

LEE SPECIALTY SEALS | PRODUCT INFORMATION

		
	PRODUCT NAME:	SILICONE
	PART NUMBER:	ORSIL_-----
	CATEGORY:	O-RINGS
	SUB_CATEGORY:	SILICONE

QUICK DESCRIPTION:	Silicone compounds offer the widest elastomer temperature range but typically cannot be used in dynamic applications or petroleum based fluids.
MAIN FEATURES:	<ul style="list-style-type: none"> -wide temperature range -popular for food and medical applications -most commonly used in static applications due to its poor tensile strength and wear resistance -available in metric and imperial sizes
TECH SPECS:	<ul style="list-style-type: none"> -temperature range -65°C (-85°F) to 232°C (450°F) -excellent resistance to oxidization and ozone degradation -suitable with vegetable oil, water and ozone
ACCESSORIES & NOTES:	Do not use with acid and alkalis or hot water/steam (>120°C).
