MONTANA FORGE
A LIFETIME OF STYLE

Montana Forge “premium residential locksets” are manufactured to the highest standards combining advanced luxury features with the finest materials and finishes available.

The Montana Forge story starts with a desire to build the highest quality custom door hardware that is readily available for the market, while adhering to consistent architectural themes. Combine this with the ability to mix and match handlesets, deadbolts, along with knob and lever styles with matching rosettes to create your own personal expression, and MT Forge was born.

MT Forge products feature distinctive styling with advanced features including, solid brass cylinders, nickel plated bolts, concealed screws, all metal nickel plated chassis’s, screw-alignment adapters for easy installation, built in lock washers, & premium finishes.

MT Forge Handlesets are forged from solid brass. They have a unique nickel plated heavy duty chassis that locks in solidly with the interior trim lever or knob. In addition, all handlesets mate seamlessly with any Copper Creek residential lockset trim as well, which is an industry first.

MT Forge knobs, levers and deadbolts are non-handed designs. They are solid cast metal and feature an advanced nickel plated chassis giving a rock solid feel, concealed screws, and “convenience latch” with a short 28 degree rotation for easy access.

All MT Forge keyed functions feature premium solid brass cylinders and large bow keys.
