respective location. If in doubt, consult a professional.

CAMERA OPERATION

SETTING UP THE CAMERA

When first using the camera we need to adjust the settings to suit the planned recording method. Inside the camera you will find a switch that says OFF-TEST-ON.

OFF: The camera will be completely switched off.

TEST: Adjusts settings, manually take photos or videos and playback photos and videos.

ON: The camera is activated to take photos automatically as per your settings.

ADJUST SETTINGS

To adjust the settings move the mode switch to TEST and press the “Menu” button. Press the “Up/Down” buttons to select the setting and “OK” button to enter and confirm the setting.

MENU	FUNCTION
Mode	Set the mode of the camera Photo: The camera will just take pictures Video: The camera will only record video Photo & Video: The camera will take a photo first then record video Options: 【Photo】 / 【Video】 / 【Photo & Video】
Photo Resolution	Set the photo resolution for your pictures. Options: 【12MP】 / 【8MP】 / 【5MP】 / 【3MP】 / 【1MP】
Photo Series	Sets the number of continuous photos the

	<p>camera can take in photo mode.</p> <p>Options: 【1】 / 【3】 / 【7】</p>

ON MODE

After you have setup your camera and ready to use move the mode switch to ON. The camera will turn on, red LED on the front will flash and the screen will count down from 15 seconds. After 15 seconds the screen will turn black and the LED will

stop flashing.

The camera will begin to operate independently and enter standby mode waiting for an object to be detected by the cameras motion sensor. Once detected, the camera will record photos/videos according to your settings. When the object has left the detection area the camera will return to standby mode waiting for another motion to activate it.

NIGHT MODE

During the night the infrared LEDs (IR LEDs) will turn on automatically (please note there will be a small clicking sound when they do). The LED's will provide necessary light for taking pictures or videos. In night mode the pictures and videos will only be displayed in black and white.

AV OUTPUT

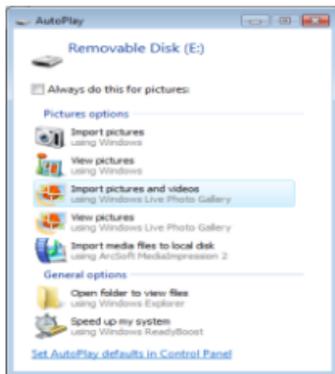

The camera can transfer the video signal to an external monitor or a television. Please follow below instructions to operate.

1. Connect the camera to the TV via provided AV cable.
2. Turn on the TV and set it to AV mode.
3. Turn on the camera; switch the Power button to “Test”.
4. Upon successful connection, the stored images/videos will appear on the TV. The camera screen will switch off.
5. Use the “UP” or DOWN” button to scroll through the recorded photos/videos.
6. Press “OK” to Play
7. Press the “REPLAY” button to stream live images.

CONNECTING TO A COMPUTER

1. Use the supplied USB cable to connect your camera to your computer.
2. After connected to the computer “USB” will appear on the screen of the camera.
3. Once inserted the computer the removable disk icon should be displayed on screen. The following menu should appear on your computer. From here you can Import or view all your files

Files stored on the camera are located in the folder named "DCIM".

4. Copy the photos or files to your computer.

Note: when watching the videos on your computer, please ensure you are using the latest version of your media player.

TROUBLESHOOTING

Problem	Solution
The exposure from the sun makes my images not good.	Place your camera in a North or South facing location this will help to prevent exposure issues from the sun.
Forgotten your Password	Please contact our customer support.
SD card not capturing images/video	Please check that your SD is suitable and format it before using

<p>The video files are very slow and bad resolutions when playing on my computer</p>	<p>Please ensure you have downloaded the latest version of your media player, or try such programs as VLC media player, Windows media, QuickTime.</p>

WARRANTY

OZtrail warrants this product against defects for a period of one year from the date of purchase. OZtrail will repair or replace the product, at its discretion, should a warrantable defect arise within the warranty period. If the exact model is unavailable a model of equivalent nature will be substituted at our discretion. This warranty excludes faults and failures caused by improper use and abuse; fair wear and tear; or failure to follow instructions regarding care and maintenance. Products used for a commercial nature are not covered by this warranty against defects. A warranty may be claimed by returning the product to its place of purchase, with a detailed proof-of-purchase clearly showing the date and detail of the purchase.

You may also contact OZtrail Leisure Products, by phone: 1300 362 921, or in writing: PO Box 1110, Eagle Farm QLD 4009, by email: warranty@oztrail.com.au. The benefits under OZtrail's warranty against defects are in addition to other rights and remedies under law in relation to goods.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

For more detailed information and an explanation of these terms see www.oztrail.com.au/warranty
