

SkyCaddie SX400

USER GUIDE

IMPORTANT NOTICE

Read carefully the SkyCaddie SX400 Product Information Guide before use of the SkyCaddie SX400. Failure to read and follow the Product Information Guide may cause serious injury or death.

The SkyCaddie SX400 specifications and functionality are constantly evolving, and we may update or change them in whole or in part, without notice to you. Such updates may be required for you to use new functionality, access new courses or features, or continue to access and use existing courses and features. The courses and features available for use on the SkyCaddie SX400 change from time to time, and not all courses or features previously offered will be available. Some features require an annual subscription.

The software in the SkyCaddie SX400 is licensed and not sold to you, and is subject to the End User License Agreement set forth in the SkyCaddie SX400 Product Information Guide.

PRODUCT OVERVIEW

Watch the Product Overview video [here](#).

1.0 POWER ON/OFF

To power on your SkyCaddie SX400, press and hold the POWER button until the display turns on. To power off, press and hold the POWER button for about three seconds and confirm the prompt on the screen of your SkyCaddie SX400.

2.0 PRODUCT SETUP Watch the Product Overview video explaining setup [here](#).

2.1 CHARGING YOUR SKYCADDIE SX400

It is recommended that you recharge your SkyCaddie SX400 after each round to ensure that it is always ready to play. If the battery level is low, a full recharge may take 4 hours.

Your SkyCaddie SX400 will receive a faster and more complete charge when you recharge it with the SkyCaddie SX400 USB cable and the SkyCaddie SX400 wall charger via a wall outlet.

If storing the unit for long periods of time - charge the battery to around 50% and check periodically to keep battery at around 50% charge.

NOTE: Only use the SX400 USB cable and wall charger provided

CHARGING YOUR SX400 USING A WALL OUTLET

Inserting the USB cable into the SX400 USB port correctly for charging and syncing.

1. With the SX400 lying flat on a surface, touch screen up, gently pull back the port cover located on the bottom of your SkyCaddie SX400 to gain access to the micro C-Type USB port. (a)
2. Take the cable (b) that is included in the box and insert the micro C-Type USB connector into the open port (c).

a

c

b

3. Plug the power adapter into an open wall outlet or surge protector.
4. Your SkyCaddie SX400 will automatically begin charging once the USB cable is inserted in the port. You will see a Battery icon appear on the screen when attached. Once fully charged the icon will reappear on the screen showing a full charge.

Your SX400 will automatically power OFF when fully charged.

CHARGING YOUR SKYCADDIE SX400 USING YOUR COMPUTER

NOTE: This is a much slower method for charging and **not recommended**

1. Simply connect the USB end of the cable to your computer and the micro C-Type USB end to the SX400.
2. Your SkyCaddie SX400 will automatically begin charging once the USB cable is inserted in the port. You will see a Battery icon appear on the screen when attached. Once fully charged the icon will reappear on the screen showing a full charge.

SkyCaddie
SX400

HOW DO I KNOW IF MY SX400 IS CHARGING?

When your SX400 is turned off and connected to wall charger, you will see this screen – to check if charging, simply press the power button and this screen will show.

When the SX400 is turned on, and connected to wall charger, you will see this lightning bolt in the battery meter at the top of the screen

2.2 REGISTERING YOUR SKYCADDIE SX400

There are two ways to activate and register your SkyCaddie SX400:

1. On your SX400 device with Wi-Fi connection
2. On your computer with the CaddieSync Express desktop app.

REGISTERING YOUR SX400 VIA WIFI

1. Power on your SX400.
2. On the Home screen, select the “Register” button.
3. Follow the on-screen instructions to complete the registration process.

Video instructions available here:

[How to register as an existing customer](#)

[How to register as a new customer](#)

[How to register with a pre-paid card](#)

REGISTERING YOUR SX400 WITH CADDIESYNC EXPRESS DESKTOP APP

1. Connect your SX400 to your computer using the enclosed micro USB C-Type cable.
2. Go to www.SkyGolf.com and click on “Register New Product” on the top menu bar
3. Turn on the SX400 and click SYNC and then USB SYNC.
4. Follow the onscreen instructions to complete the registration process.

3.0 NAVIGATION

The screen of your SkyCaddie SX400 responds to several gestures:

Tap gesture

Drag gesture

Pinch and Zoom

4.0 PLAYING GOLF

Watch how to start a round of golf on your SX400 [here](#).

4.1 (A) SELECTING A COURSE TO PLAY

1. To start a round of golf, press the PLAY GOLF button on the HOME screen.
2. Your SX400 will automatically start searching for nearby courses and there are 3 options to choose from:

Nearby: After acquiring a GPS signal, your SX400 will display a list of courses nearest to you.

To start a new round of golf, select the PLAY GOLF button on the HOME screen.

Favorites: Select a course from the list of courses you have downloaded or updated.

Search: Search for a course by name. Once you have discovered the course, press on its name to select it.

3. After you've selected a course, confirm the round options and press the "Start Round" button to begin play.

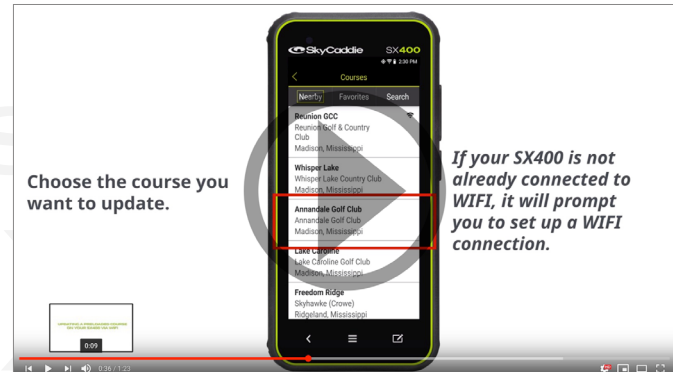

(B) UPDATING A GOLF COURSE WITH WI-FI

SkyGolf's golf course library is updated regularly for accuracy. The easiest way to update a golf course is over WIFI.

1. From the main menu, choose PLAY GOLF.
2. Choose a course from either the list of NEARBY COURSE, FAVORITES OR SEARCH for the course you want to update.
3. When opened, press UPDATE

If your SX400 is not already connected to WIFI, it will prompt you to set up a WIFI connection.

4. When the update is complete, the course will be listed in your FAVORITES section and you will see a WIFI icon next to the course indicating you updated it over WIFI.

(C) UPDATING A NEW GOLF COURSE TO YOUR SX400

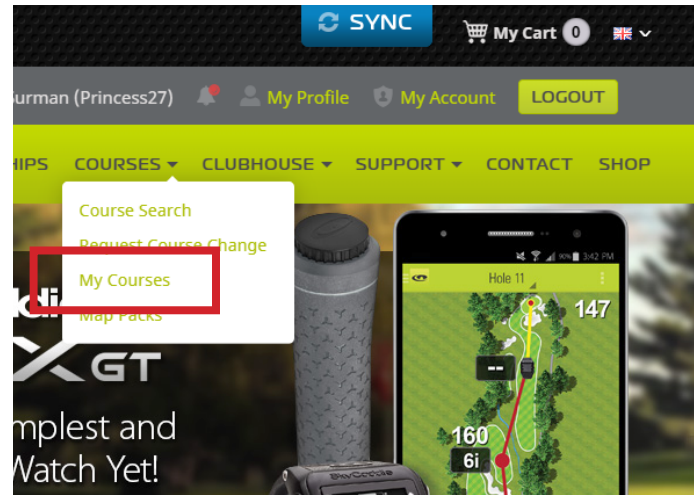

1. Go to www.skygolf.com and log in.

2. Under COURSES, choose My Courses.
3. Ensure the correct SkyCaddie is chosen, then choose the courses for download.
4. If connected to the computer via USB connection, choose DOWNLOAD SELECTED COURSES. If connected on your device via WIFI, choose SYNC and WIFI SYNC. That will download all of the courses you have chosen. They will be put in your FAVORITES section.

The screenshot shows the SkyCaddie website interface. At the top, there is a search bar with the text "MY SK200 (AA1819700109)" and a dropdown menu. Below the search bar, there are two buttons: "SEARCH COURSES" and "DOWNLOAD SELECTED COURSES". The "DOWNLOAD SELECTED COURSES" button is highlighted with a red box. Below the buttons is a table of courses with columns for Facility Name, Location, Map Type, Course Features, and Selected. The "Selected" column contains checkboxes, some of which are checked and highlighted with red boxes.

Facility Name	Location	Map Type	Course Features	Selected
Annandale Golf Club (View)	Madison, MS United States	18 Holes	Private Non-Liquor	<input checked="" type="checkbox"/> Selected For Download
Antalya Golf Club (View)	Belek, Antalya Turkey	18 Holes		<input type="checkbox"/> SELECT
	Sultan	18 Holes		<input type="checkbox"/> SELECT
Ashridge Golf Club (View)	Little Gaddesden, Hertfordshire United Kingdom	18 Holes	Visitors Welcome	<input type="checkbox"/> SELECT
Aylesbury Park Golf Club (View)	Aylesbury, Buckinghamshire United Kingdom	18-hole course	Visitors Welcome	<input checked="" type="checkbox"/> Selected For Download
	9-hole course	9 Holes	Visitors Welcome	Course Requested

SkyCaddie
X400

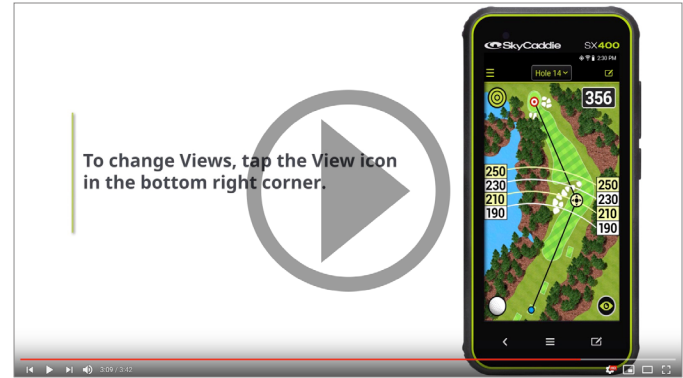

4.2 CHANGING GOLF VIEWS

When playing a course, the Golf screen will start on HoleVue and auto-advance to IntelliGreen as you progress from tee to green. You can also manually switch views by pressing the VIEW button.

1. Interactive HoleVue – An eagle’s view of the entire hole.
2. Patented IntelliGreen – Dynamically displays the exact shape of the green from your angle of approach.
3. Target List – displays distances to hazards, carries and layups located ahead from your position on the hole.
4. Basic View – Large distances to the front, center and back of the green.

To enlarge and access detailed information on the hole in play, such as par and HCP information, press on the Green distance number displayed at the top right of your screen.

All views may not be available on all courses.

(A) ROUND OPTIONS:

ROUND

Number of Holes: Option of 18 or 9

Pin Location: Options of green center, zones or custom pins. Watch how to create custom pins [here](#).

AutoHole: Provides hands free option that allow you to advance to next hole automatically.

RangeVue: Option to turn on and off RangeVue Rings.

SCORING

Tee: Option to choose the Tee you will be playing from for the course you have chosen to play.

Round Type: Option for Standard, Scramble, Tournament, Practice, Out of season. These round types can be filtered in your SkyGolf 360 account so that your score averages are correct for the different round types you may wish to play.

Scoring System: Option for Stroke or stableford.

Handicap: Enter your Handicap here so that your scoring is correctly tracked to your handicap. The scorecard will display stroke adjustments based on each hole's handicap.

NON-CONFORMING:

RangeVue - Suggest Clubs: when enabled, these features are Non-Conforming for competitive sanctioned rounds and will provide warning to you.

How to Setup RangeVue with Club Selection?

The SkyCaddie SX400 supports the NEW feature RangeVue with Club Selection. This feature will allow you to program in your club distances through your SkyGolf 360 account and when enabled for use on the SX400, will instantly show you distance remaining as well as the club suggestion. This feature can be turned on and off for competitive sanctioned rounds.

Please follow the instructions below for setting up RangeVue with Club Selection.

1. Go to www.skygolf.com and click on the "SkyGolf 360" section at the top of the page.
2. Click on "Login" on the top of the website.
3. When the "SkyGolf 360" page opens you should see a list of option tabs at the top.
4. Click on "Edit Golf Bag".
5. In the "Edit Bag" screen you will see a list of clubs and you can edit distances or delete clubs. (Edit to your personal distances or Delete clubs you don't use).
6. Once finished click on "Save". Then, connect your SkyCaddie SX400 and sync it to update this information to the device to use with RangeVue with Club Selection. (See screenshots on next page)

SX400

4.3 FEATURES OF INTERACTIVE HOLEVUE

Dynamic HoleVue: The new and patented Dynamic HoleVue™ feature rotates the fairway and orients the green from your current position and angle of attack as you move from the tee to the green. See everything between you and the green without touching a button and get the distances you need to avoid hazards and play your best golf.

Line of Play: The SX400 will automatically draw a line between your current location and the recommended target for your tee shot. To adjust the target location, drag the cursor anywhere on the hole. The recommended target appears on the screen as an orange icon for reference.

Dynamic RangeVue: Multiple yardage arcs overlay fairway landing areas and greens to allow you to select the best club for every shot much more quickly. RangeVue is on by default, but tap the RangeVue icon in the top left corner to turn it off.

IntelliPath: Automatically provides the distance to every other relevant attribute of the course along and beyond your target line.

Hole Number: Press the “Hole” button to manually change holes. If Auto-Hole Advance is turned off, you will need to press this button, since the SX400 will change holes automatically.

Green Distance: To quickly view detailed information on the hole in play including distances to the Front, Center and Back of the Green, press on the Green distance number in the top right of your screen. This distance is ‘as the crow flies’ or direct to the hole and does not take target location into account.

Mark Ball: The Mark Ball feature of your SkyCaddie SX400 calculates your shot distance. To use, tap the Mark Ball icon, then press the “Mark” icon before taking your shot. The distance to your shot will calculate as you move towards your ball.

If the driving range at the course you’re playing has been mapped, you can view the distance to each driving range target. To view the driving range targets, open the “Hole Button” and select “DR”.

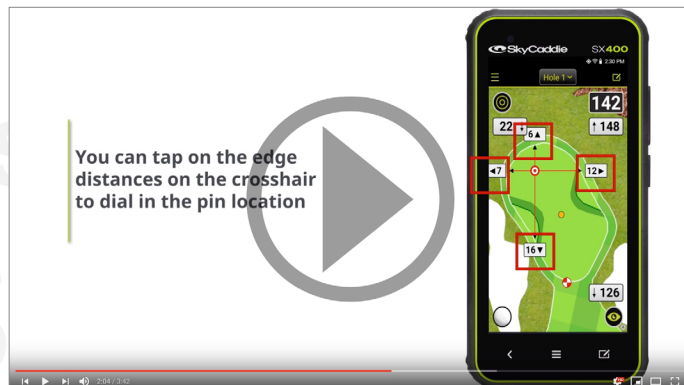

4.4 FEATURES OF INTELLIGREEN®

SkyGolf’s proprietary IntelliGreen® technology graphically displays the true shape of the green, automatically rotating it to match your angle of approach. It turns every shot into a scoring opportunity by providing front carry and back distances, depth of green, and distances to any other point on the green — simultaneously.

If RangeVue® is on, you will see yardage arcs displayed with preset distances for quicker club selection. Press the RangeVue button to toggle Dynamic RangeVue ON / OFF.

Using the SX400 screen, you can dynamically interact with the IntelliGreen.

- To get a distance to any point on the green, drag the green cursor anywhere inside the green to move the crosshairs to that position.

- For precision placement, tap the numbers at the edge of the green to move the target crosshair in that direction by one yard/meter.

4.5 INTELLIGREEN® PRO

Built on proven IntelliGreen technology, IntelliGreen Pro feature offers all of the functionality of IntelliGreen, plus the ability to display major tiers, contours, false fronts and mounds from your angle of approach to the green. This kind of crucial scoring information is only possible by precision-mapping a golf course from the ground. If an Advanced Feature Course map has an IntelliGreen Pro feature, your SX400 will use this version of IntelliGreen by default.

NOTE: Not all greens or all courses have noteworthy, major green contours to require this feature. In conformance with USGA regulations, SkyCaddie does not factor slopes or gradients into distance calculations.

4.6 TARGET LIST (HAZARDS, CARRIES AND LAYUPS)

The Target List displays a list of distances to hazards, carries and layups located ahead from your position on the hole. The Target List also calculates and displays the “Leaves” distance to the center of green or pin location if entered.

Appendix B contains a table of targets.

4.7 FRONT, CENTER AND BACK SCREEN (BASIC VIEW)

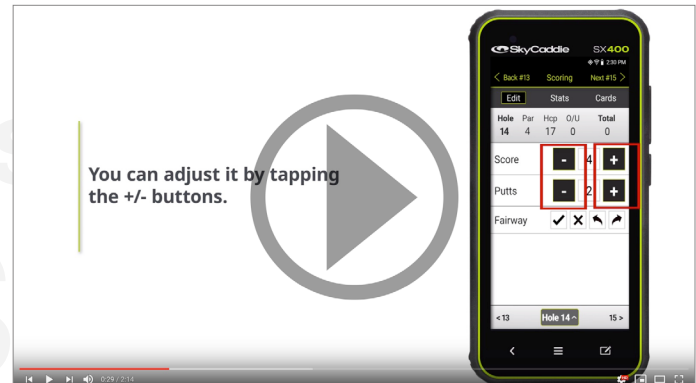

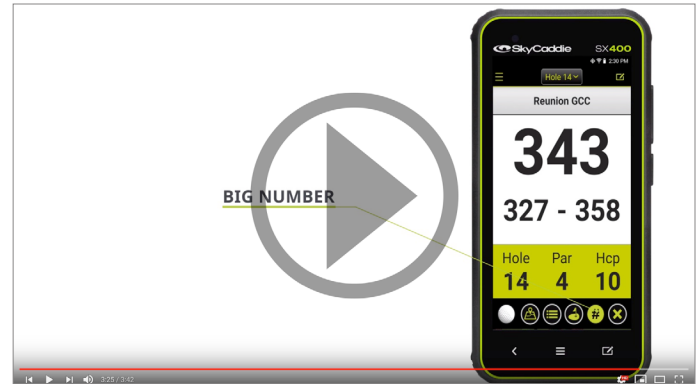

Displays the distances to the front, center and back of the green from your angle of approach in a very large number for easy viewing.

4.8 THE DIGITAL SCORECARD

During your round, you can keep score on your SX400. You can track your Score, Putts and Fairway as well as stableford scoring, stroke play, handicap, extra stroke indicators, gross/net, points etc.

To track your score accurately please remember to enter your handicap on the 'Round Options' screen in the main menu after you choose 'Play Golf'.

1. Press the "Scorecard" icon
2. Enter your Score, # of Putts and Fairway (on par 4s and 5s). Use the "+" and "-" buttons to adjust the number.
3. Press "Next" button to advance to the next hole, or "Back" button to return to the hole you just played.

4.9 INTELLIGENT AUTOMATION

Intelligent Automation™ provides an almost touchless and buttonless experience from the parking lot to the 19th hole. Whether you prefer only basic distance information or want everything the SkyCaddie® has to offer, simple on-off settings allow you to have it your way. Intelligent automation makes sure critical DISTANCE information is ready before you need it.

- Auto-Course Selection finds and loads your course
- Auto-Hole Advances displays the next hole before you get there
- Auto-Zoom provides the best view of the hole as you proceed from tee to green
- Auto-Distance updates yardages continuously from your location without aiming
- Auto-Green Depth calculates the green's depth and the distance to the front, back and any number in between, all from your angle of approach
- Auto-View displays scorecard in landscape view with a simple turn

4.10 REVIEWING SAVED ROUNDS

To view your previous rounds on the SX400, select the "Scores & Stats" button on the HOME screen.

The SX400 will store up to 20 unsynced rounds. To upload your rounds to your SkyGolf 360 Cloud, please sync over WIFI which will upload your scores to SkyGolf 360 or use CaddieSync Express desktop app. Rounds may be deleted from your SkyCaddie SX400 to make room for new rounds, even if they aren't synced.

To manually delete a round on the SX400, tap on the round and select "Delete".

5.0 SETTINGS

5.1 ACCOUNT SETTINGS

This section contains important information about your account. To update information here, you will need to visit your online account at www.skygolf.com or SkyGolf360 mobile app.

- *Device Name*
- *If Found*
- *Profile*
- *Membership*: Shows what SkyCaddie membership you are currently subscribed to.
- *Expires*: Displays your membership's expiration date.
- *Access Code*: Displays the unique access code for this SkyCaddie SX400, which you may need to refer to during registration of this device.

5.2 GOLF SETTINGS

- *Unit*: Press on "Units" to toggle between imperial (Yards and miles) and metric (Meters and kilometers) units as your preferred measure of distance.
- *Tee Gender*: Choose gender for round options.
- *Dynamic HoleVue*: Option to turn on or off
- *North Indicator*

SkyCaddie
SX400

- *Auto Zoom to Green:* Distance that your SX400 will automatically switch from HoleVue to IntelliGreen
- *Show Targets Over:* Target List view will automatically scroll to show targets over this distance.
- *NC Warning:* Non-conforming mode. When Dynamic Range Rings with club selection is turned ON, you will get a warning when you start a round that uses a non-conforming feature.

5.3 SYSTEM SETTINGS

- *Battery Life Tips:* Provide information to help you save battery.
- *Auto Dim:* Can be adjusted here from 30 secs to 30 min. NOTE: changing these settings can affect the battery life.
- *Language:* Press on “Language” to set your preferred language in which to view screens.
- *Auto Off:* Your SkyCaddie SX400 can be set to turn itself off after a certain period of inactivity:
 - a. Never: This setting will prevent your SX400 from turning off automatically. You will need to manually turn off your SX400 after play to conserve the battery charge, otherwise your SX400 will continue to run until its battery charge has been depleted, which has a negative effect on the longevity of your battery.
 - b. 30 Minutes: Your SX400 will turn itself off after 30 minutes of inactivity.
 - c. 60 Minutes: Your SX400 will turn itself off after 60 minutes of inactivity.
 - d. 90 Minutes: Your SX400 will turn itself off after 90 minutes of inactivity.
- *Course Reset:* Deletes all courses except the courses preloaded from the factory

- *Factory Reset*: Press “Factory Reset” only if you wish to delete all your data and personalized settings from your SkyCaddie SX400. Pushing the “OK” button will completely reset your device. This action cannot be undone, and you will need to sync your SX400 to restore your membership details on the device.
- *GPS Status*: View your active satellite signals. This function may be used while troubleshooting with a SkyGolf Customer Support Representative or if you notice that your satellite signal appears to be poor.

5.4 VERSIONS

- *Serial Number (ESN)*: Displays your SkyCaddie’s unique Electronic Serial Number.
- *Version*: Displays application version.
- *OS*: Displays operating system version.
- *Map Pack*: Displays what version of pre-loaded map pack

SkyCaddie
SX400

APPENDIX A

HELPFUL HINTS

- Never disconnect or turn off your SkyCaddie SX400 while it is syncing, either via a USB cable connection to your computer or wireless technology connection to your smart device. Wait until it is finished communicating before you disconnect it, power it off, or power off your computer.
- Turn on your SkyCaddie SX400 outdoors, with a clear view of the sky, to receive satellite signals. Give it an initial five minutes to warm-up before play. Do not carry in pocket or in glove box of cart
- While the high-performance GPS has been designed to acquire satellites quickly and stay locked to maintain performance in all terrains, it is still a good idea to avoid being around buildings, obstructions, heavy foliage, low areas with adjacent obstructions, or reflective objects (such as metal/glass structures) while using the SX400.
- To maintain optimal accuracy during play, ensure that your SkyCaddie SX400 is always on, that it is in an upright position and that it has a clear view of the sky. Do not put the SkyCaddie SX400 in your pocket.
- Do not turn the SX400 on and off during play. The SX400 is a “smart system” that continues to download data from satellites to adjust to your environment during play. It is designed to stay on continuously during a round of golf. Turning it on and off will interrupt satellite communication and slow down play. If you take a long break at the turn, you may turn your SkyCaddie off to conserve battery power. When you turn it back on, remember to allow 5-10 minutes for it to return to optimal GPS accuracy. In the Main Menu, press “Resume” to continue your round.
- Fully charge the battery before each round.
- ONLY USE AC chargers and USB cables that come with or are authorized for use with your SX400. The wrong adapters or cables may damage the SX400.

- SX500 while using Polarized Sunglasses: All outdoor readable Liquid Crystal Displays (LCD's) have varying types of polarizing filters that are designed to maximize the readability of the LCD display in various lighting conditions. Each manufacturer of the LCD uses the type of polarization filter that is optimized for their particular display and the normal orientation the display will be used. The SX500 LCD has filter layers designed that provide the best performance for the LCD. Major brands of sunglasses are typically polarized in order to reduce glare reflected from horizontal surfaces such as land and water. Some aviation sunglasses may not be polarized because of potential readability issues with cockpit instrumentation LCD's. The SX500 LCD has been tested with all major brands of polarized sunglasses and is visible outdoors with those sunglasses. There may be a slight apparent darkening of the display when turned horizontally depending on the type of polarization direction of the respective sunglasses. Most sunglasses are vertically polarized, however some are polarized 45 degrees. Each will behave slightly differently with the SX500 display. Various SkyCaddie products may have different LCD's and polarization methods optimized for the respective product LCD.
- DO NOT expose your SX400 to extreme temperatures. Treat it like you would your cell phone.
- Sync your SX400 regularly. Syncing regularly allows the SX400 to keep running at peak performance. Syncing allows you to check alerts for new features and software updates; automatically upload your latest scorecard to SkyGolf 360, update your course maps, and download add Vivid HD maps to your list of courses.
- Your SkyCaddie SX400 is highly water resistant. Still, you should take care not to expose your SkyCaddie SX400 to water, as too much exposure to water may cause damage, such as might happen if you drop your SkyCaddie SX400 into the water hazard while looking for your ball. If you do get your SkyCaddie SX400 wet, do not attempt to dry it with an external heat source like a microwave oven or hair dryer. SkyCaddie SX400 devices that do manage to get water damaged may not serviceable.

- Never attempt to repair or modify your SkyCaddie SX400 yourself. Disassembling your SkyCaddie SX400 will void the warranty. Your SkyCaddie SX400 does not contain any user serviceable parts. Service should only be provided by a SkyGolf® Authorized Service Provider. If your SkyCaddie SX400 has been punctured, or subjected to a severe fall, do not use it until you contact an Authorized Service Provider. The rechargeable battery in your SkyCaddie SX400 is not user-replaceable and should be replaced by a SkyGolf Authorized Service Provider only. For service information, go to www.skygolf.com.

U.S. FEDERAL COMMUNICATIONS COMMISSION REGULATORY AGENCY COMPLIANCE This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interferences received, including interference that may cause undesired operation. NOTICE: The FCC warns that user modifications of this device without the express approval of SkyHawke Technologies could void the user's authority to operate this device. **CANADIAN REGULATORY AGENCY COMPLIANCE** This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the interference causing equipment standard entitled: "Digital Apparatus", ICES-003 of Industry Canada.

APPENDIX C

BATTERY INFORMATION AND SAFETY REQUIREMENTS

Failure to comply with all of the following precautions could:

- Cause personal injury or property damage
- Cause abnormal chemical reactions which would make the battery over heat, smoke, distort, leak, explode, or catch on fire
- Destroy internal protections built into the battery
- Shorten battery life
- Reduce battery performance
- Use only a SkyGolf supplied wall charger and USB cable with your SX400.
- Do not leave your SX400 attached to a charger or a USB port for over 24 hours. Under the recommended conditions, a completely discharged SX400 battery should completely re-charge in about 4 to 6 hours when on the charging screen.
- Do not charge the SX400 in a place where it could become over heated by direct sunlight, a stove, a fire, or other source of extreme heat.
- Keep the SX400 away from sources of high voltage or static discharge.
- If storing the unit for long periods of time - charge the battery to around 50% and check periodically to keep battery at around 50% charge.
- Store the SX400 in a place where it will not experience temperatures or absolute humidity over 85%.

- Do not put the SX400 into a microwave oven.
- Do not allow the SX400 to be crushed.
- Do not incinerate or burn a SX400.
- Do not leave a SX400 where it could become submerged in water.
- If your SX400 is overheating, leaking, smoking, or if you detect an unusual odor, do not use. Immediately disconnect the cable from any charger or USB port.

Avoid leaked-out materials. Do not allow these materials to SX400 your skin or clothes. Leaked materials may cause skin irritation. Seek medical attention if irritation persists. If leaked material contacts your eyes, do not rub your eyes. Rinse the eyes thoroughly with water and see a doctor immediately.

- Opening the SkyCaddie will void your warranty.
