Power over Ethernet Splitter - Get up to 45 W USB-C power and deliver Gigabit speeds to an RJ45 device

Use your existing PoE network connection to charge a USB-C powered device such as a notebook, Macbook Pro®, Ultrabook™ or tablet with this Gigabit Ultra PoE Splitter from Intellinet Network Solutions. Connected via a single RJ45 network cable to an IEEE 802.3bt-compliant PoE injector or PoE switch, this PoE++ Splitter (4PPoE) separates the Ethernet connection from the power coming through the cable and outputs them into separate ports for USB-C Power Delivery (PD) up to 45 W and Gigabit Ethernet. For maximum safety, it offers overload, overcurrent and overheat protection while being backward compatible with IEEE 802.3at and IEEE 802.3af, so the Ultra PoE Splitter can support any PoE connection.

Features:

- Charges a USB-C powered device such as a notebook, Macbook Pro® or tablet from an IEEE 802.3bt/at/af PoE connection
- Delivers Gigabit Ethernet to an RJ45-equipped device
- PoE power budget of 45 W with 60 W power input through IEEE 802.3bt connection
- PoE power budget of 23 W through IEEE 802.3at connection and 12 W through IEEE 802.3af connection
