Ford 6.4L POWERSTROKE 2007.5 - 2009

1. Using the velcro / zip ties supplied in the box, mount your DIABLOSPORT Extreme PowerPuck in a suitable location. DIABLOSPORT recommends locating the relay center and fuse box witch can be found in front of the battery on the driver side of the engine.

2. On the passenger side of the engine you will find your vehicles valve cover. Below the valve cover you will find a 15 pin plug which incorporates both power wires and fuel sensor signal.

3. Disconnect the factory 15 pin plug and connect the DIABLOSPORT 15 pin harness.
4. Run the Diablo Dial wire through your vehicles firewall directly to the Extreme PowerPuck.
5. Mount the Diablo Dial in a convenient location in the cab of your vehicle, witch can be accessible by the driver.
6. Reconnect your battery and you may now turn your vehicle on
