

Other filters vs. Aquaspace®

- Ordinary Carbon filters do not remove a wide range of dangerous levels of chemicals and other organic contaminants which cause cancer, disease or birth defects.
 - Require more than one cartridge for different chemical filtration functions, e.g. one for sediment, one for taste and odor, one for certain chemicals and so forth. This greatly increases cost and required maintenance.
 - Cartridges must be cleaned and changed regularly, sometimes as often as monthly, resulting in high ownership and operation cost.
 - Not portable or convenient to take on trips, camping or for using around the home or office.
 - Many units such as the home distillers and R/O's will actually "strip" the water of vital minerals such as calcium, magnesium, etc. which are essential for humans.
 - Distillers and R/O's are more expensive on a per-gallon-produced basis even though not as effective as AQUASPACE®
 - Many "Filters" on the market that only make the water look and taste better but not Healthier!
- ◆ Removes an incredible number of chemical and organic contaminants including chlorine, chloroform, herbicides and pesticides, gasoline, toluene, mercury compounds, asbestos, benzene, DDT, ammonia, trichloroethylene, carbon tetrachloride lead, and other heavy metals etc. along with taste, odors and sediment.
 - ◆ One AQUASPACE® removes all these water problems with no need to connect other cartridges. This all-in-one is a unique design feature on the AQUASPACE® Compound providing a broad safety net against unknown or undetected contaminants in the water supply.
 - ◆ No cleaning and no maintenance required and the AQUASPACE® products and cartridges will last several times longer than conventional cartridges (most are 12 months).
 - ◆ A broad variety of unique portable filter designs is available to provide clean water everywhere you go.
 - ◆ Allow the essential minerals to pass through without removal as they are molecular in water and recognized as essential by the Compound. This selectivity is another AQUASPACE® exclusive design feature.
 - ◆ AQUASPACE® products will do much more for much longer per dollar invested than any other product available.
 - ◆ Patented, officially certified NASA Technology
