

Ring Size Guide

We recommend two methods within this size guide to facilitate you in acquiring your ring size.
Before proceeding with the process, please make sure that the document is printed
on an A4 sheet of paper and your print scale is at 100%.

Method 1

The first method involves the measurement of an existing ring that fits you comfortably.
Place your ring on top of the circle that is similar in diameter, making sure that the inner part of the ring matches with the pink area.
You should only be able to distinguish a pink circle without any white areas visible within the inner part of your ring.

Method 2

Carefully cut out the outline of the ruler & proceed to creating a slit at the location above our emblem.
Wrap the ruler around your finger, keeping the numbered side facing up and tighten accordingly.

Take the final measurement at the base of your finger, whilst also measuring your knuckle.
The conclusive size is when you feel the ruler coming off with relative ease.

If you have any doubts regarding your ring size after attempting both methods,
do not hesitate to get in touch for additional assistance.
