5. USB Fast Charging Ports
6. HDD Indicator
7. 2.5" HDD Tray
8. Power Switch

Back
1. Gigabit LAN Port
2. DVI Port
3. HDMI Port
4. USB 2.0 Ports
5. DC-In Port
6. USB 3.0 Upstream Port
7. USB 3.0 Ports

Software Installation

Before connecting the Docking Station, install drivers using the provided CD. If your PC/Notebook/Mac does not have a CD drive, go to the link below to download the latest drivers:
www.displaylink.com/support/downloads.php

1. Select Drivers for either Windows or Mac and then double-click the Setup.exe or DisplayLink.dmg
2. Follow the on-screen instructions until the installation is complete. Restart the computer when prompted.
Hardware Installation

Assembling the SATA 2.5" HDD Enclosure
1. Check that the Power Switch is at the **OFF** position.

2. At the bottom of the Docking Base, use a screwdriver to remove the screws from the rear panel of the front drive tray.

3. Slide the drive tray out of the enclosure housing.

4. Insert the 2.5" SATA HDD into the drive tray. Ensure that the screw guides on the left and right side of the HDD are aligned on the drive tray. Fasten the HDD to the drive tray by inserting and tightening the screws.

5. Gently slide the drive tray with HDD back into the housing.

6. Install the rear panel screws back on. Assembly is now complete.

Connecting the Docking Station to a Computer
1. Check that the Power Switch is at the **OFF** position.

2. Insert the main unit to the Docking Base.

3. Using the included USB 3.0 Type A to Type B cable, connect the Type B end into the docking station's USB 3.0 Upstream Port. Connect the Type A end to your computer or laptop.

4. Connect the docking station to a power source using the included power adapter.

5. Connect video cables, audio cables, USB devices or USB charging cables to the docking station.
6. Turn the power switch to **ON** position.

External Monitor Settings: Windows

Option 1: Extend Mode
1. Click the DisplayLink icon in the bottom right corner to open the DisplayLink Manager Menu.

2. Roll the mouse cursor over IOGEAR USB 3.0 Dock to bring up the Manager Menu.

3. Select Extend.

4. The monitor is now extended in the direction it was the last time the display was in this mode. For more control, select Extend To and choose one of the options. This puts the device into Extend Mode, and places it to the Left/Right/Above/Below the main monitor.

2. Click on **Arrangement**.

3. Click the box marked **Mirror Displays**.

Compliance Information

FCC Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential setting. This product generates, uses, and can radiate radio frequency energy and, if not installed and used as directed, it may cause harmful interference to radio communications.

CE Compliance
This device has been tested and found to comply with the following European Union directives: Electromagnetic Capability (2004/108/EC), Low Voltage (2006/95/EC) and R&TTED (1999/5/EC).

IC Statement
Canada, Industry Canada (IC) Notices
Complies with the Canadian ICES-003 Class B specifications.

Declaration of Conformity and related documents can be downloaded directly from our website:
