RING SIZE GUIDE

HOW TO MEASURE YOUR SIZE:

For an accurate measurement we recommend you get one of our inexpensive ring sizing kits. Each kit contains an accurate and reusable ring sizing belt, a printed version of this document and even a discount code for your next ring purchase.

Purchase a kit here: simonewalsh.com/ring-sizer

A low-tech method

Otherwise here is a less accurate method, but one you can use right away:

- * Cut a strip of sturdy but flexible paper - around 15cm (6") long and 0.5cm (0.25") wide.
- * Wrap the paper around your finger and ensure it sits where you would normally wear a ring.
- * Mark the spot where the paper meets when you feel you have a comfortable fit.
- * Measure the distance with a ruler which shows millimetres or fractions of inches.
- * Use the ring size chart in this document to determine which is the closest size to your measurement.

Measuring from an existing ring

This is a great way to find your ring size (or to secretly find out someone else's size) and over the page we have a handy chart to help you do just that.

HANDY RING SIZING TIPS:

When to measure

Keep in mind that your finger sizes will change throughout each day and over longer timeframes. Your fingers will tend to be larger in the evenings and can be affected by hormones, weather, medication and more.

Given this it's a good idea to measure multiple times at least over the course of a day to find the best size for you.

Most importantly the ring size should feel comfortable in the evening when you are feeling warm.

Large knuckles

If you have large knuckles don't forget that you'll need the ring to slide over your knuckle. To take this into account you should also measure your knuckle and choose a size inbetween your finger size and knuckle size.

Wide band rings

If you're purchasing a ring which has a wide band (over 7mm or 0.27") you should go up half a size using numerical sizes or a full size in alphabetical/Wheat Sheaf sizes.

Larger or smaller?

Your ring should fit your finger well enough so it won't fall off, but it should also be loose enough to fit over your knuckle without too much difficulty - and to allow for changes in finger size each day.

If you're between sizes or there is some difference in your size during the day, a good thing to bear in mind is that it's always better to go for a slightly larger size than one that's too small, so you should err in that direction.

Which measuring system to use?

You can use the US (numerical) or Wheat Sheaf/UK/Australia (alphabetical) sizing systems to order a ring. At Simone Walsh we use both of these systems for ring sizes, so you can tell us whichever size type you have. See the chart in this document.

MEASURE AN EXISTING RING

What you need:

- * This page printed at full size (see instructions below).
- * A ring which fits the finger you want to know the size of.
- * If you don't have a ring to measure, have a look at our ring sizing kits: simonewalsh.com/ring-sizer

Printing this page:

- * Before printing ensure that 'page scaling' is set to 'none' or '100%' in your print settings.
- * After printing measure the line below to check that it is 30mm (or 3cm) in length to ensure the size is accurate.

Measure your ring:

- * Line up the inside of your ring with the inside of the circles below until you find a close match.
- * The sizes shown below are both alphabetical (Australia, UK, etc.) and numerical (US, Canada) - you can use either when placing your order for a Simone Walsh ring.
- * The measurements shown within each circle below are the inside diameter of the ring.
- * Only full sizes are below. If you're mid way between sizes have a look at our full ring size table on the following pages to get a more accurate size.
- * We find the most common ring sizes for women are L½ (US: 6), N½ (US: 7) and P½ (US: 8) and for men are R½ (US: 9) and T½ (US: 10).

Size: F or 3	Size: H or 4	Size: J½ or 5	Size: L½ or 6	Size: N½ or 7	Size: P½ or 8
14.1 mm	14.19mm	15.3 mm	16.5 mm	17.3 mm	18.1 mm
Size: R½ or 9	Size: T½ or 10	Size: V½ or 11	Size: X½ or 12	Size: Z½ or 13	
18.9 mm	19.8 mm	20.6 mm	21.4 mm	22.2 mm	

RING SIZE CHART

Inside diameter (mm / inches)	Inside circumference (mm / inches)	Alphabetical sizes (Australia, UK, etc)	Numerical sizes (US / Canada)
11.6mm / 0.458"	36.5mm / 1.438"		0
