To Whom It May Concern:

I am writing this letter to verify that we are the sole source manufacturer & provider of these printed individual student response boards, as well as our student markers & erasers. The designs on our printed boards are unique and copyrighted to our company. We manufacture all of our boards and our erasers right here in our Michigan factory. The boards are made using 1/8" premium tempered hardwood with the corners and edges rounded for safety & durability. The dry erase surface is non-porous and "goof proof". Unlike other dry erase suppliers, even if a permanent marker is accidentally used to write on our boards, we can tell you how to remove it without damaging our surface or we will replace it free. Also all of our guidelines are etched and locked into the dry erase surface, not just printed on top. That means the guidelines and graphics will never come off or we will replace the board free. Who else will do that? We do not sell textbooks, classroom furniture or large wall size dry erase boards. All we manufacture is student dry erase boards and accessories. For that reason we have to give you the best prices and superior quality. All of our blank boards also carry the same "goof-proof" guarantee. Below is a list of our sole source boards.

Sincerely,

A handwritten signature in black ink that reads 'Jason Lightner'.

Jason Lightner
