HORSE HEALTH

Leading Veterinary Equine Supplements

Synovium® Gastrosafe

Synovium Gastrosafe is a trialled veterinary gut balancer and horse ulcer supplement. Developed to support a healthy stomach environment and aid digestive function.

It has been extensively researched by a veterinary team and nutrition experts for optimal gastric aid.

Gastrosafe helps control gastric acidity in horses, provides essential proven prebiotics, whilst supporting the natural anti-inflammatory processes in the front and hind gut.

Suitable for horses with poor appetite, poor condition, poor performance and behaviour changes.

Ideally fed to horses during or after veterinary treatment for ulcers to help support a healthy gut environment, providing a natural alternative to maintain a healthy GI tract and a happy horse.

A veterinary gut balancer will provide support to horses during stressful activities, travelling, competition and change in routine.

Composition

Calcium carbonate (E170) 300,000mg (300g) = 9,600mg (9.6g) per day

Seaweed (Laminaria hyperborea) 150,000mg (150g) = 4,800mg (4.8g) per day (Natural vitamins, minerals and trace elements)

Magnesium Hydroxide (E528) 150,000mg (150g) = 4,800mg (4.8g) per day (Antacid)

Fructooligosaccharides 150,000mg (150g) = 4,800mg (4.8g) per day (Prebiotics)

Glutamine 57,000mg (57g) = 1,824mg (1.82g) per day (Amino Acid)

Threonine 4,720mg (4.7g) / 100 gr

Kaolin 15,000mg (15g) / 100 gr

Feeding

****Measuring spoon of 50 ml contains 48 grams.**

Horse Loading: add 2 scoops per day to feed for 10 days, split into two feeds for best results. Continue on 2 scoops if directed by your vet.

Horse & Pony Maintenance: add 1 scoop per day, split into two feeds for best results (1.5kg = 1 month supply / 4.5kg = 3 month supply)

Foal: add 1/2 scoop to the feed daily, split between feeds where possible.
