<u>Responsibility for Financial Statements</u>

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the unaudited condensed interim consolidated financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed interim consolidated financial statements have been prepared by and are the responsibility of management. These condensed interim consolidated financial statements are presented on the accrual basis of accounting and accordingly, a precise determination of many assets and liabilities is dependent upon future events. Where necessary, management has made informed judgments and estimates in accounting for these assets and liabilities and for transactions which were not complete at the end of the reporting period. Recognizing that the Company is responsible for both the integrity and objectivity of the financial statements, management is satisfied that these unaudited condensed interim consolidated financial statements have been fairly presented.

These unaudited condensed interim consolidated financial statements were approved by the Board of Directors on November 26, 2013. They have not been reviewed by the Company's auditors.

1. Business of the Company

ZTEST Electronics Inc. ("the Company") amalgamated under the laws of Ontario and carries on business at 523 McNicoll Avenue, Toronto, Ontario designing, developing, and assembling printed circuit boards and other electronic equipment. The Company's shares trade on the Canadian Venture Exchange under the symbol "ZTE".

2. Significant Accounting Policies

Statement of compliance

The Company has prepared these unaudited condensed interim financial statements in accordance with IAS 34, *Interim Financial Reporting*, employing all of the same accounting policies and methods of computation, except as noted under changes in accounting policies, as disclosed in the annual financial statements as at June 30, 2013.

The notes to these unaudited condensed interim consolidated financial statements are intended to provide a description of events and transactions that are significant to an understanding to the changes in the Company's financial position and performance since June 30, 2013. Certain disclosures that appear in the annual financial statements have not been reproduced in these unaudited condensed interim consolidated financial statements and, in this regard only, these unaudited condensed interim financial statements do not conform in all respects to the requirements of IFRS for annual consolidated financial statements. Accordingly, these unaudited condensed interim consolidated financial statements should only be read in conjunction with the annual financial statements as at June 30, 2013.

These unaudited condensed interim consolidated financial statements were authorized for issuance by the Board of Directors of the Company on November 27, 2013.

Basis of presentation and going concern considerations

These unaudited condensed interim consolidated financial statements have been compiled by management on a historical cost basis using the accrual basis of accounting, except for cash flow information, and in accordance with IFRS applicable to a "going concern". The Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and its ability to generate positive cash flow from operations. If the going concern assumption were not appropriate for these condensed interim consolidated financial statements then adjustments would be necessary in the carrying values of assets and liabilities, the reported revenues and expenses, and the statement of financial position classifications used.

Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company as well as the following subsidiaries' assets and liabilities and the revenues and expenses arising, subsequent to the date of acquisition:

Permatech Electronics Corporation	- 100% owned
Northern Cross Minerals Inc.	- 66.7%owned (inactive)

Changes in accounting policies

Each of the following was adopted July 1, 2013 without impact upon the amounts or disclosures presented in these unaudited condensed interim consolidated financial statements.

IFRS 10, *Consolidated Financial Statements*, replaces the consolidation guidance in IAS 27, *Consolidated and Separate Financial Statements*, and SIC-12, *Consolidation — Special Purpose Entities*, by introducing a single consolidation model for all entities based on control, irrespective of the nature of the investee.

IFRS 13, *Fair Value Measurement*, replaces the guidance on fair value measurement in existing IFRS accounting literature with a single standard. It defines and provides guidance on determining fair value and requires disclosures about fair value measurements, but does not change the requirements regarding which items are measured or disclosed at fair value.

IAS 28, *Investments in Associates and Joint Ventures*, amended in 2011, effective for annual periods beginning on or after January 1, 2013 prescribes the accounting for investments in associates and establishes the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

(Stated in Canadian Dollars)

2. Significant Accounting Policies - continued

Significant accounting judgments and estimates

The preparation of these unaudited condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These unaudited condensed interim consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the unaudited condensed interim consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Impairment of non-financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its non-financial assets with finite lives to determine whether there is any indication that those assets have suffered an impairment loss. Where such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. The recoverable amount is the higher of an asset’s fair value less cost to sell or its value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm’s length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the income for the period.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in income for the period.

The Company has assessed the assets of all its operating entities and has determined that there is no impairment of its non-financial assets.

Accounting standards effective for future periods

IFRS 9, *Financial Instruments: Classification and Measurement*, issued in December 2009, effective for annual periods beginning on or after January 1, 2015, with early adoption permitted, introduces new requirements for the classification and measurement of financial instruments. Management anticipates that this standard will be adopted in the Company's financial statements for the year beginning July 1, 2015 and has not yet considered the potential impact of its adoption.

6. Commitments

Bank operating loan
The Company has a $250,000 line of credit with its financial institution from which nothing was drawn as at September 30, 2013 or June 30, 2013. The loan bears interest at the prime lending rate plus 0.5%, is due upon demand, is subject to renewal May 2014, and is secured by a $250,000 term deposit and a general security agreement covering the assets of PEC. The term deposit bears interest at 1.25% and matured October 21, 2013 at which time the principal was reinvested at 1.25% until January 19, 2014.

Operating leases
The Company leases its operating facility under a lease that is due to expire March 31, 2021. A lease deposit in the amount of $35,000 has been paid and will be at the end of the lease. Minimum monthly rental payments ranging from $7,319 to $8,979 are required over the remaining term of the lease.

7. Share Capital - continued

(d) Details of options outstanding are as follows - continued:

The following weighted average assumptions were used to calculate the fair value of the stock options granted during the period:

	Sept 30 2013	June 30 2013
Dividend yield	**None issued**	Nil
Risk free interest rate (%)	**None issued**	1.34 – 1.40
Expected stock volatility (%)	**None issued**	106.53 – 107.26
Expected life (years)	**None issued**	5

(e) Share based payment transactions and contributed surplus

The Company has a stock option plan. The aggregate number of common shares reserved for issuance under this plan cannot exceed 20% of the aggregate number of common shares of the Company that are issued and outstanding. The Company has granted options for the purchase of common shares to employees, directors, officers and other service providers. The fair values of stock options granted have been determined using the Black-Scholes model and are added to contributed surplus as follows:

	Sept 30 2013	June 30 2013
Contributed surplus, beginning of period	**$ 569,452**	$ 485,451
Dividends of PEC derecognized	**-**	4,864
Conversion of Class A shares to common shares	**-**	91,049

Stock options exercised	**(5,338)**	(54,030)
Contributed surplus, end of period	**$ 564,114**	$ 569,452

8. Related Party Transactions

In addition to key management personnel, the following related party had transactions with the Company during the year and outstanding balances *(note 5)* at the end of the year:

1114377 Ontario Inc. ("1114377")

A company controlled by the spouse of a Director of the Company.

All expenses and period end balances with related parties are at exchange amounts established and agreed to by the related parties. All transactions with related parties are in the normal course of operations and have been carried out on the same terms as those accorded to unrelated parties.

Description	**Sept 30 2013**	Sept 30 2012
Employee and consultant compensation [1]	**$ 83,474**	$ 81,300
Professional fees [1]	**4,122**	9,426

[1] Transactions with key management personnel. As at September 30, 2013 there was a balance of $29,444 (June 30, 2013 - $28,694) payable to key management personnel and included in accounts payable and accrued liabilities.

9. Income Taxes

Unrecognized Deferred Tax Assets

Deferred income taxes are provided as a result of temporary differences that arise due to the differences between the income tax values and the carrying amount of assets and liabilities. Deferred income tax assets have not been recognized in respect of the following deductible temporary differences:

		Sept 30 2013		June 30 2013
Share issuance costs	$	**38,690**	$	38,690
Intangible assets		**43,280**		43,280
Property, plant and equipment		**268,949**		237,640
Resource related expenditures		**349,050**		349,050
Scientific research and experimental development		**1,050,618**		1,050,618
Net capital loss carry forwards		**2,280,030**		2,280,030
Non-capital loss carry forwards		**15,592,989**		15,592,989

Share issue costs expire from 2014 to 2017. The non-capital loss carry forwards expire from 2027 to 2032. The net capital loss carry forwards may be carried forward indefinitely, but can only be used to reduce capital gains. The remaining deductible temporary differences may be carried forward indefinitely. Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the group can utilize the benefits therefrom.

10. Financial risk factors

The Company is exposed in varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is in its accounts receivable. In an effort to mitigate this risk, management actively manages and monitors its receivables and obtains pre-payments where warranted. Bad debt experience has not been significant and it has been determined that no allowance is required as all amounts outstanding are considered collectible.

Concentration of credit risk

Concentration of credit risk arises when a significant portion of the financial assets subject to credit risk arise from a single or limited number of sources. During the current period, one of the Company's customers accounted for more than 20% (36%) of total revenue (2012 –43%). Amounts due from this customer accounted for 26% of the Company's accounts receivable at September 30, 2013 (June 30, 2013 - 24%). The loss of this customer or significant curtailment of purchases by such customer could have a material adverse effect on the Company's results of operations and financial condition. The Company monitors the relationship with this customer closely and ensures that every customer is subject to the same risk management criteria.

Liquidity risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company has reported a working capital deficiency of $106,687 (June 30, 2013 - $196,064). This includes financial liabilities (a specific long-term debt instrument plus preferred shares and dividends payable) with an aggregate carrying amount of $776,792 (June 30, 2013 - $776,792) which are past due and for which the timing of future cash flows are undetermined. The Company manages its liquidity risk through the management of its capital *(note 11)* which incorporates the continuous monitoring of actual and projected cash flows to ensure that it has sufficient liquidity to meet its operating commitments without incurring unacceptable losses or risking damage to the Company's reputation.

Market risks

The Company is exposed to currency risk related to accounts receivable and accounts payable denominated in US dollars and the potential for future cash flows to fluctuate because of changes in foreign exchange rates. Currency risk is closely monitored but not actively managed. The Company has reported a foreign exchange loss of $3,337 (2012 – $7,905).

10. Financial risk factors - continued

Sensitivity to market risks

At June 30, 2013 the Company had US$225,564 (June 30, 2013 –US$131,220) included in accounts receivable. A 5% increase in the value of the Canadian dollar relative to the US dollar would result in a reduction of $11,673 in future cash inflow.

At June 30, 2013 the Company had US$150,464 (June 30, 2013 – US$186,818) included in accounts payable. A 5% decrease in the value of the Canadian dollar relative to the US dollar would result in an increase of $7,786 in future cash outflow.

The existence of both accounts receivable and accounts payable denominated in US$ does not serve as a hedge with respect to currency risk.

Based upon observations of recent market trends management believes that each of these outcomes is possible but most likely exceed the Company's immediate market risk exposures.

11. Capital disclosures

The Company's objective when managing capital is to ensure its ability to meet operating commitments as they become due and to provide return for shareholders. This is achieved primarily by continuously monitoring its actual and projected cash flows and making adjustments to capital as necessary. Except for meeting the repayment terms, as may exist from time to time, associated with the long-term debt instruments, there are no externally imposed capital requirements.

Management includes the following items in its definition of capital:

		Sept 30 2013		June 30 2013
Long-term debt [1]	**$**	**114,810**	$	123,297
Share Capital		**22,343,053**		22,330,215
Warrants		**76,677**		76,677
Contributed surplus		**564,114**		569,452
Deficit		**(22,495,965)**		(22,559,823)
Net capital under management	**$**	**602,689**	$	539,818

[1] Excludes long-term debts that are both secured by specific equipment and due to unrelated parties.

12. Selling, general and administrative expenses

Selling, general and administrative expenses are comprised of the following amounts:

		Sept 30 2013		Sept 30 2012
Employee and consultant compensation *(note 8)*	**$**	**245,352**	$	201,796
