# Life is short. A dog's life is even shorter. Get outside and make a lifetime of memories.

This has been our mantra from the first moment our founders decided they just couldn't leave their rescue dog at home to miss all the fun while they took a bike ride. After buying and trying dozens of pet carriers and finding that none performed exactly as they hoped, they got to work building one. And while we'd like to say "the rest is history," that couldn't be further from the truth. This product and this company have been a labor of love, built one strap, one buckle, and one zipper at a time.

Yes, the K9 Sport Sack started with little more than an idea: a way to spend time with your dog beyond a typical walk around the block. But over the years, that idea morphed, shifted, and grew into an innovative, adventurous, and fun-filled company full of like-minded pet people with a passion for making life-changing pet products. We aren't business people with our eyes down, scrutinizing the bottom line; we are dog parents with our eyes up, searching for the next memory to be made. Hiking, biking, skating, skiing, wandering, whatever you love to do, we believe your dog should be able to do it too.

As the creators of the original  
forward-facing backpack dog  
carrier, we care as much  
as you do about your  
dog and the memories  
you'll make together.

We're K9 Sport Sack.

# TRAINER

For dogs ranging 4-30 lbs | 2-13 kg

## XX-Large

26-29 in | 66-74 cm

Helping customers choose the right size carrier for their dog is essential to the K9 Sport Sack Experience! Each dog and breed are very different and that's why our products are sized based on the length of the dogs back, measuring from collar to tail, around the dog's body.

Inside the bag, dogs are sitting in the begging position with their hind legs and bottom on the base and their front legs resting on your shoulders. Lumbar support straps and a collar enclosure are buckeled and pulled tight to fit the bag securely around the dog's body and neck.

# GETTING YOUR DOG ON!

Like any kind of dog training, getting your dog in a carrier takes practice, a quiet distraction free setting, and possibly some treats as an incentive!

Our carriers are created to fit a variety of dogs, so it is essential to buckle and cinch each strap around the body and collar of the dog.

We recommend having a friend help lift the carrier while you slide the carrier on and pull down on both shoulder straps to lift the bag up.
