

# FABRIC OPTIONS

**CAN'T DECIDE WHICH FABRIC TO CHOOSE FOR  
YOUR TEACHER CARRY ALL BAG?**

Here is the low down on our fabrics...

# OUR FABRICS

All our fabrics are pre-washed before construction.

My bag designs, fabric and shape have been years in the making, with continued perfecting and adjusting to get to the current design based on real feedback from real teachers and educators.

They can withstand a considerable amount of weight but as with any handmade product will not take kindly to being misused and carrying excessive amounts of weight.

Please use a reasonable amount of discretion when packing to not overfill the bags with excessive weights, if it's too heavy for you to carry then it's too much for your bag to withstand. That said if you are undecided between fabrics and do carry heavy items within reason, the cotton canvas fabrics are slightly more durable in their thickness than the water resistant ones but both fabrics are strong enough for everyday use.

## WATER RESISTANT NYLON

As the name suggests it is water resistant

The fabric is nylon similar to what is used for rain coats, however ours is of very high quality and is soft to the touch

Water resistant nylon bags have a two tone finish to the fabric which can be seen up close and gives the bags their vibrant colours

If you are prone to dropping your bag where it lands and are not really concerned with washing it more than once a year then this is the fabric for you!

99% of spills or marks can be wiped away with a non-chemical baby wipe, antiseptic wipe or warm soapy cloth.

## COTTON CANVAS

The cotton canvas used for our bags is very high quality 12 or 14oz. The finish is a soft feel with a dense woven thread.

We recommend that all cotton canvas bags and accessories are sprayed with a fabric protector like scotch guard or similar to protect your bag. Without using fabric protector the bags will last approximately 6-12 months with normal use before needing to be washed, however this will vary per owner. With the use of fabric protector the need for washing will be considerably delayed.

The cotton canvas is a very stylish option and as mentioned above is slightly thicker and stronger than the water resistant with a classic handbag look. Perfect for those who want style and strength.

**We use a family owned and operated fabric supplier who we have known and ordered from for many years and are 100% happy with the quality fabrics they supply us for our products.**
