## DOUBLE FLAME SMOKELESS FIRE PIT OWNER'S MANUAL

Congratulations on your recent purchase of a  
Double Flame Smokeless Fire Pit by Breeo!

### For Best Results:

Only burn dry, seasoned hardwood in your Double Flame Smokeless Fire Pit, as it will burn hotter and more completely, which allows for greater smoke reduction. Avoid using softwoods such as pine or cedar. After each use, wait until your Double Flame Smokeless Fire Pit has cooled completely, then clean out the ashes. To extinguish the fire, let it burn down as much as possible, then use a minimal amount of water to douse the flames.

## For Your Safety:

---

The Double Flame Smokeless Fire Pit is designed for outdoor use only and should never be used in a building, garage, or any enclosed area.

Always use your Double Flame Smokeless Fire Pit on a level, non-combustible surface such as concrete, rock or stone.

**Do not use on wooden or composite decks.**

Do not attempt to move or store your Double Flame Smokeless Fire Pit until all ashes and coals are completely extinguished. Never touch ashes or coals to see if they are hot.

All surfaces of the Double Flame Smokeless Fire Pit will become very hot when in use. To avoid burns, do not touch any part of the Double Flame Smokeless Fire Pit until it has completely cooled unless you are using protective gear (potholders, gloves, BBQ mittens, hot pads, etc.).

When using your Double Flame Smokeless Fire Pit, exercise the same precautions you would with any open fire.

Never leave your Double Flame Smokeless Fire Pit unattended, especially around children and pets.
