

# OR6S Outdoor Rock Speaker

Outdoor Simulated Rock Speaker  
 6.5" Dual Voice Coil Woofer  
 Dual .75" Titanium Tweeter  
 Stereo or Mono Input

Make your Garden and Landscape come alive with the most realistic rock speakers on the market!

Our rock speakers are 'heard but not seen' because they resemble real rocks. Even the grill blends in to the rock.

The lifelike OR6 Rock Speakers have built-in designed robust high fidelity sound that is demanded in outdoor environments. They are great around the spa to provide a tranquil setting yet can deliver enough power for your teenager's pool party.

The materials in both the enclosure and the speaker were carefully selected to create a rock that is totally weatherized. It can withstand sun, rain, heat, cold, fog, and coastal dew. In addition, the unit comes with a threaded insert for an eye bolt to deter theft.

The OR6 is a single stereo, stand-alone speaker, with dual voice coils and dual tweeters to deliver both left and right sound from one package. It can also be used in conventional stereo application with two separate speakers. Just hook-up the left side only for single left or right mono sound. No need to stock two separate models. This is one speaker for two applications.

The color choices are Tennessee Granite and California Sandstone.

Electrical connection is made by two or four color coded leads.

With our limited 5 year warranty you are assured years of superior trouble free operation.
