1 Restore kit, gold squeeze

1 Pre-filter

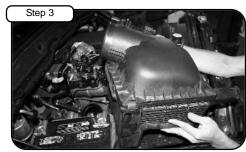

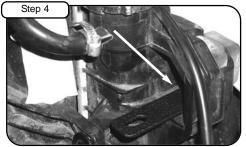

Complete Stock Intake.

With 5/16" nut driver loosen clamps on OE tube at turbo/air box and remove. (6.7L remove crank case line with pliers and save OE plastic fitting for later install)

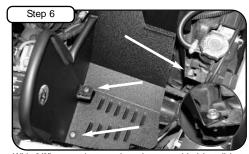

Disconnect air temp sensor. ( 6.7L, disconnect MAF sensor ). Lift up and pull OE air box out of vehicle.

With 10mm socket, loosen bolt holding in radiator housing, install bracket "D" and re-tighten bolt.

Install 3/4" Trim seal to housing. Now install housing into

With 3/8" screws/nuts and washers provided install bottom of housing to factory position. Tighten using 9/16" wrench or socket. Use M6 screw/nut and washer and tighten housing to bracket "D" from Step 4 and tighten.

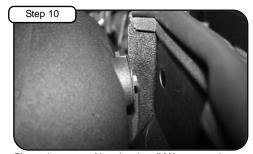

With T-20 torx bit remove temp sensor and (with gasket and screws provided) install into new tube. (5.9L place MAF cover with gasket and tighten using short screws provided.) Install plug into the hole in tube for crank case line.

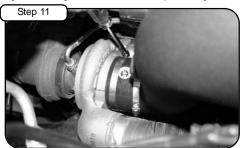

(6.7L remove and install temp sensor, see step 7 ) 6.7L, remove MAF sensor and install to new tube with screws and gasket (Make sure gasket is between sensor and tube) Install grommet only to tube. The 6.7L will not use small phillips screws.

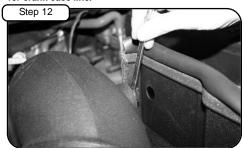

Install hi-temp coupler with clamps provided to tube. Now install tube into vehicle.

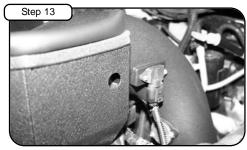

Place tube on top of housing. Install M6 screw and washer through housing to tube. Do not tighten!

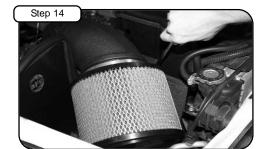

Tighten clamps using 5/16" nut driver. (6.7L, install OE crank case line from step 2 in to new tube)

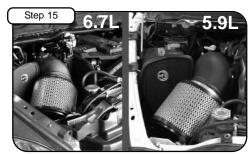

Now tighten screw using 10mm socket or wrench.

Reconnect all sensor harnesses.

Install air filter and tighten using 5/16" nut driver.

Place the included CARB EO Sticker on or near the intake system on a smooth, clean surface. E.O. identification label is required in passing the Smog Check Inspection. Your installation is now complete. Please check all bolts and clamps perodically. Re-tighten if necessary. Thank you for choosing aFe!
