| Health Information         | : | 877-504-9351                                                          |  |

## 2. COMPOSITION/INFORMATION ON INGREDIENTS

Synthetic base oil and additives. The highly refined mineral oil is only present as additive diluent.

#### 3. HAZARDS IDENTIFICATION

| Appearance and Odour                                      | <ul> <li>Emergency Overview</li> <li>Liquid at room temperature. Clear, bright liquid. Slight hydrocarbon.</li> </ul>                                                                       |
|-----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Health Hazards<br>Safety Hazards<br>Environmental Hazards | <ul> <li>Not classified as dangerous for supply or conveyance.</li> <li>Not classified as flammable but will burn.</li> <li>Not classified as dangerous for the environment.</li> </ul>     |
| Health Hazards                                            | : Not expected to be a health hazard when used under normal conditions.                                                                                                                     |
| Health Hazards<br>Inhalation                              | : Under normal conditions of use, this is not expected to be a primary route of exposure.                                                                                                   |
| Skin Contact                                              | <ul> <li>Prolonged or repeated skin contact without proper cleaning can<br/>clog the pores of the skin resulting in disorders such as oil<br/>acne/folliculitis.</li> </ul>                 |
| Eye Contact                                               | : May cause slight irritation to eyes.                                                                                                                                                      |
| Ingestion                                                 | : Low toxicity if swallowed.                                                                                                                                                                |
| Other Information                                         | : Used oil may contain harmful impurities.                                                                                                                                                  |
| Signs and Symptoms                                        | : Oil acne/folliculitis signs and symptoms may include formation<br>of black pustules and spots on the skin of exposed areas.<br>Ingestion may result in nausea, vomiting and/or diarrhoea. |
| Aggravated Medical<br>Conditions                          | <ul> <li>Pre-existing medical conditions of the following organ(s) or<br/>organ system(s) may be aggravated by exposure to this<br/>material: Skin.</li> </ul>                              |
|                                                           | 1/8                                                                                                                                                                                         |
|                                                           |                                                                                                                                                                                             |

Quaker State Defy 5W-20 Synthetic Blend Motor Oil (SL) MSDS# 23543 Version 1.0 Effective Date 12/28/2011 According to OSHA Hazard Communication Standard, 29 CFR **Material Safety Data Sheet** 1910.1200 **Environmental Hazards** : Not classified as dangerous for the environment. Under normal conditions of use or in a foreseeable emergency, Additional Information this product does not meet the definition of a hazardous chemical when evaluated according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200. 4. FIRST AID MEASURES **General Information** Not expected to be a health hazard when used under normal • conditions. No treatment necessary under normal conditions of use. If Inhalation symptoms persist, obtain medical advice. **Skin Contact** : Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention. Flush eye with copious quantities of water. If persistent **Eye Contact** irritation occurs, obtain medical attention. Ingestion In general no treatment is necessary unless large quantities are swallowed, however, get medical advice. Treat symptomatically.

#### 5. FIRE FIGHTING MEASURES

Advice to Physician

Clear fire area of all non-emergency personnel.

| Flash point<br>Upper / lower<br>Flammability or<br>Explosion limits |   | > 230 °C / 446 °F (COC)<br>Typical 1 - 10 %(V)                                                                                                                                                    |

Avoid accidents, clean up immediately.<br>Prevent from spreading by making a barrier with sand, earth or<br>other containment material. Reclaim liquid directly or in an<br>absorbent. Soak up residue with an absorbent such as clay,                                                                                                                                           |  |
| Additional Advice                                                                                      | sand or other suitable material and dispose of properly.<br>Local authorities should be advised if significant spillages<br>cannot be contained.                                                                                                                                                                                                                                                      |  |
| 7. HANDLING AND STORAGE                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| General Precautions                                                                                    | Use local exhaust ventilation if there is risk of inhalation of<br>vapours, mists or aerosols. Properly dispose of any<br>contaminated rags or cleaning materials in order to prevent<br>fires. Use the information in this data sheet as input to a risk<br>assessment of local circumstances to help determine<br>appropriate controls for safe handling, storage and disposal of<br>this material. |  |
| Handling                                                                                               | Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used.                                                                                                                                                                                                       |  |
| Storage                                                                                                | Keep container tightly closed and in a cool, well-ventilated<br>place. Use properly labelled and closeable containers. Store at<br>ambient temperature.                                                                                                                                                                                                                                               |  |
| Recommended Materials                                                                                  | For containers or container linings, use mild steel or high density polyethylene.                                                                                                                                                                                                                                                                                                                     |  |
| Unsuitable Materials<br>Additional Information                                                         | PVC. PVC. Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion.                                                                                                                                                                                                                                                                                  |  |

| Oil mist,<br>mineral | OSHA Z1     | (Mist.)                      |     |         | Listed.  |

#### Additional Information

: Shell has adopted as Interim Standards the OSHA Z1A values that were established in 1989 and later rescinded.

# Material Safety Data Sheet

# Biological Exposure Index (BEI) - See reference for full details

No biological limit allocated.

| Exposure Controls                  | : | The level of protection and types of controls necessary will vary<br>depending upon potential exposure conditions. Select controls<br>based on a risk assessment of local circumstances.<br>Appropriate measures include: Adequate ventilation to control<br>airborne concentrations. Where material is heated, sprayed or<br>mist formed, there is greater potential for airborne<br>concentrations to be generated.                                                                                                                                                                                                                                                                                                                                                     |
|------------------------------------|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal Protective                | : | Personal protective equipment (PPE) should meet                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Equipment                          |   | recommended national standards. Check with PPE suppliers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Respiratory Protection             | : | No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for software point point >65°C(149 °F)].                                                                                              |
| Hand Protection                    | : | Where hand contact with the product may occur the use of<br>gloves approved to relevant standards (e.g. Europe: EN374,<br>US: F739) made from the following materials may provide<br>suitable chemical protection: PVC, neoprene or nitrile rubber<br>gloves. Suitability and durability of a glove is dependent on<br>usage, e.g. frequency and duration of contact, chemical<br>resistance of glove material, glove thickness, dexterity. Always<br>seek advice from glove suppliers. Contaminated gloves should<br>be replaced. Personal hygiene is a key element of effective<br>hand care. Gloves must only be worn on clean hands. After<br>using gloves, hands should be washed and dried thoroughly.<br>Application of a non-perfumed moisturizer is recommended. |
| Eye Protection                     | : | Wear safety glasses or full face shield if splashes are likely to occur.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Protective Clothing                | : | Skin protection not ordinarily required beyond standard issue work clothes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Monitoring Methods                 | : | Monitoring of the concentration of substances in the breathing<br>zone of workers or in the general workplace may be required to<br>confirm compliance with an OEL and adequacy of exposure<br>controls. For some substances biological monitoring may also<br>be appropriate.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Environmental Exposure<br>Controls | : | Minimise release to the environment. An environmental assessment must be made to ensure compliance with local environmental legislation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## **11. TOXICOLOGICAL INFORMATION**

| Basis for Assessment                                                      | <ul> <li>Information given is based on data on the components and the toxicology of similar products.</li> </ul>                                                                                                                         |
|---------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acute Oral Toxicity<br>Acute Dermal Toxicity<br>Acute Inhalation Toxicity | <ul> <li>Expected to be of low toxicity: LD50 &gt; 5000 mg/kg , Rat</li> <li>Expected to be of low toxicity: LD50 &gt; 5000 mg/kg , Rabbit</li> <li>Not considered to be an inhalation hazard under normal conditions of use.</li> </ul> |
| Skin Irritation                                                           | : Expected to be slightly irritating. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.                                                    |
| Eye Irritation                                                            | : Expected to be slightly irritating.                                                                                                                                                                                                    |
| Respiratory Irritation                                                    | : Inhalation of vapours or mists may cause irritation.                                                                                                                                                                                   |
| Sensitisation                                                             | : Not expected to be a skin sensitiser.                                                                                                                                                                                                  |
| Repeated Dose Toxicity                                                    | : Not expected to be a hazard.                                                                                                                                                                                                           |
| Mutagenicity                                                              | : Not considered a mutagenic hazard.                                                                                                                                                                                                     |
| Carcinogenicity                                                           | : Components are not known to be associated with carcinogenic effects.                                                                                                                                                                   |
| Reproductive and<br>Developmental Toxicity                                | : Not expected to be a hazard.                                                                                                                                                                                                           |
| Additional Information                                                    | : Used oils may contain harmful impurities that have<br>accumulated during use. The concentration of such impurities                                                                                                                     |
|                                                                           | 5/8                                                                                                                                                                                                                                      |

will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible. Continuous contact with used engine oils has caused skin cancer in animal tests.

#### 12. ECOLOGICAL INFORMATION

**Material Safety Data Sheet** 

Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products.

| Acute Toxicity            | :  | Poorly soluble mixture. May cause physical fouling of aquatic organisms. Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l (to aquatic organisms) (LL/EL50 expressed as the nominal amount of product required to prepare aqueous test extract).                                                                                   |
|---------------------------|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mobility                  | :  | Liquid under most environmental conditions. Floats on water. If it enters soil, it will adsorb to soil particles and will not be mobile.                                                                                                                                                                                                     |
| Persistence/degradability | :  | Expected to be not readily biodegradable. Major constituents are expected to be inherently biodegradable, but the product contains components that may persist in the environment.                                                                                                                                                           |
| Bioaccumulation           | :  | Contains components with the potential to bioaccumulate.                                                                                                                                                                                                                                                                                     |
| Other Adverse Effects     | :  | Product is a mixture of non-volatile components, which are not<br>expected to be released to air in any significant quantities. Not<br>expected to have ozone depletion potential, photochemical<br>ozone creation potential or global warming potential.                                                                                    |
| 13. DISPOSAL CONSIDERATIO | NS |                                                                                                                                                                                                                                                                                                                                              |
| Material Disposal         | :  | Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses. |
| Container Disposal        | :  | Dispose in accordance with prevailing regulations, preferably<br>to a recognised collector or contractor. The competence of the<br>collector or contractor should be established beforehand.                                                                                                                                                 |
| Local Legislation         | :  | Disposal should be in accordance with applicable regional,                                                                                                                                                                                                                                                                                   |

#### 14. TRANSPORT INFORMATION

#### US Department of Transportation Classification (49CFR)

This material is not subject to DOT regulations under 49 CFR Parts 171-180.

IMDG

national, and local laws and regulations.

## Material Safety Data Sheet

This material is not classified as dangerous under IMDG regulations.

#### IATA (Country variations may apply)

This material is either not classified as dangerous under IATA regulations or needs to follow country specific requirements.

#### **15. REGULATORY INFORMATION**

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

#### **Federal Regulatory Status**

#### **Notification Status**

| EINECS | All components listed or |
|--------|--------------------------|
|        | polymer exempt.          |
| TSCA   | All components listed.   |
| DSL    | All components listed.   |

Shell classifies this material as an "oil" under the CERCLA Petroleum Exclusion, therefore releases to the environment are not reportable under CERCLA.

#### SARA Hazard Categories (311/312)

No SARA 311/312 Hazards.

#### **State Regulatory Status**

#### California Safe Drinking Water and Toxic Enforcement Act (Proposition 65)

This material does not contain any chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

#### **16. OTHER INFORMATION**

NFPA Rating (Health,:0, 1, 0Fire, Reactivity)SDS Version Number:1.0

Quaker State Defy 5W-20 Synthetic Blend Motor Oil (SL) MSDS# 23543 Version 1.0 Effective Date 12/28/2011 According to OSHA Hazard Communication Standard, 29 CFR 1910.1200
