

Paragon S20 Ultra Violet (UV) Sanitizing Cabinet

The S20 UV Sanitizer Cabinet is specifically engineered to help prevent the spread of bacteria and infection by disinfecting most spa and nail implements using a powerful, chemical-free Ultra Violet (UV) light that kills germs and bacteria on exposed surfaces. Simple one-touch operation, each UV sanitizing cabinet comes complete with instrument/towel wire rack and long-lasting UV bulbs from Japan.

UV cabinets should be used as a supplement to and in conjunction with standard sterilization techniques as mandated and required by your local jurisdiction.

Model

Model Description	UV Sanitizing Cabinet
Manufacturer	Garfield
Model Number	S20

Specifications
