E2E Technologies’ customers have benefited from our solutions in numerous ways including:

• Improved spending coverage
• Reduce cost of goods and services
• Employ industry best practices
• Leverage the latest procurement technologies
• Streamline source-to-pay processes—all without additional risk and assets required to achieve these results.

We can provide a rapid analysis of the OPEX and CAPEX spend requirements to build or modernize your field-area wireless networks. Our goal is to become an extension of your organization’s existing procurement resources, in a non-obtrusive fashion. Our process provides a secure and responsive supply base capable of meeting current and future business needs in terms of Quality, Delivery, Cost, Quantity, Technology, Flexibility, and Service.

Wireless Equipment

E2E Technologies offers a complete line of point-to-point and point-to-multipoint wireless products and accessories from our strategic partner, GE Digital Energy. Our solutions use industry-leading wireless equipment by the top providers in the world. From wellhead monitoring to utility substation automation, this equipment is built for industrial environments and has been rated and tested under harsh conditions.
Solutions from E2E Technologies enable a broad spectrum of industrial wireless applications and protocols. From SCADA and telemetry to full voice and video, E2E Technologies will engineer a solution for your needs.

**FCC Licensing**

Turn-key coordination and filing of all regulatory and wireless licenses with the appropriate agencies for the location and application.

**Field-Area Structures**

E2E Technologies will specify, procure and manage communication structures using our trusted partners as part of our turn-key industrial wireless automation project management services. Our partners are leading communication site construction companies that have proven their ability to ensure adherence to our rigid standards for safe, reliable, high performing field-area networks.

**Go With an Experienced Staff For Your Next Project**

Let our experienced procurement staff work with you to obtain the wireless and networking equipment, FCC licensing, management software, service providers and site preparation and construction contractors for your next industrial wireless communication project. We can provide the benefit of lower costs and less risk, all under one contract.
