HORSE HEALTH

Leading Veterinary Equine Supplements

Synovium[®] Biobute

Biobute is a natural supplement, consisting of a combination of natural plant products for optimal comfort and mobility.

The Biobute formula includes harpagophytum (Devil's claw). Our unique mix supports anti-inflammatory properties to help support joint, muscle, tendon and ligament health especially in the older horse.

Ideal for use as an alternative to bute, long term.

Devils Claw – Believed to be a natural anti-inflammatory. It is often used as a natural replacement for Bute.

Turmeric – Thought to provide powerful anti-inflammatory and anti-oxidant properties. Suitable to support horses with stiff joints, irritated skin and to support a healthy digestive system.

Raspberry – Natural product that is believed to help regulate hormones in mares and support the GI tract.

Fenugreek – Highly palatable, supports condition, healthy digestion and the immune system. Naturally rich in healthy fats, vitamins A, B, C, E and is highly nutritious.
