### Leading Veterinary Equine Supplements

## Synovium<sup>®</sup> Electrolytes Q

Synovium<sup>®</sup> Electrolytes Q is a well-balanced and complete supplement of electrolytes for horses. Designed to help replace electrolytes lost during warm weather and exercise, including training & competition.

Restoring the electrolyte balance in horses and with added antioxidants, Synovium Electrolyte Q supports fast and optimal recovery of the body. A palatable supplement that contains all the key electrolytes sodium, chloride, potassium, calcium and magnesium.

Fresh Drinking water should be available at all times. The average 500kg horse requires around 25-30 litres per 24h, when in moderate work and in cool/warm weather conditions.

Complete well balanced Electrolytes supplement for optimal hydration support when given regularly

Added antioxidants for faster recovery and sustained performance.

### Composition

Dextrose, Sodium Chloride, Sodium Bicarbonate, Potassium Chloride, Magnesium Sulfate
