

12V LED 2M STRIP EXTENDER (GCL-ALE2-D)

KIT INCLUDES

-2 m LED strip

-1m power cable

-8 x Velcro™ fasteners

USE AND SAFETY INSTRUCTIONS

Unpack the LED Strip Extender. The spool holder for the LED strip should be kept and used to store the LED strip when not in use.

The LED Strip Extender is designed to mix and match with other OZtrail LED Strip Kits and LED Bar kits. Please note a maximum total length of 5m of LED Strip and LED Bar is recommended.

Position the LED strip as required ensuring there are no kinks or tight bends. Secure using the Velcro™ fasteners. Check the power is disconnected from the power source. Now connect the power cable and tighten the connectors fully to ensure a weather-proof seal. Reconnect the power source.

To pack away disconnect the power source. Unscrew connectors and remove Velcro™ fasteners. Roll the LED strip onto the original spool holder to ensure protective storage.

Please note: The LED light strip, cables and connectors are weather-proof rated to IP66, however the on/off dimmer control switch and the 12V plug are not weather proof and should be protected from rain and any form of moisture. Always supervise children using this product and disconnect power when not in use.

CARE INSTRUCTIONS:

Use a damp sponge or cloth to remove marks. Allow to dry thoroughly. Never pack away damp, dirty or wet. Only a qualified electrician can service or repair this item.
