Felt Bicycles was founded on one principle: to design, develop and deliver the best bicycles in the world. Before founding his namesake company, and in addition to being an accomplished triathlete, Jim Felt was one of the top motorcycle mechanics in the United States after having worked with industry leaders Honda, Suzuki, Yamaha and Kawasaki. But when motocross champion Johnny O’Mara asked Felt to build him a triathlon bike, Felt was given the opportunity to put into practice many of the innovative designs he had dreamed about for optimizing a rider's position and improving aerodynamics.

His work was so innovative that Easton Sports hired Felt as the company’s product engineer and tasked him with creating an all-new bike for three-time Ironman World Champion Paula Newby-Fraser. Shortly after, she became four-time champion of the most prestigious race in triathlon. Jim Felt then launched his namesake brand, Felt Bicycles, and utilized his frame-building expertise to develop a complete line of road and time trial bikes.
But it was in 2001 when he partnered with bicycle industry veterans Bill Duehring and Michael Müllmann that Felt was able to reach an even greater number of cycling enthusiasts than ever before by expanding into the realms of BMX, lifestyle, track racing and mountain bikes. Since then, Felt Bicycles has become one of the world's most respected cycling brands, and the company prides itself on its focus on quality service, technological innovation and empowering bike riders the world over to achieve their greatest ride.

Felt's dedicated team of engineers based at the company’s global headquarters in Irvine, California, has pioneered countless industry innovations, including manufacturing processes like InsideOut Internally Optimized Molding, Modular Monocoque Construction (MMC) and Dynamic Monocoque Construction (DMC), and breakthrough product designs like Felt Active Stay Technology (FAST) mountain bike suspension and the Bayonet 3 triathlon steering system. And in the past few years alone, these technological developments have seen Felt bicycles ridden to stage wins at the Tour de France, gold medals at the Olympic velodrome and record-breaking performances at the Kona World Championship.

Today, each and every Felt bicycle features unique and innovative features that set it apart from its competitors, all in the name of Felt's original guiding principle. And with countless new and exciting projects on the horizon, that principle remains the same to this day and well into the future: to design, develop and deliver the greatest bicycles in the world.
When Felt’s pro road racers demanded a faster bike for breakaways, sprint finishes and criteriums, Felt’s engineers set to work using computational fluid dynamics (CFD) software and the most stringent wind tunnel testing protocols in the industry, along with the knowledge they learned when creating the revolutionary DA time trial bike. The result of their efforts is the AR, the most aerodynamic road frame that Felt Bicycles has ever produced, featuring a selection of tube shapes inspired by the DA and a user-friendly internal cable routing system. But because aerodynamics are only part of the racing equation, the AR was designed with a tapered steerer for optimal handling in any situation, along with maximum pedaling stiffness that’s balanced with a ride quality tuned to minimize rider fatigue. In an era obsessed with pursuing marginal gains, the AR is the best-performing aero road bike in the world.
| FRAME | Felt Aero Road UHC Ultimate + TeXtreme® carbon fiber, MMC with InsideOut construction, carbon fiber BB30 bottom bracket shell and carbon fiber dropouts, 7075 CNC aluminum replaceable rear derailleur hanger, electronic-specific (internal) cable routing |
| FORK | Felt Aero Road Fork Design, 700c Threadless UHC Ultimate + TeXtreme Carbon Fiber Monocoque Fork, 100% Carbon Fiber Control Taper 1.125” - 1.25” Steerer with integrated crown race, Crown, Blades, & Dropout |

The FR is the epitome of the modern road race bike. Featuring a refined version of Felt’s legendary racing geometry that boasts impeccable handling characteristics, the FR also utilizes a precise level of compliance that ensures riders are fresh for a finish line sprint after a long day in the saddle. The FR also showcases several integration features that have been optimized for contemporary drivetrains and components, including an intuitive cable management system that complements the unique properties of wireless and wired electronic groups while maximizing the utility of mechanical drivetrains. And with high-performance tires pushing the limits of road frames, the FR Series boasts more frame clearance than any previous Felt road race bike, allowing riders to utilize tires up to size 28mm on select rims. And the FR is available in both rim brake- and disc brake-equipped versions, giving riders more equipment choices than ever before. With an incredible stiffness-to-weight ratio and compliant ride quality, the FR offers no compromise.

The FR is the culmination of years of engineering effort to create the ultimate bike for the modern female road racer. Featuring a refined version of Felt’s legendary racing geometry designed with feedback from Felt’s top professional female riders, the FRW boasts impeccable handling characteristics and a optimized level of compliance that ensures racers are fresh for a finish line sprint after a long day in the saddle. The FRW also features a variety of integration features that have been optimized for contemporary drivetrains and components, including an intuitive cable management system that complements the unique properties of wireless and wired electronic groups while maximizing the utility of mechanical drivetrains. And because the world’s best racers demand the best equipment, Felt engineers have ensured that the FRW includes enough frame clearance to allow riders to utilize tires up to size 28mm on select rims. Available in both rim brake- and disc brake-equipped versions, the FRW gives female riders more choices than ever before for tackling a fast stage race, tough training ride or all-day riding adventure. With an incredible stiffness-to-weight ratio and compliant ride quality, the FRW offers no compromise.

The VR Series represents the next step in the evolution of the endurance road bike. Featuring an ideal blend of compliance and performance-oriented stiffness, the VR incorporates an incredible degree of versatility befitting the modern endurance road cyclist. This means that the VR frame features enough clearance for utilizing a variety of tire widths, giving you the option of running narrow slick treads for fast road rides, knobby rubber for off-road excursions, and everything in between. Endurance-oriented geometry designed around an upright riding position, combined with a newly developed seat stay configuration, offers enhanced comfort and more confident handling characteristics for long days in the saddle. But a tapered head tube and robust bottom bracket shell ensure that the VR possesses the same performance credentials for which all Felt bikes are renowned. Extend your ride and enhance your experience with the Felt VR.

FELT BICYCLES IRVINE CALIFORNIA
The VRW is the ultimate endurance road bike for female riders to tackle their next adventure. Featuring an ideal blend of compliance and performance-oriented stiffness, the VRW offers the versatility befitting the modern endurance-minded, female road cyclist. This means that the VRW frame boasts enough clearance for a variety of tire widths, giving female riders the option of running narrow slick treads for fast road rides, knobby rubber for off-road excursions, and everything in between. The VRW’s endurance-oriented geometry is honed for advanced and novice female riders, alike, and features an upright riding position combined with a newly developed seat stay configuration for enhanced comfort. Confident handling characteristics make for a stable ride for everything from short leisurely rides with friends to long days in the saddle. A tapered head tube and robust bottom bracket shell ensure that the VRW possesses the same performance credentials for which all Felt bikes are renowned. Enhance your riding experience with the Felt VRW, the perfect bike for any occasion.
** FRAME ** Felt Fit Woman Versatile Road UHC Advanced + TeXtreme® carbon fiber, MMC with InsideOut construction, BB386 bottom bracket standard and 12 x 142mm with Syntace style thru axle dropouts, flat-mount disc brake standard, replaceable rear derailleur hanger, mechanical (internal) or electronic (internal) cable routing

** FORK ** Felt Fit Woman Versatile Road UHC Advanced + TeXtreme® carbon fiber monocoque construction, size specific ControlTaper carbon fiber steer tube and carbon fiber steer tube, crown, blades with flat-mount disc standard and 12 x 100mm Maxle style dropouts

** HEADSET ** 43 - 47cm: FSA IS-21 integrated, 1.125" sealed cartridge bearing; 51 - 56cm: FSA NO.38/42, 1.125" - 1.5" sealed cartridge bearing; w/ Felt VariableHeight Cone Spacers (20mm PC, 4.5mm aluminum), 1 x 10mm + 2 x 5mm PC headset spacers, Felt carbon fiber top cap and aluminum bolt

The IA is the most aerodynamic bicycle in the world. Designed specifically for triathlon racing at the highest level of competition, the IA was developed using computational fluid dynamics (CFD) software and countless hours of testing in the wind tunnel, and its industry-leading frame shapes and tube profiles combine for a bike that produces negative aerodynamic drag in certain situations. The IA also boasts a heretofore-unseen level of integration that includes an intuitive nutrition storage solution, user-friendly internal cable and wire routing and a cockpit design that offers a fit range to accommodate the needs of all athletes without sacrificing one gram of aerodynamic drag. The IA is so advanced that it has propelled Felt athletes to victories at the Kona World Championship three years in a row. Best of all, Felt has adapted the IA’s revolutionary aerodynamic efficiency across a diverse line to accommodate the component preferences and budgets of every triathlete.

The DA has long been a favorite among triathletes and time trialists the world over. The latest edition of Felt's perennial time trial bike remains UCI-legal for all competitions, and includes the innovative vibration-reducing, aerodynamic seatpost design made popular by Felt’s AR aero road bike series. Its integrated front end makes for a high level of adjustment that can accommodate a wide range of cockpit solutions and fit needs. And the DA’s integrated front and rear brakes complement the frame’s unique collection of aerodynamic tube profiles that give it a distinct aerodynamic advantage over comparable bikes with exposed brake calipers. Ideal for any TT or triathlon course, the DA is the ultimate weapon of choice for riders looking to beat the clock.

Featuring many of the aerodynamic benefits of the iconic DA time trial bike, the B series offers triathletes another option for achieving their best bike split ever. Crafted from Felt’s UHC Performance carbon fiber and incorporating several of the aerodynamically optimized tube shapes developed for Felt’s most technologically advanced bikes, the B series bikes come complete with highly functional component selections that make them ready to race right from the start.

FELT BICYCLES IRVINE CALIFORNIA
Developed for those riders looking to get started in triathlon but don’t want to sacrifice performance, the S series features a durable aluminum frame with aerodynamic shaping not normally found on comparably priced competitors’ bikes. The S frame is paired with a bladed carbon fiber fork that adds even more aerodynamic benefits while offering stable, confidence-inspiring steering. Its highly functional selection of components makes it immediately ready to race while also providing plenty of upgrade potential for long-term service.

CROSS
FX SERIES

Mud, rocks, snow, sweat and pain. That's cyclocross. The toughest racecourses demand the best equipment, and that's why Felt created the Fx series. With geometry tuned for the demands of the world's top athletes, the Fx offers incredibly responsive handling, optimal pedaling stiffness and an oversize front triangle for easy shouldering when tackling technical run-up sections. The Fx series also boasts plenty of versatility thanks to its dual water bottle mounting locations and ample frame clearance that can accommodate most modern performance tires. Available in both high-performance carbon fiber and rugged aluminum, all Fx models feature disc brakes for maximum performance in any weather condition. Whatever the 'cross course throws your way, the Fx has you covered.
FRAME  Felt Cyclocross UHC Advanced + TeXtreme carbon fiber, MMC w/ InsideOut construction, BB386 & 12 x 142mm w/ Syntace style thru axle dropouts, shoulder friendly top tube, replaceable rear derailleur hanger, internal cable routing (mechanical compatible)

Felt’s track bikes have been ridden to world championships and Olympic medals, and they’re ideal for both the sport’s top athletes and anyone looking to experience the thrill of racing inside the velodrome. The top-of-the-line TA FRD is crafted from Ultimate + TeXtreme carbon fiber and features aerodynamic tube shapes gleaned from Felt’s decades-long experience developing the world’s most aerodynamic bicycles. The TK series includes other models crafted from rugged aluminum frames for the durability and stiffness demanded by the purest form of bike racing where power reigns supreme.

Designed for Enduro racing but versatile enough for everyday trail riding, the Compulsion is most at home on technical descents. Featuring 160mm of suspension travel and Felt’s revolutionary Equilink technology that maximizes pedaling efficiency while handling anything the trail throws your way, the Compulsion makes even the roughest, rock-laden, root-strewn terrain accessible. Its 27.5-inch wheels have become the industry standard and combine with the Compulsion’s unique geometry to make it a better climbing companion than other bikes in its class. For those riders looking to take on the challenge of Enduro racing, or for those who simply want one bike that’s capable of handling any ride, then the Compulsion is the ideal choice to conquer any trail, any terrain, anytime.
Frame
Felt All-Mountain, double-butted 6061 aluminum, Hydroform, 160mm travel, Equilink suspension technology, ControlTaper head tube, post-disc mount, replaceable derailleur hanger, standard 73mm threaded bottom bracket, 12 x 142mm w/ Syntace style thru axle, Ø30.9mm seatpost size, high direct FD mount.

Shock
Rock Shox Monarch Plus RC3, DebonAir with High Volume eyelet, custom tune, 216 x 63.

Fork
Rock Shox Pike RCT3 Dual Position Air, 160mm.

Headset
FSA DX Pro semi-integrated tapered headset, external lower cup w/ 8mm custom cone spacer.

Stem
Felt MTB 3D-forged threadless 1-1/8" +/- 7° rise for Ø31.8mm handlebar w/ black Cr-Mo bolts: SM - 50mm, MD - 60mm, LG/XL - 70mm.

Handlebar
Felt MTB carbon Flat top, Ø31.8mm, 8mm rise x 9° sweep, (760mm).

Grips
Felt Wing lock-on grip.

Shifters
SRAM X01 11-speed.

Front Derailleur
N/A.

Meet the ultimate trail bike. The Decree is a no-compromise machine that utilizes the modern 27.5-inch wheel platform and Felt Active Stay Technology (FAST) suspension to allow for cross-country-like climbing and incredible descending prowess. Its geometry is characterized by a low bottom bracket height, long front end and slack head angle, all of which combine for enhanced stability at high speeds. Riders also have the freedom to tune the Decree’s geometry thanks to Felt’s innovative Flip Chip system. Changing the orientation of these eccentric chips in the seat stay pivot will raise or lower the bottom bracket height by 10mm and slacken or steepen the head angle by one degree, allowing riders to personalize the Decree to their unique riding style. Along with internal cable routing, a removable front derailleur mount and accommodation for dropper posts, the Decree is the one trail bike for all occasions.
**FRAME**  Felt Trail, UHC Ultimate + TeXtreme carbon fiber, MMC w/ InsideOut construction, Full carbon dropouts, 140mm travel, FAST suspension, ControlTaper head tube, post disc mount, replaceable derailleur hanger, standard 73mm threaded bottom bracket, 12 x 142mm w/ Syntace style thru axle, internal derailleur cable/brake hose/dropper post routing, Ø30.9mm seatpost size, high direct FD mount

Wider tires equal increased traction, greater stability and more fun. That's what the Surplus is all about. Built around a rugged yet lightweight 6061 aluminum frame, the Surplus features the 27.5+ wheel platform prized by riders looking to enhance their ride quality with bigger tires to tackle tougher terrain without sacrificing the impeccable handling characteristics for which Felt hardtail mountain bikes are known. The Surplus is everything you want in a mountain bike, and more.

Felt Bicycles was born from racing. And for the cross-country course, the Edict is our crowning achievement. A race bike must be lightweight, and Felt’s decades-long history of carbon fiber engineering has placed the Edict in a weight class well below those of our nearest competitors. A race bike requires impeccable handling, so Felt’s engineers gifted the Edict with precision geometry that allows for precise steering, yet is incredibly stable at high speeds. A race bike must be able to handle anything the course throws its way, and so the Edict features Felt Active Stay Technology (FAST) suspension with 120mm of front and 100mm of rear travel, which means that even the roughest racing lines are no longer off limits. Optimized for racing yet versatile enough for your local trails, the Edict has been issued.
**FRAME** Felt FRD XC, UHC Ultimate + TeXtreme carbon fiber, DMC w/ InsideOut construction, full carbon dropouts, 100mm FAST suspension, ControlTaper head tube, post disc mount, replaceable derailleur hanger, standard 73mm threaded bottom bracket, 12 x 142mm w/ Syntace style thru axle, internal derailleur cable routing, Ø30.9mm seatpost size, Shimano E-type low direct FD mount

When the cross-country racecourse demands the lightest bike possible, Felt’s team of world-class athletes reach for the Nine. Its hardtail design combined with Felt’s extensive materials expertise has yielded a series of bikes that are among the lightest in their class with maximum pedaling efficiency. Imbued with Felt’s legendary racing geometry that begets the most precise handling available, the Nine can tackle any switchback-laden climb or technical singletrack descent with confidence. And with its 29-inch wheels and suspension fork with 100mm of travel, the Nine can double as a capable trail bike.

Mountain bike technology has evolved dramatically over the years, and the 7 represents the very best core attributes of the sport’s history. Chief among those is its 27.5-inch wheel platform, which gives riders the ideal balance between optimum rolling capabilities and quick, precision handling. The 7 is built around 6061 aluminum frame for durability and functionality, and its hardtail design has proven to be a capable trail companion for riders of all skill levels. A suspension fork with 100mm of travel softens the 7’s already impressive ride quality, and value-laden component selections include wide-range gearing for taking on any terrain.

FAT BIKE

DD SERIES

The fat bike is the biggest revolution in mountain biking technology, and the Felt DD has proven to be the ultimate machine for riders looking to conquer any ride, any terrain, any weather, anytime. The DD features a rugged 6061 aluminum frame designed for dependability, with a finely tuned geometry for all-day comfort and stable handling over the roughest terrain. Its massive tires provide jaw-dropping traction, even in deep sand and icy snow. No matter where your ride takes you, the DD will perform beyond your expectations.
| Frame | Felt Fat, double butted 6061 aluminum, Hydroform, ControlTaper integrated head tube, post disc mount, replaceable derailleur hanger, 100mm threaded bottom bracket, 190mm OLD, Ø30.9mm seatpost, Ø34.9mm clamp adaptor for high direct type front derailleur mount |

If a solid workout is your goal, the Verza Speed is your bike. With a lightweight aluminum frame inspired by Felt’s performance range of road bikes, the Verza Speed is built to go fast. And thanks to its flat handlebar and comfortable riding position, it’s an ideal companion for cruising around town. Its wide-range gearing gives you the ability to conquer any mountain ascent or steep city climb, while its disc brakes provide you with enough stopping power for any riding situation. Also a capable commuter, the Verza Speed is among Felt’s most popular bikes.

FELT BICYCLES IRVINE CALIFORNIA
With its relaxed riding position and all-day comfort, the Verza Café is ideal for leisurely rides and running errands around town. Its classic style was inspired by the incredibly popular city bikes of Europe, and will undoubtedly turn heads wherever you go. And with its upright riding position and plenty of gears at its disposal, the Verza Café is capable of comfortably traversing any urban or rural landscape.

**VERZA CAFFE7 W**
The urban jungle is unlike any other cycling environment, and it requires a very special bike. Durability, functionality and style take precedent over all other attributes. And that's why Felt has created a full line of urban bikes for the commuter, the messenger, the student, the artist, the shopkeeper, the delivery person, and anyone else passionate about riding, be them city-dweller or otherwise.

Drawing on Felt's decades-long history of crafting the world's leading high-performance road and mountain bikes, Felt engineers crafted each and every model in the Urban series from high-strength materials for durability. Each bike also features precision steering for stable, confident handling, as well as ergonomic components for maximum comfort and functionality. Felt's fixed-gear and single-speed Urban bikes have also been optimized with the ideal gearing for conquering steep climbs and cruising along flat streets.

An impeccable ride quality and high performance are only parts of the equation, however. For a bike to be truly loved, it must be eye-catching yet subtle, and emblematic of its landscape. That's why Felt's artists finished off the Urban series with minimal graphics that blend seamlessly with their componentry, creating a uniquely understated yet bold aesthetic package. From city streets to suburban thoroughfares, country roads to beachside boardwalks, Felt Urban bikes are built to perform and look incredible doing it.
**FINISH**  Matte Metallic Charcoal

**SIZES**  51, 54, 56, 58, 61cm

**WEIGHT**  10kg, 22lbs (w/o brakes)

**FRAME**  Felt single speed custom butted 4130 TIG-welded Cr-Mo tubes, butted top tube and down tube, tapered seatstays w/ horizontal forged Cr-Mo dropouts, rack & water bottle mounts

**FORK**  Felt sloping crown design, 100% Cr-Mo, 1.125" threadless steerer & ovalized straight blades, 43mm offset

**HEADSET**  1.125" threadless, aluminum spacer, Felt Lifestyle aluminum top cap

**STEM**  Aluminum forged, 4-bolt clamp, +/-7° rise, Ø31.8mm
- 51-54cm = 80mm

### Frame
Felt single speed custom butted 4130 TIG-welded Cr-Mo tubes, butted & tapered seatstays w/ horizontal machined Cr-Mo dropouts, integrated seat clamp, rack & water bottle mounts

### Fork
Felt flat crown design, 100% Cr-Mo, 1.125” threadless steerer & oversized curved fork blades, 43mm offset

### Headset
1.125” threadless, aluminum spacer, Felt Tornado aluminum top cap

### Stem
Felt aluminum forged threadless 1-pc stem/spacer design, 4-bolt clamp, -15° rise, Ø31.8mm
51cm-54cm = 90mm
56cm-61cm = 100mm

### Handlebar
Aluminum English touring bar, 30mm rise, 580mm wide, 50 sweep, Ø31.8mm

### Grips
Felt vinyl wrap & stitched, no flange

### Crankset
Felt TkR Pista inspired cold forged polished aluminum w/ 144 BCD
51 - 54 = 165mm
56 - 61 = 170mm

### Chainwheel
Aluminum CNC, Skip-Tooth 22T x 1/8"

### Bottom Bracket
Sealed cartridge, square taper axle, 88mm

### Pedals
Aluminum Rat Trap

### Chain
KMC Z410 1/8"

### Freewheel/Cassette
Freewheel 18T x 3/32" & Fixed cog 17T x 3/32" w/ lock ring

### Brake Levers
Tektro classic style, aluminum front & rear

### Brake Front
Tektro dual pivot caliper, stainless hardware

### Brake Rear
Tektro dual pivot caliper, stainless hardware

### Cables
Felt Slick brake

### Saddle
Felt classic road saddle w/ riveted custom cover & steel rails

### Seatpost
Aluminum micro-adjust, Ø27.2 x 300mm

### Seatpost Clamp
Integrated in frame

### Rims/Wheelset
Alex ACE 19 double-wall aluminum

### Front Hub
Aluminum hi-flange, track nuts, 32H

### Rear Hub
Aluminum, flip-flop fixed / freewheel, hi-flange, 32H

Whether you’re looking to optimize your commute, cruise to the coffee shop or enhance your workout, Felt Bicycles has you covered. With frames designed for the smoothest of rides and upright body positioning, Felt’s electric pedal-assist bikes are the most comfortable on the road. And with each one built around the industry-leading Shimano STePS or Bosch eDrive System, they’re also the most efficient and reliable, too.

An ideal commuting partner or workout buddy, the Felt Electric city bikes feature lightweight, durable frames that are designed for high-performance riding, but its upright handlebar position ensures maximum comfort and steering control. Whether your goal is getting to work swiftly and efficiently, enhancing your workout or enjoying a casual ride through town, the city bikes are versatile ebikes that can do it all. With a timeless design inspired by classic European city bikes, Felt Electric bicycles are perfect bike for getting around town quickly and in style.

Technology and innovation define every model produced by Felt Bicycles, but perhaps none more so than Felt Electric mountain bikes. Whether you’re hitting your local trail for a leisurely spin or heading deep into the backcountry, Felt’s full line of pedal-assist electric mountain bikes offer all of the performance for which Felt mountain bikes are renowned with the added benefit of an electric motor to help you conquer any terrain.

From the impeccable handling and low weight of the cross-country racing-inspired NINEe to the incredible versatility of the LEBOWSKe, Felt Electric mountain bikes are built to perform. Crafted from high-strength materials for long-term durability and finished with premium components, each bike in Felt Electric’s line is designed to offer first-class handling, comfort and performance.
**FINISH**

Schwalbe Jumbo Jim Evolution, LiteSkin, folding, 26 x 4.0" w/ presta valve tubes

### Lightsystem
Bosch system specific front light cable (included) Head light w/ handlebar mount (optional)

### Carrier
Felt Aluminum rear rack (optional)
Felt’s electric pedal-assist cargo bikes give you the freedom to explore your environment and carry out your daily activities in a more eco-friendly alternative to the automobile. For quick trips to the grocery store, dropping the kids off at school or hauling party supplies to the beach, there’s nothing quite like utilizing a Felt cargo electric pedal-assist bike. Those activities demand a sturdy frame, plenty of storage space and a powerful electric pedal-assist motor, all of which are exactly what Felt Electric delivers.

Felt Electric’s cargo ebikes are built around a sturdy frame and long wheelbase to provide a stable ride with confident steering. Whether its bringing home the groceries, taking the kids to soccer practice or transporting a cooler filled with cold brews, these cargo bike are up to the task, all without having you break a sweat.

No bicycle embodies freedom of expression better than the cruiser. Felt’s complete line of cruiser bicycles showcases some of the most unique in the world, evoking cultural movements, contemporary and timeless style and an easy-going lifestyle characterized by a passion for fresh air and sunshine. Whether you’re heading down to the beach boardwalk or rolling across town, Felt’s Cruiser series will get you there in style.

Each model in Felt’s Cruiser series is built around a rugged frame for durability and features an upright riding position for all-day comfort. Well-cushioned components like ergonomic saddles and handlebar grips further enhance the comfort of each Cruiser, while precision steering provides stable and confidence-inspiring handling, making them the perfect choice for all riders. And with several different models available, including single-speed and multi-speed models, along with a wide array of paint and accessories packages, each and every rider can have their perfect ride.
