

COMET CAMPSITE LIGHT(GCL-COM-A) - INSTRUCTION TO USE

ASSEMBLY STEPS

1. Unwind the power cord from the base of collapsible pole, ensuring there are no kinks or twists.
2. Slowly extend collapsible pole. Each section will grip by friction. Ensure that the cable runs smoothly through base of pole as the pole extends.
3. Attach Aluminium LED Lamp to end pole via plastic clip and steel loop.
4. Connect the power cord from Aluminium LED Lamp to the power cable at end of pole.
5. Connect 12V cord to a 12V power supply via clamps or using the cigarette style plug.

DISASSEMBLY STEPS

1. Disconnect and remove Aluminium LED Lamp from end of pole.
2. Gently push pole sections downwards to collapse. Simultaneously pull slackening electrical wiring through base hole of pole.
3. Coil excess wiring neatly and secure all items in transit bag.

HINTS & TIPS

- Do not use in windy conditions.
- Do not store wet. Dry thoroughly before storing.
- Do not retract pole by pulling cables directly.
- Do not add additional weight to end of pole.
- 12V use only.
- Do not submerge in water.
