

riderite.com

INSTALLATION INSTRUCTIONS

Firestone

*World's Number 1
Air Spring.*

FIRESTONE INDUSTRIAL PRODUCTS COMPANY

! IMPORTANT

PLEASE DON'T HURT YOURSELF, YOUR KIT OR YOUR VEHICLE. TAKE A MINUTE TO READ THIS IMPORTANT INFORMATION.

This kit is to be used on a **pickup truck only**, and **DOES NOT INCREASE YOUR VEHICLE'S MAXIMUM LOAD**.

SAFE INSTALLATION

Please take all safety precautions during installation. A hydraulic jack can fail, and if that happens, you can be seriously hurt, or worse, if you are relying on it to hold up the vehicle. If you use a hydraulic jack, secure jack stands in the appropriate locations and chock any tires still touching the ground.

Wear safety glasses or goggles. Your eyes may be lower than some parts and pieces, and you don't want to lose an eye.

Remove the possibility of any electrical issues by disconnecting the negative battery cable.

KIT CLEARANCE

There must be a minimum of 1/2" clearance around all installed components when the Air Springs are inflated and under a load. The Air Springs must flex and expand during operation, so the clearance keeps the kit from rubbing against parts of the vehicle.

VEHICLE GVWR

NEVER exceed the maximum load recommended by the vehicle manufacturer (GVWR). The GVWR can be found in your vehicle's owner's manual or on the data plate on the driver's side door. Consult your local dealership for additional GVWR specifications.

INFLATING THE AIR SPRINGS

When inflating Air Springs, add air pressure in small quantities, checking air pressure frequently. The Air Springs have much less air volume than a tire, so they inflate much more quickly.

PRESSURE TO LOAD

The Air Springs will support approximately 50 lbs. of load for each PSI of inflation pressure (per pair). For example, 50 PSI of inflation pressure will support a load of 2500 lbs. per pair of Air Springs.

APPROPRIATE AIR PRESSURE

For best ride, use only enough air pressure in the Air Springs to level the vehicle when viewed from the side (front to rear). This will vary, depending on the load, location of the load, condition of the existing suspension, and personal preference.

NYLOCK NUTS

Using an impact gun is **NOT** recommended when fastening Nylock Nuts. Doing so may result in the nylon insert overheating, causing it to loosen over time.

OPTIONAL T-FITTING

This kit includes Inflation Valves and Air Line Tube for each Air Spring, allowing you to compensate for unbalanced loads. If you prefer a single Inflation Valve system to provide equal pressure to both Air Springs, your dealer can supply the optional "T" fitting (Part # 3025 or WRI-760-3461 retail pack).

ONCE INSTALLED SUCCESSFULLY, FOLLOW THESE PRESSURE REQUIREMENTS FOR THE AIR SPRINGS:

PARTS

Compare the parts below to your kit. Assure you have all pieces, and organize them for an easier installation.

MAIN KIT CONTENTS

PART # 8401	 x2 AIR SPRING	PART # 5828	 x2 LOWER BRACKET	PART # 1004	 x1 HEAT SHIELD
PART # 5849	 x2 UPPER BRACKET	PART # 9153	 x1 AIR LINE TUBE (30 FEET)		
PART # 5433	 x2 AXLE STRAP BRACKET	PART # 3429	 x2 BAIL CLAMP		

A24-760-7560 INFLATION VALVE BRACKET KIT

PART # 9483	 x1 NO-DRILL INFLATION VALVE BRACKET	PART # 9488	 x2 LARGE NYLON TIE
-------------	--	-------------	--

A21-760-2702 HARDWARE PACK

PART # 3032	 x2 INFLATION VALVE AND VALVE CAP ASSEMBLY	PART # 3033	 x4 5/16" FLAT WASHER	PART # 9168	 x10 BLACK NYLON TIE
PART # 3142	 x2 3/8" - 16 x 5/8" FLAT HEAD BOLT	PART # 3046	 x2 AIR FITTING	PART # 5852	 x2 U-BOLT
PART # 3485	 x2 3/4" - 16 HEX NUT	PART # 3493	 x12 (Use as necessary with 3/8" Nylock Nuts)	PART # 5851	 x2 SPREADER BAR
PART # 3488	 x12 3/8" - 16 NYLOCK NUT	PART # 3484	 x4 3/8" - 16 x 7" CARRIAGE BOLT		
PART # 3064	 x2 3/4" INTERNAL TOOTH LOCK WASHER	PART # 0899	 x2 THERMAL SLEEVE		

CONTENTS AND OVERVIEW

PAGE 4 REMOVE EXISTING JOUNCE BUMPER

PAGE 5 FASTEN UPPER BRACKET TO JOUNCE BUMPER CUP INSERT

PAGE 5 INSTALL AIR SPRING TO LOWER BRACKET

PAGE 6 INSTALL AIR SPRING ASSEMBLY TO UPPER BRACKET

PAGE 7 SECURE LOWER BRACKET BAIL CLAMP

PAGE 8 SECURE LOWER BRACKET & AXLE BRACKET STRAP

PAGE 9 INSTALL RIGHT SIDE WITH HEAT SHIELD

PAGE 10 AIR LINE TUBE & INFLATION VALVE INSTALLATION

PAGE 11 INSTALL & ROUTE AIR LINE TUBE

PAGE 12 CHECKING THE SYSTEM

PAGE 13 FIXING AN AIR LEAK

PAGE 14 FINISHING THE INSTALLATION

START THE INSTALLATION ON THE LEFT SIDE OF THE VEHICLE WHEN FACING FORWARD.

Unfasten and remove existing jounce bumper from the vehicle.

NOTE: The metal bumper cup stays on the truck!

2

FASTEN UPPER BRACKET TO JOUNCE BUMPER CUP INSERT

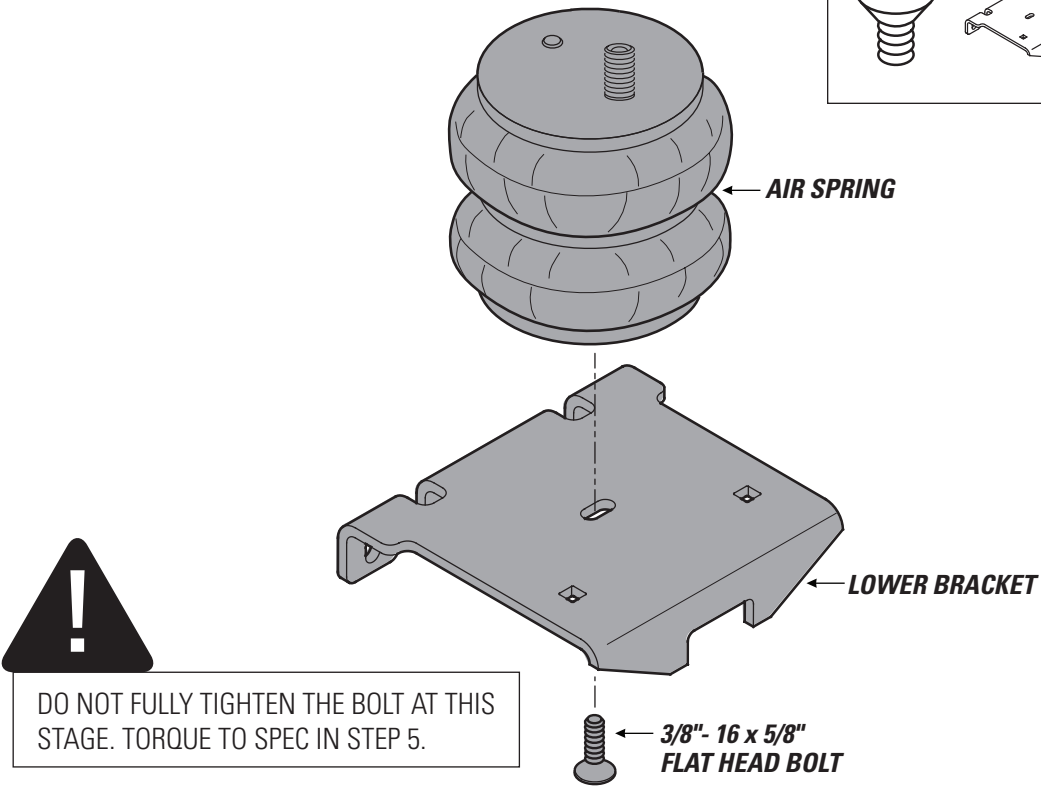

IMPORTANT NOTE:
On some vehicles, the U-Bolt may extend past the end of the flange nut farther than necessary.

It is the installer's responsibility to check for interference with the leaf spring and to trim the U-bolt as required.

3

INSTALL AIR SPRING TO LOWER BRACKET

INSTALLING THE RIGHT SIDE? REMEMBER STEP 9 FIRST!

1 Follow guidelines below to dry fit assembly. Make alignment marks as shown.

2 Remove assembly and match alignment marks you made.

3 Tighten 3/8"-16 x 5/8" Flat Head bolt to 15-20 ft lbs.

4 Install assembly and follow the guidelines.

VIEW FROM BELOW

ROTATE ASSEMBLY TO USE FRONT **OR** BACK ALIGNMENT HOLE

UPPER BRACKET

ALIGNMENT PIN ON AIR SPRINGS MUST BE INSTALLED TO FULLY SEAT INTO ONE OF THE ALIGNMENT HOLES IN THE UPPER BRACKET. FAILURE TO DO SO WILL CAUSE IT TO BE PUSHED INTO THE BEAD PLATE, CREATING AN AIR LEAK, AND RESULTING IN AN AIR SPRING FAILURE THAT IS **NOT WARRANTABLE. THE ALIGNMENT PIN CANNOT HOLD 2,500 LBS! IT IS USED FOR ALIGNMENT ONLY!**

3/8\"/>

5

SECURE LOWER BRACKET BAIL CLAMP

USE YOUR HAND TO CHECK FOR THE PROPER CLEARANCE AROUND THE AIR SPRING. IF YOUR HAND DOES NOT FIT BETWEEN THE AIR SPRING AND OTHER COMPONENTS, IT WILL RUB!

FROM THIS VIEW, THE AIR SPRING SHOULD BE STRAIGHT FROM SIDE TO SIDE.

LEFT SIDE VIEW FROM REAR

LEFT SIDE VIEW FROM REAR

FROM THIS VIEW, THE AIR SPRING SHOULD BE STRAIGHT FROM SIDE TO SIDE.

7

INSTALL RIGHT SIDE WITH HEAT SHIELD

AWESOME! You're done with the left side. The right side installation is the same, with the addition of this step. Go complete Steps 2-4 for the right side, then complete this step before continuing to Step 5.

RIGHT SIDE INSTALLATION MUST INCLUDE HEAT SHIELD!

IF USING THE OPTIONAL NO-DRILL INFLATION VALVE BRACKET, CHOOSE OPTION 1. IF DRILLING, CHOOSE OPTION 2. **INFLATION VALVES MUST BE ACCESSIBLE BY AN AIR CHUCK.**

1 Secure the Air Inflation Valve Bracket to a protected, secure location. **PROCEED TO STEP 3.**

2 Select a protected location to install the Inflation Valves, such as the bumper or the body of the vehicle.

Drill two 5/16" holes for Inflation Valve install locations.

3 Install Inflation Valve assembly as shown.

1 Match Air Line Tube ends.

2 Find center of Air Line Tube, make a square cut with tube cutter or sharp utility knife.

DO

Make sure the cut is as square as possible. Use a tube cutter or sharp utility knife.

DON'T

Fold or kink the Air Line Tube. Cut the Air Line Tube at an angle. Use pliers, scissors, snips, saws, or side cutters.

PROPER AND IMPROPER CUTS IN THE AIR LINE TUBE

11

INSTALLING AIR LINE TUBE INTO AIR FITTINGS AND INFLATION VALVE

1 Insert end of Air Line Tube into Air Fitting.

2 Push Air Line Tube into Air Fitting as far as possible.

3 Gently pull on the Air Line Tube to check for a secure fit.

4 To remove, push down collar and gently pull Air Line Tube away.

Removal Tip: Use a 1/4", 5/16", or 6mm open-ended wrench to push the collar down.

12

ROUTE AND SECURE AIR LINE TUBES

Air Line Tube routes will vary, depending on your truck, and requires you to choose the best path from the Air Springs to the Inflation Valves. Use the instructions below to help you choose.

DO

Select routes protected from heat, debris, and sharp edges. Use Thermal Shields near heat sources. Use Nylon Ties to secure the Air Line Tube.

DON'T

Bend or sharply curve Air Line Tubes. Leave Air Line Tube exposed to sharp edges. Use unnecessary lengths of Air Line Tube. Route Air Line Tube near moving parts. Let Air Line tube hang unsecured from vehicle. Scar Air Line Tube while routing.

AIR LINE TUBE THERMAL SHIELD

USE SUPPLIED THERMAL SHIELDS WHEN AIR LINE TUBE RUNS **WITHIN 6 INCHES** OF HEAT SOURCES.

- 1** Place an air chuck onto the Inflation Valve and fill the system to **70 PSI**.

AIR SPRINGS INFLATE QUICKLY. CHECK AIR PRESSURE WHILE INFLATING.

- 2** Spray fittings with soap and water mixture.

- 3** Observe bubbles.

**SMALL SOAP BUBBLES
THAT DO NOT EXPAND**

**SOAP BUBBLES
THAT EXPAND**

NO LEAKS?

Congratulations! Continue to Step 15 to finish installation. Review the Operating Instructions.

LEAK?

Bummer. Continue to Step 14 to fix the leak.

14

FIXING AN AIR LEAK

- 1 Press the air valve on end of Inflation Valve to release all air pressure.

EXHAUST ALL AIR FROM THE SYSTEM PRIOR TO RELEASING AIR LINE TUBES FROM AIR FITTINGS.

LEAK AT AIR LINE TUBE AND AIR FITTING

Release Air Line Tube (see page 11). Review proper cuts and procedures in Step 10. Repeat Steps 11 and 13.

LEAK AT BASE OF AIR FITTING ON AIR SPRING

Tighten Air Fitting one turn or until leak stops.

LEAK OUT OF THE VALVE CORE ON INFLATION VALVE

Tighten valve core with valve core wrench on Inflation Valve Cap.

STILL HAVE A LEAK?

Refer to the Troubleshooting section of the Instruction Manual. If the leak persists, or if there is an issue with a leaking part, call 1-800-888-0650; Option 1; Option 1 for Tech Support.

SAFELY RETURN VEHICLE TO OPERATIVE STATE

If you removed any wheels during installation, install the wheels and torque the lug nuts to the manufacturer's specifications.

Safely remove any jack stands and wheel chocks used during installation.

Re-attach the negative battery cable.

DOUBLE-CHECK AIR SPRING CLEARANCE

Check the Air Springs once again for the proper 1/2" minimum clearance. Perform clearance check again when vehicle is under load.

VEHICLE GVWR

NEVER exceed the maximum load recommended by the vehicle manufacturer (GVWR). The GVWR can be found in your vehicle's owner's manual or on the data plate on the driver's side door. Consult your local dealership for additional GVWR specifications.

READ AND UNDERSTAND THE OPERATING INSTRUCTIONS

The Ride-Rite system can improve handling and comfort. Take the time to learn how to properly use and maintain your investment by reading the Operating Instructions.

USE YOUR HAND TO CHECK FOR THE PROPER CLEARANCE AROUND THE AIR SPRING. IF YOUR HAND DOES NOT FIT BETWEEN THE AIR SPRING AND OTHER COMPONENTS, IT WILL RUB!

! IMPORTANT

A MINIMUM OF 5 PSI MUST BE MAINTAINED IN THE AIR SPRINGS AT ALL TIMES

Too much air pressure in the Air Springs will result in a firmer ride, while too little air pressure will allow the Air Springs to bottom out over rough conditions, and will not provide the improvement in handling that is possible.

MINIMUM PRESSURE

MAXIMUM PRESSURE (LOADED)

riderite.com

BEFORE YOU DRIVE, CONFIRM THE FOLLOWING:

- Do you have a minimum of 5PSI in your Air Springs?
- Are your Air Springs standing 5 1/2" - 6 1/2" tall?
- Are your Air Springs properly aligned, left-to-right and front-to-back?
- Are your nuts and bolts tight?
- Put your paper work back into the sleeve and keep it in your glove compartment for future reference.
- You've been bagged...and now your suspension is Airide equipped! Show it off with the supplied decal!

5 1/2" - 6 1/2"
