# Beaded Keychain Kit

Natural Beads

1. Choose the beads you would like to use.
2. Use the beads naturally or paint them. Two coats is best. Allow paint to dry before the next step. We used skewers and toothpicks to help with this step.
3. Tie the cord onto the end of the chain and start threading.
4. Don't forget to tie a good sized knot on the end to finish up!
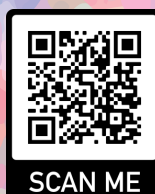

Coloured Beads

1. Choose the beads you would like to use.
2. There's lots of fun choosing different colours and shapes to be had.
3. Tie the cord onto the end of the chain and start threading.
4. Don't forget to tie a good sized knot on the end to finish up!

Tips

If the holes of the beads are a bit blocked due to imperfections, take a toothpick and push it through.
If the cord end becomes frayed, either trim it a little, or dampen the end to bring it together.
Have fun experimenting with different colours, patterns and ways of threading the beads!

Recommended for ages 5 and above.
