

DA BUDDHA

Made for you!!

DA BUDDHA VAPORIZER & OIL DIFFUSER

Put your smoking to rest and experience vaporization!

- Operation instructions
- Warranty information

The only vaporizer to offer the Quick Change Wand, Aroma Top and the Hands Free Attachment!

Diffuse oils while you vaporize! The ultimate aromatherapy tool!

This is a perfect time to turn your Da Buddha ON and READ this manual! You need to wait ten minutes for the oils from assembly to burn off the heater anyway!

Before use – READ this instruction manual.

SAFTY FIRST

- Be very careful when Da Buddha is turned on. Da Buddha gets HOT, and the heater (glass and ceramic) gets really, really hot and will burn you very bad if you touch it! Do not touch the heater for any reason when the DBV is turned on, it is extremely HOT!
- Keep Da Buddha away from combustibile materials including but not limited to paper, plastic and fabric or anything else you might think could catch fire.
- Do not place Da Buddha where it can be tipped or could fall over.
- Keep out of reach of children and pets. Never leave unattended with a child in the vicinity.
- Do not let hair or any loose clothing come in contact with the heat source as it may catch fire.
- Never leave the Aroma Dish on when it has potential to be tipped or knocked over as hot oils can burn and stain.

How it works

Briefly, the vaporizer allows a person to inhale essential ingredients from herbal material without the use of fire. Da Buddha vaporizer uses hot air to warm the plant matter until active ingredients are heated high enough until they boil, vaporize and are absorbed by the air. Instead of using fire to burn the ingredients out of the plant matter, our product releases the ingredients quickly and efficiently without ingredient losses, tar, and odor associated with smoking.

Da Buddha vaporizer warms up once and is ready for the rest of the day as long as it is supervised. The glass hand piece (wand) is packed lightly, not more than 1/3 full, or around 1/4 inch. As soon as the hand piece (wand) is connected with the heating element of the vaporizer, the user inhales instant vapor through the tube! Vapor goes in clear and is exhaled as a big cloud of white mist. Your lungs are saved as they are not inhaling the plant ash and tar. The standard size hand piece offers about 4-7 big inhales before the herbal material dries and becomes brown. Stir it up and try again or unload the hand piece. The user blows through the tube to expel the spent material into a container or trash.

Getting the right vapor draw is a science. Da Buddha owners learn their machine in about 1 week (usually less). Get used to packing very small amounts, fluffed up slightly. We recommend the following procedure:

1. Turn on Da Buddha unit to full power for 2-3 minutes (there will be a red/orange glow within a minute but the glass needs to heat up also). **On the first initial start up wait ten minutes for any oils to burn off of the heating element. The smoke is from hand oils and other oils from manufacturing.**

2. Turn Da Buddha's power back about 1/4-1/2 the full power and the unit should be ready to use all day. For the first use you should try a lower setting and gradually turn Da Buddha up until vaporization occurs. This will insure that you do not have Da Buddha turned up to high and catch your herbal matter on fire. After some use, you will be able to find a perfect setting for Da Buddha. Do not let your materials turn black as this is combustion and that is not what you want.
3. Grind up your herbs while the unit is heating. You can use a grinder, knife or fingers, but make sure that the material is broken up. We recommend using a DBV grinder that you can get on our website if you do not already have one.
4. Place your herbs into the wand. You can accomplish this by using your fingers and putting it in or sucking up the ground herb through the wand. Do not fill the wand too much (1/3" or around 1/4 inch full is the maximum you want to put in there). You can use as little or as much as you like. Try not to fill the wand so much that when you vaporize the tobacco is touching the heater.
NOTE: You do not need to use much material here. I recommend placing enough in the wand to cover the screen with about 1/8-1/4 of an inch of material. Don't sweat it, you will figure it out quickly.
5. Place the whip up to the heating element and inhale air (draw) a full breath. If when you exhale you see a white mist, you are in the zone you want to be. If there is no mist, inhale more slowly or turn up Da Buddha unit a little bit. You can control the amount of vapor created by varying the intensity and duration of air you inhale. Inhaling slower lets the air pass by the heater longer increasing the temperature of the air. The faster you inhale the less time air is heated so the air is a little cooler. Practice makes perfect. This is one reason there are no numbers because every user inhales different and I believe you are smart enough to remember the perfect location.
NOTE: Make sure that you are not inhaling too slowly or the unit is too hot. The tobacco that you are vaporizing will catch fire. If the material is black it might be turned up a little too high. You'll get the hang!

KNOW BEFORE USING YOUR Da Buddha!!! The heat source in this unit is **very hot**. **Do not touch the heat source or tip of hand piece. Da Buddha Vaporizer must be kept away from combustible materials**, including but not limited to paper, plastic, and fabric. **Do not place Da Buddha where it can be tipped over or fall. KEEP OUT OF REACH OF CHILDREN AND PETS.** Da Buddha should be operated under careful supervision at all times. **Do not let hair or any loose clothing come in contact with the heat source as it may catch on fire!**

The statements above have not been evaluated by the Food and Drug Administration. The product listed above is not intended to diagnose, treat, cure or prevent any disease. This is for informational purposes only, as we are not advising or prescribing herbs for any specific medical condition or for any specific use. Know the published dosage and effects of every herb you try. Certain plant materials when vaporized may emit either toxic or flammable vapors, and the manufacturer disclaims any materials other than those listed in our literature. *Herbal vaporizers are NOT FOR ANYONE BUT RESPONSIBLE ADULTS over 18. Da Buddha is not to be used for any illegal purpose. It is up to you to know if this is a legal device in your state.*

LIMITED 3 Year WARRANTY

7th Floor, LLC warrants, to the original purchaser only, that the Da Buddha Herbal Vaporizer will be free from defects in material or workmanship for the original purchasers' life (excluding glass and electronics). 7th Floor, LLC will repair or replace the defective part for free excluding shipping. We offer a 3 (three) year warranty on the electrical parts of the DBV. We offer a 30 day warranty on the glass due to manufacturer defects. Glass is not covered due to accidents. 7th Floor, LLC is not responsible for shipping charges. To make a claim under this Limited Warranty, please contact 7th Floor, LLC toll free at: (866) 835-6418. Warranty does not apply to any glass such as knob, heater cover, wand, mouthpiece or any other glass part. The 3 year warranty is void if anything is spilled on or in it; the DBV has been abused, or tampered with.

Maintenance and Service

WARNING! Opening up the Da Buddha and tampering with any wires voids the warranty. There is no reason to open the Da Buddha unless you are changing your base. If you are changing your base do not move the wires around as this could move the heating element around. We recommend that 7th Floor LLC perform all service work.

For warranty work (which you will not need hopefully) or any info contact customercare@7thfloor.biz and for the subject put Da Buddha warranty, or call toll free at: 866-835-6418.

You must provide a copy of your receipt or proof date purchased to take advantage of the DBV warranty.
