7100

MULTIFUNCTION SKINCARE SYSTEM

CORE DESIGN CONCEPT

Designed to support to a full spa service menu in one complete package, the PARAGON 7100 Multifunction Skincare System is one of the most sought-after professional system available today. Built tough to withstand the punishing environment of cosmetology schools, the PARAGON 7100 is also home at a high-end private practice and will be your dependable partner as you develop your spa practice and business.

9 ESSENTIAL FUNCTIONS

1 Facial Vaporizer

The professional-grade P1 Facial Vaporizer produces high volume of concentrated, sustained steam for thirty-minutes treatment periods.

2 Magnifying Treatment Lamp

The distortion-free, oversized 5-Diopter round lens provides the estheticians with the large viewing area while providing evenly-distributed light.

3 Rotary Brush

The modular Rotary Brush System is used when sloughing dead skin cells and removing impurities that cling to the skin's outermost surface.

4 High-Frequency

The modular High-Frequency System generates a warm thermal current that stimulates and aids in sterilization.

5 Vacuum

The modular Vacuum System removes embedded dirt, sebum and other impurities while providing a deep penetrating massage.

6 Spray

Integrated with the modular Vacuum System, the Spray System applies a refreshing mist of water or toner after completing the vacuum treatment.

7 Disincrustation

Disincrustation facilitates deep pore cleansing by a chemical process known as saponification.

8 Iontophoresis

Iontophoresis introduces water-soluble products deep into the skin.

9 Wood's Lamp

The Wood's Lamp reveals areas of depigmentation, sun damage, and skin disease not visible to the eye using special Ultra Violet light.

COMPARISON

The new PARAGON **7100** Multifunction Skincare Systems and its predecessor, the PARAGON 7000, both share a familiar look, functions, and footprint that spa professionals and their customers have been acquainted with and come to expect. The new PARAGON **7100** has been updated with a modern console design, intuitive layout, and LED function-indicators. Included functions include: facial vaporizer, 5-diopter magnifying treatment lamp, rotary brush, high frequency, vacuum, spray, disincrustation, iontophoresis, and wood's lamp.
