WHO IS SEMPERMED?

LEADER

We are a global leader in glove manufacturing and hand protection with over 100 years of experience.

EXPERTS

Gloves are our only business. We focus on innovation from conception to R&D and design, resulting in exceptional gloves.

PRODUCT CONSISTENCY

Our gloves follow the same manufacturing process throughout the entire product life-cycle. We are committed to quality and deliver it consistently.

PRODUCT SUPERIORITY

One of the world's leading glove manufacturers, utilizing state-of-theart technologies to achieve superior products.

SUSTAINABILITY

Our products limit environmental impact. Advanced packaging designs maximize shipping and storage, reducing emissions and waste for a healthier planet.

With more than 100 years of manufacturing experience, Sempermed has long been a pioneer within the disposable glove industry. From our humble beginnings to ranking among the world's largest medical and industrial glove manufacturers, we have always remained committed to supplying quality hand protection products.

As a leading disposable glove supplier, we are able to leverage the latest manufacturing technology in quality and innovation. We continuously develop and test products designed to better serve the needs of our customers to ensure Sempermed's hand protection products achieve optimal safety, reliability and quality.

Our Gloves are Disposable.

The People they Protect are Not.®

CHOOSING THE RIGHT GLOVE

GLOVE MATERIAL	ATTRIBUTES	ISSUES	PROPERTIES	APPLICATIONS
Chloroprene For maximum protection, change gloves every 30 minutes	Excellent barrier protection Greater puncture resistance than latex Comfort: similar to latex Finish: textured	Accelerators in glove manufacturing process may cause skin irritation (Less common compared to latex allergies)	 Molecular structure allows wearer to quickly identify a rip, hole or tear Displays good flame resistance and performs well in a wide range of temperatures 	IDEAL FOR PROLONGED USE & APPROPRIATE FOR MOST APPLICATIONS medical, dental, extreme temperatures, chemical exposure, lab, dermatology, jan/san, safety, and beauty
Nitrile For maximum protection, change gloves every 20 - 30 minutes	 Excellent barrier protection Greater puncture resistance than latex Comfort: similar to latex Available in a variety of colors Finish: textured 	Accelerators in glove manufacturing process may cause skin irritation (Less common compared to latex allergies)	 Molecular structure allows wearer to quickly identify a rip, hole or tear Less susceptible to material breakdown and leakage than a vinyl or latex glove 	APPROPRIATE FOR MOST APPLICATIONS medical, dental, vet, chemical exposure, lab, jan/san, safety, food services, beauty, and tattoo
Latex For maximum protection, change gloves every 15 - 20 minutes	Excellent barrier performance Appropriate for most uses Highly elastic, comfortable fit Finish: micro-textured and/or fully textured	Potential for allergies to latex proteins. Reaction can range from sneezing to anaphylactic shock (life-threatening) Allergies affect 10 to 20% of work-exposed individuals	Strength and elasticity Barrier protection against a variety of chemicals Less susceptible to material breakdown and leakage	APPROPRIATE FOR MOST APPLICATIONS general patient examinations, dental, wound care, routine oral procedures, lab, food services, beauty, and jan/san
For maximum protection, change gloves every 15 minutes or less	Most economical choice Comfort: not critical Available in a variety of colors Finish: smooth	Cuff has loose fit and is susceptible to material breakdown and leakage Natural body oils can breakdown the glove material	Minimal elasticity/ flexibility Typically clear in color, however colored vinyl is widely used in food manufacturing	INTENDED FOR SHORT- TERM NON-INVASIVE TASKS dispensing medication, non-invasive physical examinations, jan/san, food services, and food manufacturing
Polyethylene For maximum protection, change gloves frequently	Most economical choice for non-medical markets Finish: smooth	Baggy, loose fit Not intended for medical use or stringent chemicals Very thin material Intended for very short-term tasks only	Minimal elasticity/ flexibility Typically clear in color Low protection Susceptible to ripping/tearing and leakage	INTENDED FOR LIGHT DUTY APPLICATIONS jan/san, food services, cleaning * NOT FOR MEDICAL USE

Our Gloves are Disposable. The People They Protect are Not.®

GROUND-BREAKING BEGINNINGS

Semperit is founded by Johann Nepomuk Reithoffer, a tailor, entrepreneur and inventor specializing in waterproof fabrics. His patented weaving machine marks the start of the European rubber industry.

OUR FUTURE HOME

Construction commences on a factory in Wimpassing, Austria, which will one day house Sempermed's surgical glove production, research and development center.

FIRST GLOVES

Semperit starts producing latex gloves.

GLOBAL APPEAL

Sempermed surgical gloves are donned by professionals around the world.

res are donned by iround the world.

A NEW EUROPEAN MARKET LEADER

Sempermed® Supreme, one of the most frequently used powder-free surgical gloves in Europe, establishes itself as a glove of choice for surgeons.

INNOVATION AWARD

Our patented photochemical process, used to manufacture the skin-friendly, accelerator-free Sempermed® Syntegra UV, is awarded the prestigious EARTO innovation award.

SUSTAINABILITY & SKIN-FRIENDLINESS

The innovative Green Glove Technology introduces a new level of sustainability in glove manufacturing.

A CENTURY OF GLOVE EXPERTISE

20 20

Quality & Consistency First®

Gloves are our ONLY business. We dipped our first glove 100 years ago. Sempermed has expertise in every phase of the manufacturing process. The result is a product you can trust from people who know

RELIABLE SALES SUPPORT

You can count on your dedicated Account Manager to be there. We are committed to help resolve any issues and find solutions for you and your customers.

We communicate
with our factories on
a daily basis speaking
factory "language"
for efficient order
processing.

DOMESTIC LOGISTICS TEAM

Sempermed's logistics team works with our factories and transportation vendors daily, so you don't have to. SUSA operates in the EST time zone

CREATIVE MARKETING SUPPORT

Need help with your marketing or branding? Not a problem! Our talented marketing gurus can help with private label artwork and custom marketing pieces tailored to fit your needs. Artwork fees apply.

V HOUSE PRODUCT SOURCING

Looking for a specific glove? No problem. Let us find it for you.

HASSLE PREE FDA & CUSTOMS CLEARANCE

Relax. Let our team of experts get your gloves across the border.

WEEKLY UPDATES

We offer weekly updates on every order you place to keep you informed.

DEDICATED TO QUALITY PRODUCTS, SERVICE & SUPPORT

At Sempermed, we manufacture disposable gloves from start to finish. With more than 100 years of knowledge and experience, we are one of the most efficient and innovative glove manufacturers in the world. We control the process from R&D, production, and logistics to the end user. We are experts at packaging and delivering our full line of products including latex, nitrile, vinyl, chloroprene, and polyethylene gloves. Few companies can promise that kind of dedication to your hand protection. That's why we say Sempermed gloves will meet your expectations, or they will never reach your hands. We are your global glove expert, one that can be trusted unconditionally.

Infection Prevention

GLOVES ARE ENOUGH

The World Health Organization (WHO) recommends properly washing hands BEFORE & AFTER GLOVE USE

by rubbing hands with alcohol-based hand sanitizer or by washing with soap and water

WHEN SHOULD YOU CHANGE

- As soon as gloves are DAMAGED
- AFTER CONTACT with a patient or
- AFTER CONTACT with blood, saliva, or other bodily fluids
- When there is evidence of CONTAMINATION

GERM TRANSMISSION & GLOVE CROSS CONTAMINATION

PROPERLY

LIMIT the # of surfaces with gloved

DISPOSE safely

HOW OFTEN SHOULD YOU CHANGE YOUR GLOVES?

to change your gloves every:

LATEX

MINIMIZE THE EXPOSURE, MINIMIZE THE RISK.

Let's face it, the world's a pretty germy place. So we've made it our sole mission to provide our customers protection from all those wicked whatevers. Since we focus only on manufacturing and supplying gloves, we set the bar on quality standards that surpass regulatory guidelines for both consistency and performance. Because there's a person attached to every single one of the hands we protect - we feel that it's people who we're really protecting. We take enormous pride in being the first and last line of defense for people in harm's way.

Source: World Health Organization, 2009.

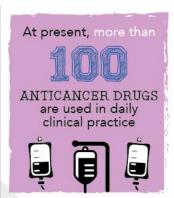

Stay Informed. Stay Protected.

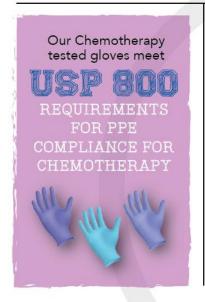

According to the World Health Organization, there were 14.1 MILLION NEW CANCER CASES &

32.6 MILLION PEOPLE LIVING WITH CANCER

(within 5 years of diagnosis) in 2012 worldwide

OUR GLOVES ARE DISPOSABLE. THE PEOPLE THEY PROTECT ARE NOT®

We have made it our mission to provide our customers with protection from all those wicked whatevers. Since there is a person attached to every single one of the hands we protect, we feel it is the people themselves that we are really protecting. If you handle cytotoxic chemicals or work in oncology, try one of our seven nitrile exam glove brands that have been tested for use against chemotherapy drugs*: SemperSure® Green, SemperSure®, SemperForce Blue®, SemperCare®, TenderTouch®, TenderTouch® 100, and StarMed® Ultra.

*Meets USP 800 requirements for PPE compliance for chemotherapy

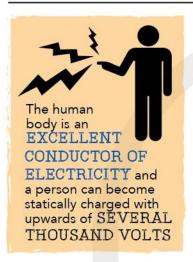

ESOC You Covered

WHAT IS ESD

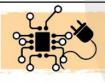

ELECTROSTATIC DISCHARGE:

The sudden flow of electricity between two electrically charged objects caused by contact, an electrical short, or dielectric breakdown

By definition, a static dissipative material has a SURFACE RESISTIVITY of 1 x 10⁵ to 1 x 10¹² ohms per square

In many industries, this discharge of static electricity can DAMAGE A VARIETY OF PRODUCTS, especially sensitive electronics

STATIC ELECTRICITY CAN POSE A FIRE-RISK

in industries that handle flammable liquids, such as automotive, painting, chemical, lab, pyrotechnic and petroleum/gas

ESD GLOYES

provide HAND
PROTECTION that
HELPS PREVENT
PRODUCT DAMAGE
from electrostatic discharge
and are GENERALLY
SAFE to work with
flammable liquids/chemicals
or static sensitive devices

ESD TESTED & APPROVED GLOVES

Are you handling sensitive electronics or flammable liquids? We've got you covered! Sempermed offers eight brands that are ESD tested and approved. ESD gloves provide hand protection that helps prevent product damage from electrostatic discharge, and they are safe to work with static sensitive devices where bare hands are not desired*. We can send you free samples of our ESD tested and approved gloves: SemperForce® Nitrile; SemperCare® Nitrile; SemperShield® standard cuff; SemperGuard® Nitrile, SemperGuard® HD Nitrile, GripStrong® Nitrile, GripStrong® White Nitrile, and SemperGuard® Latex.

* Level of ESD protection should be confirmed for your needs.

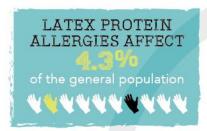

SENSTIVES 11? We've Got You Covered

SOME GLOVE USERS can develop rashes linked to irritant contact DERMATITIS. This may be caused by chemicals such as ACCELERATORS used in the manufacture of the gloves

THE RISK

ARE YOU SENSITIVE TO YOUR GLOVES?

Do you have delicate skin or suffer from dry, chapped hands? Do you often wonder if you are sensitive to your gloves? We've got you covered! Sempermed offers four glove brands that provide relief for irritated hands. Best Touch® StarMed® ROSE nitrile exam and Best Touch® latex exam, have an aloe coating, which soothe hands and help prevent skin irritation. SemperSure® and SemperSure® Green accelerator-free nitrile exam gloves are designed for those with skin sensitivities to standard nitrile gloves, offering all the benefits of a nitrile glove, minus the chemical accelerators that may cause reactions.

Understanding DOTP & DINP Gloves

SEMPERMED DOTP VINYL GLOVES

There is scientific and medical evidence that vinyl gloves are safe and serve a valuable role in the medical and industrial glove market. Simply because DEHP & DINP have been placed on the Prop 65 does NOT mean that vinyl gloves containing these substances are unsafe or pose health risks. Nonetheless, all Sempermed vinyl gloves are DOTP to avoid mandatory Prop 65 warning labeling requirements. Try free samples of our vinyl gloves: SemperCare® Stretch, SemperCare® Synthetic, GripStrong®, SemperGuard® (Powdered and Powder-Free), SemperGuard® Blue, and SemperGuard® Black.

Enforcement & Data Submission

September 24, 2013 the

ESTABLISHED
A UNIQUE
IDENTIFICATION
SYSTEM
to adequately

identify medical devices

GLOBAL TRADE ITEM NUMBER an item barcoding system developed by the

an item barcoding system
developed by the
non-profit organization
GS1. GS1 IS AN
FDA-ACCREDITED
ISSUING AGENCY

To be compliant, the labeler must submit information of each device to FDA's Global Unique Device Identifier Database (GUDID), which serves as the repository of key device identification data. THE LABELER IS DEFINED AS THE OWNER OF THE BRAND. THE OWNER OF A PRIVATE LABEL BRAND IS THEREFORE THE LABELER. All such devices must be properly labeled with a UDI and be registered on GUDID by by the labeler

ENFORCEMENT OF UDI LABELING

Enforcement of UDI labeling and data submission for Class 1 medical devices, including disposable examination and surgical gloves, has been extended to September 24, 2022. To meet this compliance date, Sempermed has labeled each of our products with a UDI, in the form of 12 and 14 digit Universal Product Codes (UPC), which were created using GTIN (barcoding) software provided by GS1, and registered on GUDID. Accurate and synchronized data improves supply chain efficiency and patient safety by reducing picking errors, facilitating faster product recalls, enabling efficient tracking of medical devices, while enhancing inventory management.

WORLD CLASS MANUFACTURING

Semperit is committed to the long-term objective of being completely accident-free, while ensuring the sustainable production of

SEMPERSURE® GREEN ACCELERATOR-FREE EXAM NITRILE

SemperSure® Green is Sempermed's first nitrile glove manufactured with eco-friendly innovative green technology which uses less natural resources saving water, gas, and energy. These accelerator-free nitrile exam gloves are designed for those with skin sensitivities to regular nitrile gloves offering all the benefits of a nitrile glove, minus the chemical accelerators that cause allergies and skin irritations. This glove also meets USP 800 requirements for PPE compliance for chemotherapy and is tested for use with chemotherapy drugs. Visit our website for more info and sign up for free samples of SemperSure® Green.

LET'S SAVE THE WORLD TOGETHER

We use over 5 million pounds of recycled materials in our packaging every year.

Our recycled packaging saves approximately 5,000 trees annually.

Our inner boxes are made of 80% recycled material. Our outer cartons are made of 90% recycled material.

Recycled Packaging Saves Trees, Now!

We consume **55% less**paper by putting
more exam nitrile gloves
in every box.

We were the first glove manufacturer to start packing 200, 250 or 300 gloves/box (instead of 100), which reduces our annual paper consumption by over 2 million pounds.

We reduce our carbon footprint by 12% using slow-steaming vessels to ship our products.

More Gloves/Box

Less Paper, Less Emissions, Now!

Smart Dispense
Technology, Single
Glove Delivery™ allows
for smooth dispensing,
and less waste.

By flat-packing our gloves we can fit more gloves in each box, which means fewer shipments and less emissions.

Our flat-packing methods help hospitals save thousands of gloves (waste) from falling on the floor each year.

Smart Dispense Technology Less Waste, Now!

Our innovative green manufacturing process sustainably produces gloves.

No chlorine is added during our green manufacturing process. 10% less water is used and our CO₂ impact is reduced by 17%.

Our green manufacturing technology **uses less gas and electricity**. By 2050 the global energy demand will increase by 70-100 %.

Green
Manufacturing
Saves Resources,
Now!

Our Gloves are Disposable. The People they Protect are Not.®
