HORSE HEALTH

Leading Veterinary Equine Supplements

Synovium[®] Airplus Liquid

Airplus Liquid is an innovative equine respiratory supplement which has been carefully developed by our leading vets.

A unique blend of Potassium iodide, Eucalyptus oil, Rosemary, Thyme and Aniseed known for effectively clearing the airways and excess mucus whilst soothing the respiratory tract and supporting free breathing.

Suitable for horses with Equine Asthma, COPD and coughs.

A natural horse respiratory supplement with a long lasting effect.

- Potassium Iodide - an expectorant which clears the airways effectively
- Rosemary & Thyme - It has antiseptic, antiviral, anti-bacterial, astringent, expectorant effects that can help with respiratory infections and coughs
- Eucalyptus Oil - soothing effect during coughing
- Aniseed - opens sinus passages for natural respiratory support

NOTE - It is normal for some horses to show signs of mucus discharge from the nose and increased coughing during the first few days of using Synovium Airplus Liquid. This means the product is working and clearing the airways to support free breathing. Please continue with the full 2 week course to see best results. Please seek veterinary advice if unsure.
