

Firefly Magic®

ELECTRONIC

Fireflies

Firefly Magic® Firefly Lights are so new and unique they were awarded U.S. Patent No. 7,212,932.

Used by theme parks, zoos, natural science museums, on stage, and even in movies to recreate the realistic look of fireflies. Firefly Magic® Firefly Lights have been seen on DIY Network, Animal Planet, Fine Living Channel, HGTV, and the National Geographic Channel.

Just how accurate are these new electronic 'Fireflies'? So accurate that a major University actually used Firefly Magic® Firefly Lights to conduct their research by attracting real fireflies with these electronic 'Fireflies'.

"Firefly Magic firefly lights are so realistic, they even fool other fireflies!"

*Sara M. Lewis
Professor of Biology
Firefly Research
Tufts University
Medford, Massachusetts*

Fireflies

Lightning Bugs

14 Electronic 'Fireflies'

Each one is on its own wire for Quick & Easy installation.

"The World's most-accurate recreation of the flashing, flickering, and fading of Mother Nature's Fireflies."

Color, Size, & Flashing match the look & feel of the most common variety of firefly in US.

'Fireflies' last for over 100,000 hours of realistic glow time to create fun & excitement for friends, family, and guests.

Designed for all year use in yard or garden.

Recreate the World's most realistic flashing, flickering & fading of Mother Nature's Fireflies in your Garden!

English and Spanish Instructions Included Inside.
Incluye Instrucciones en Inglés y Español en el Interior.

Capturing Childhood Memories

Everyone loves watching nature's amazing bioluminescent light show from fireflies flashing, flickering and fading on a warm summer evening. For those growing up with fireflies or lightning bugs, one of the most enjoyable memories of being young was chasing after their fascinating glow.

Now, with microelectronic technology and a new patented method of use, Firefly Magic® brings back those fun and delightful memories with the excitement of recreating Fireflies in the night.

Designed with environmentally friendly solar energy, plus lead free manufacturing, Firefly Magic® 'Fireflies' remain true to nature with their authentic looking patented firefly LEDs that match the color and size of real fireflies.

But the real Magic is how Firefly Magic® 'Fireflies' *randomly* flash, flicker and fade just like living fireflies. . . and what a wonderful way to begin creating new memories!

Installation

Simple - Easy - Quick

- Place Solar panel where it receives a few hours of sun each day
- Spread Firefly wires into landscape - up to a 24 foot wide area
- Attach Fireflies to foliage with the included *Quik-e-ties*™

Then wait for sunset and watch the Fireflies create a Magical evening

Firefly Magic 'Fireflies' use 2-AA (included) rechargeable NiCd or NiMH batteries that are easily replaceable and interchangeable with standard alkaline batteries for use without solar charging.

NOTE: For battery-operated use without solar charging, install 2 standard AA Alkaline batteries to operate the 'Fireflies' continuously, for approximately 4 weeks. If the On/Off switch is used to operate only when desired, batteries may need changing only once or twice per year.

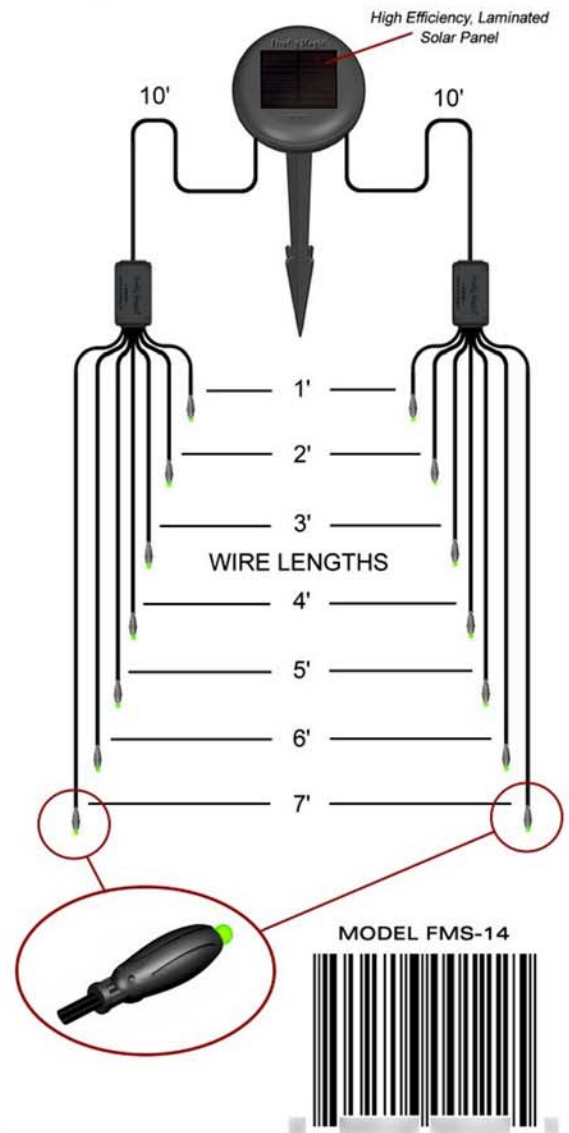

"Turning your yard or garden into a Magical wonderland for family, friends, and guests."

Bill Gates: Innovating to Zero - TED Talk

"I decided that releasing fireflies would be my contribution to the environment here this year. So here we have some natural fireflies. I'm told they don't bite; in fact, they might not even leave that jar." (Fireflies made by Firefly Magic®)
