

TWINS

TWINS bring pure stereo sound to you on the go. In addition to great sound quality, they can take hands-free calls from your device. Where will you take them?

1. Initial Setup & Operation

- Press and hold the **Power** button for 2 seconds on both speakers and place them close together
 - Press the **TWS** Button on one speaker
 - The LED lights will blink quickly, wait until a connection sound plays and both speakers have a solid light
 - Select "TECH-LIFE TWINS" From your devices bluetooth list
 - This step only needs to be done once, the TWINS will pair together automatically during normal operation
- e. To turn TWINS off: Simply hold the **Power** button until you hear the 'Power Off' sound and the LED lights go off.

2. LED Indicator

Blue

- Solid = Right Channel
- Fast Blink = BT Searching Mode
- Slow Blink = Connected, Ready to play

Blue+Green

- Solid = Left Channel
- Fast Blink = TWINS pairing Mode
- Slow Blink = Connected, Ready to play

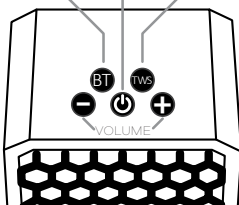

3. Charging

Insert the Micro USB cable into your computer or USB wall charger. When the red LED is on, your TWINS are charging. When Battery is full, the red LED indicator will turn off. When the battery is low, you will hear a warning.

4. Speaker-phone Function

When Calls come in, there will be a "Call" sound and you can tap the **BT** button once to answer the call. You can press the BT button twice to initiate a call back

Bluetooth Pairing Power TWINS Pairing

5. AUX and USB Inputs

Connect via a 3.5mm or Micro USB cable to play media from your device. Note: Twins Pairing will be disabled in this mode

6. Maintenance

Avoid corrosive liquids, acids and high temperatures. TWINS are splash resistant but are not designed for submersion. Clean with soft damp cloth if needed, dry before use. Warranty doesn't cover water damage or abuse

7. Troubleshooting

Symptom: Red LED is not on when charging

Reason: USB not connected properly or no power from charger

Fix: Check power supply or try another USB port

Symptom: TWINS will not power on.

Reason: Battery low

Fix: Please plug into charger

Symptom: Blue LED is on but no sound

Reason: Volume set low or TWINS not connected to device

Fix: Check TWINS volume and make sure it's correctly paired

Symptom: TWINS not connecting to device

Reason: Battery might be low OR Device's Bluetooth not turned on OR device and TWINS are too far apart

Fix: Plug TWINS in, verify Bluetooth is on, bring TWINS and device close together
