

GOVERNMENT OF THE DISTRICT OF COLUMBIA
DEPARTMENT OF GENERAL SERVICES

April 28, 2017

To Whom It May Concern:

I am writing this letter to attest to the quality work of Western Water International and the dedication and expertise of owner Michael Pedersen. The District of Columbia Government is currently committed to reducing the level of lead to less than 1 part per billion using point of source filters at identified drinking water sources.

While other manufacturers did not consider working with us at the time to meet this unprecedented low lead level in drinking water, Michael Pedersen rose to the challenge and assembled a filtration system to specifically meet our needs. Additionally, he provided expertise and created different components to address our water and building complexities.

Mr. Pedersen heads up a team that stepped up as our project deadlines were tightened. They worked almost round the clock to ramp up production while not sacrificing the quality of the filtration systems.

Mr. Pedersen is a very committed business owner who continues to provide active support to the ongoing complications encountered in our endeavor. He brought a wealth of experience and expertise to our project. He has been available at every step and is dedicated to the success of our project.

We look forward to a continued team effort and support from Michael Pedersen.

Sincerely,

Brian Killian
Safety and Health Supervisor
